SIMPLIFY YOUR WORK FLOW

PRODUCT CATALOGUE 2024

ORGATEX®
SIMPLIFY YOUR WORKFLOW

What you are holding in your hands is more than just a catalogue. It is a departure.

More than ever, we are convinced that lean management and, above all, the efficient use of all resources – be it money, raw materials or employees – is the way forward for companies in the 21st century in order to be successful in the long term.

And more than ever, we are looking forward to making efficient processes easier to implement. „Simplify your workflow", our new slogan, puts it in a nutshell.

And new is right on cue because we have several things that are new this year.

Our new image is certainly the most prominent novelty. New logo, new design, new campaign – we have completely updated our brand to demonstrate our passion for more efficient processes even more clearly.

As of page 14, we present our new products, for example the particularly robust LongLife outdoor floor marking tape, which you can use to create durable floor markings in outdoor areas.

We are especially proud of our new, digital eOX products such as the eOX-Button, which you can use in combination with the eOX-Cloud to automate intralogistics processes at the touch of a button. And thanks to narrowband mobile technology it is completely wireless.

We would particularly like to recommend our new online shop. At orgatex.com you will find everything you can find in the catalogue – easier and more convenient than ever before.

Despite everything that is new, you can rely on some things that remain the same: the quality and durability of our products, committed consultation and service and individualised solutions that work for you.

We hope you enjoy our new catalogue. We are confident that you will find the right solutions for your lean processes in our catalogue. And if you have any questions or suggestions, please do not hesitate to contact us.

Best regards

Your ORGATEX® Team

CON TENTS

WE LOVE LEAN! THAT'S WHY WE WANT TO SHARE IT.

Making efficiency simple is not just our business – it's our passion. We develop solutions, that help people to achieve more with less effort. You can see our passion in our products and feel it in the results.

WE ARE ORGATEX, SO THAT EVERYONE CAN BE EFFICIENT.

We want to help every company become a lean business. Because we are convinced that handling all resources with respect – from capital, raw materials, and materials to every single person – is the best way to deal with the economic and ecological challenges of our time. That is what we stand for. That what we work for with all our energy.

THERE IS ONLY ONE WAY TO LEAN BUSINESS: YOUR WAY.

We know from our many years of experience: Every company is special. With its different employees, needs and requirements. This is precisely why one-si-ze-fits-all approaches are not effective. And this is precisely why we develop our solutions so that customised and scalable lean processes are possible for compa-nies of all sizes.

IF IT'S NOT EASY, IT'S NOT LEAN!

It is not until all people in all companies can implement lean processes that every company can become lean. That is why it is worth making efficient processes easy to use for everyone. We will always be at your side during this important step towards a lean business. We promise.

SIMPLIFY YOUR WORKFLOW.

Are you interested? On the following pages, we will show you how you can make lean processes applicable using ORGATEX®.

LEAN AT FIRST GLANCE

Everything is clearly visible so that everything can be done quickly.

It is well known in process management to put at least as much love into the applicability of processes as into their design. Because the easier it is to understand and apply processes, the better the results will be. That's why we have been working so hard for 50 years to make efficient processes even easier for everyone to implement. Our way to achieve this: Visual Lean Management.

Using effective visual tools we help make processes visible and easy to use throughout the company.

For example, with extremely robust and always clearly visible floor markings that indicate paths or make storage areas clearly recognisable. With easily recognisable, clear markings, e.g. for materials or tools. And with easy-to-understand organisational aids such as the Cardplan insertion system or the KANBAN-boards.

30 % less Costs

60 % less capital commitment

70 % more productivity

Perfect lean processes can be a real boost for your company.

But only if everyone is able to implement them.

To make it lean: all important information at a glance.

IT ONLY RUNS SMOOTHLY WHEN EVERYTHING FLOWS

Ensures lower storage costs, less material waste, higher speed – our FiFo railway station.

Better quality

Lower storage costs

More sustainability

you have the material flow under control, you have taken the decisive step towards the many advantages of optimised intralogistics. We are happy to help.

The right material in the right quantity in the right place at the right time – that is lean intralogistics. However, what sounds so simple is often much more complicated in practice. How do you ensure that there is always enough material available without ordering and paying for too much? And how can heavy materials be delivered to the right place without putting too much strain on the employees?

For decades, we have been searching and finding solutions for material to flow through the lifelines of companies so efficiently that can they grow and remain healthy. And since we are ORGATEX®, these solutions are not complicated, but simple. Like our transport trolleys, which can be used to transport a lot of material. Or our powerful box lifting devices, which get production materials where they belong: to a working height. And last but not least, our ingenious FiFo stations, which put a smart (and, if required, digital) end to material wastage.

Material can be moved easily and efficiently with our transport trolleys.

~~IN~~ SECU RITY

Employee protection

Production stops prevention

Cost reduction

Lean strategy cannot work without security. That is why we also provide support in this area with solutions that make a big difference.

Safety regulations must be visible and understandable for everyone, especially in the hectic day-to-day operations.

Safety is a top priority in lean management. Because smart processes, simple tools, perfect intralogistics are unfortunately worthless if there is a lack of safety. Every accident interferes with or stops the production process. Every employee who is absent reduces productivity or must be replaced by costly external labour.

To avoid this simply but effectively, we have a large selection of safety products, such as anti-slip adhesive tape, mandatory action and information signs or clearly visible path markings. We pay particular attention to the robustness and durability of all our safety products. Because there is one thing safety must never do: lessen.

Our special tape ensures firm footing even in difficult places.

NEW PRO-DUCTS

New technologies and innovative solutions are revolutionising the way companies optimise their internal processes. The innovations from the ORGATEX® product world help to increase efficiency, reduce costs, further improve storage, and transport processes and make your company more secure. From digital mobile boards to eOX-Spots – these innovations will shape the future of intralogistics.

NEW PRODUCTS

PALLET CLAMP

LABELLING OF EURO PALLETS MADE EASY

The pallet clamp is robust, flexible and makes it easy to label every block on the pallet. With 3 slide-in compartments for receipts, you can keep an overview from any position.

LONGLIFE FLOOR MARKING TAPE GRIP

ANTI-SLIP TAPE FOR ALL AREAS

Floor markings visualise danger zones ... but LongLifeGrip can do even more. With its particularly high adhesive strength and slip resistance (slip class R11), you will always be taking a safe step forward.
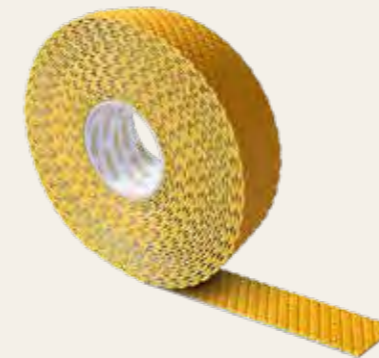

LONGLIFE FLOOR MARKING TAPE OUTDOOR

THE BEST FOR OUTDOORS

The high material thickness and the special synthetic rubber adhesive, in combination with our primer, ensure resistance under demanding outdoor conditions. Rough and uneven surfaces are no longer a problem thanks to the particularly strong adhesive. Even when wet, the reflective surface remains non-slip and clearly visible.

LONGLIFE FLOOR MARKING TAPE HEAVY DUTY

STRONG HOLD FOR HIGH LOADS

The risk potential is highest on highly frequented routes. Robust and reliable markings are essential. Due to its particularly high material thickness, our LongLife Heavy Duty has the most resistant backing layer. The bevelled edges also make it resistant to forklift traffic.

NEW PRODUCTS

LONGLIFE FLOOR MARKING TAPE LOW DUTY

MARKING POTENTIAL DANGER ZONES
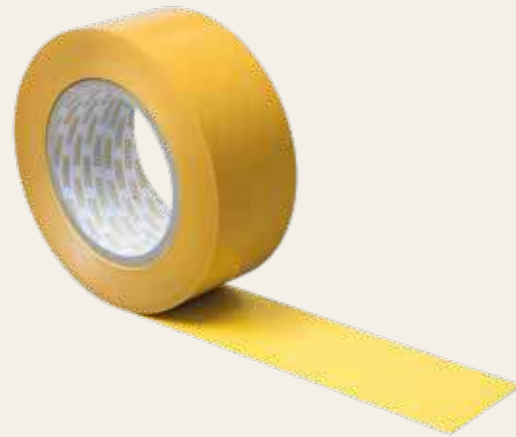

Unmarked danger zones are the most dangerous. Our LongLife Low Duty is easy to apply and can be removed just as quickly without leaving any residue so that dangerous areas can also be marked at short notice.

SET FOR MARKING PARKING SPACES

REDUCE SEARCH TIMES, IMPROVE STRUCTURE

The marking of storage locations is crucial for structuring internal goods flows and warehousing. Avoid long search times and enable your employees to precisely allocate the materials to the according storage locations. We have put together the most important components in a set, combining our top sellers.

VISUAL BOARDS

PRINTED BOARDS FOR YOUR SHOPFLOOR-MEETING

Discover our printed boards to efficiently organise and visualise your shop floor processes. You will also find useful accessories for structuring the boards in the document holders and insertion systems sections.

WORKPLACE SYSTEMS

OPTIMISATION OF WORK PROCESSES AND RESOURCE UTILISATION

In today's business world, where precision and efficiency are crucial to a company's success, the optimal design of assembly workstations is of great importance.

NEW PRODUCTS

eOX-CLOUD

THE DIGITISATION OF INTRALOGISTICS

The eOX-Cloud by ORGATEX® offers companies a secure and efficient way to manage, analyse and store eOX product data centrally.
This allows you to increase your production processes and optimise efficiency.

eOX-BUTTON

DIGITAL AT THE TOUCH OF A BUTTON

Optimise your operating processes by sending internal information at the touch of a button. No matter where the eOX-Button is used, it is immediately ready for use. Customisable messages increase the speed of replenishment and avoid delays. On the spacious e-paper display, you will receive immediate feedback.

eOX-STATION

OPTIMISED PROCESSES FOR THE DIGITAL RAILWAY STATION

The eOX-Station is the digital extension to our classic FiFo station. Connect up to 120 lanes with an efficient pick-by-light system. False picks are reduced to a minimum, internal and external redelivery processes are automatically triggered according to the KANBAN principle and the digital interface enables direct access to all goods movements.

eOX-SPOT

FOR ANY EVENTUALITY

With the eOX-Spot, oily, uneven, or rough floors are no longer a problem. Its strong High-power LED with the highly efficient luminous flux (4730 lm) casts the right sign in the right place – without any risk of tripping or wear out. The labelling can be quickly replaced at any time and adapted to current requirements.

NEW PRODUCTS

eOX-LABEL

DIGITAL LABELS ARE THIS SUSTAINABLE

Digital intralogistics not only saves time in production, but also protects the environment. Our e-labels connect via the mobile phone network NB-IoT (NarrowBand IoT) and are therefore independent of any other infrastructure.
The e-paper displays combine the advantages of analogue media, such as scanability and legibility from all angles, with those of digital media, such as fast content exchange and reduced effort with minimal energy consumption.

eOX MOBILE SHOPFLOOR BOARD

DIGITAL SHOPFLOOR MANAGEMENT

Bring all data from the cloud directly to your shop floor in real time. Industry 4.0 means collecting and analysing data and then evaluating it directly. Combine our mobile shopfloor solution with our digital products – so you are always up to date.

eOX-MONOMOVER

A PUSH FOR PRODUCTION

The feed unit is the centrepiece of modern intralogistics: the eOX-Monomover transports floor rollers from A to B automatically with the help of its bristle belts. This way, FiFo stations can be upgraded and production processes are optimised. Light barriers at the end of each unit independently control the transport from one module to the next.

ALSO NEW!

SECURITY FOR YOUR WORK PROCESSES

OUR SERVICE OFFERS

CON TAIN ER LABEL LING

The basic requirement for efficient processes in operations: clear and distinct labelling of all containers. Whether it is a Eurobox, a plastic crate, a pallet cage, KLT, GLT or other containers: ORGATEX® always offers the right solution.

katalog.orgatex.com/ behaelterkennzeichnung

There are numerous variants of container shapes and materials: some common containers already have inserts that can be used for labelling, e.g. KLT containers or Euroboxes. We offer customised label holders and card pockets in a wide variety of designs for this purpose. However, our solutions also provide a remedy for the numerous container variants without existing inserts: if, for example, there are no suitable surfaces for attaching labels, our high-quality, processed visual pockets are the perfect solution.

We offer a wide variety of options for attaching the visual pockets, so they can be applied to virtually any surface.

If your containers are made of metal, our magnetic pockets or our magnetic document holders can be utilised. Plastic, wooden or glass containers can be perfectly and securely labelled with our self-adhesive visual pockets. Regardless of which container variants you use, you will always find the right solution for convenient, efficient, and clear labelling.

INFOGRAPHIC VISUAL POCKETS

Hanging hole for various attachment options

Slot perforation for all-round brackets

Transparent cling film
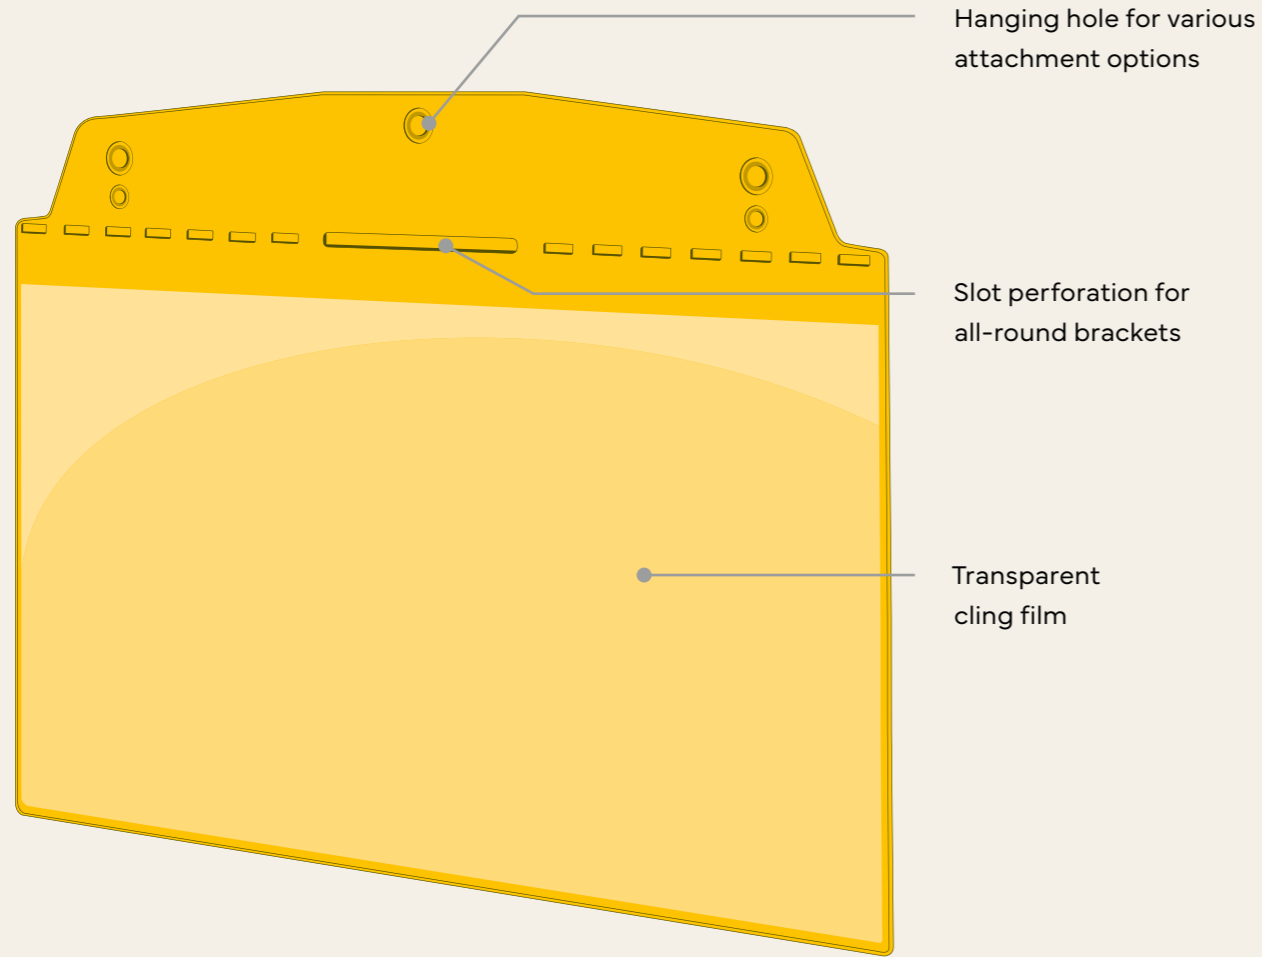

Suitable for all containers

For flexible or permanent labelling

Wide range of mounting options

For attaching/overhanging
Due to the wide range of attachment options and our extensive and unique accessories, there is a labelling option for almost every container.

DIN-Formats
Design of documents in standardised format

Protective flap
Prevents soiling of the documents

Common 5S colours

Ongoing development

Magnetic/super-magnetic
Our magnetic visual pockets are suitable for labelling pallet cages and metal containers or machines. They adhere to all ferrous surfaces, are non-slip and can be quickly re-positioned.

Self-adhesive
The strong adhesive ensures a secure hold even on uneven surfaces. No matter whether metal, wood, plastic or glass, the pocket sticks securely even when subjected to strong vibrations.

VISUAL POCKETS FOR ATTACHING

In many cases, there are no suitable surfaces on containers for attaching labelling. This can be remedied with the clip-on visual pockets. Thanks to the wide range of attachment options and our extensive and unique accessories, there are labelling options for almost any surface.

- 5 hanging holes
- Also available with protective flap
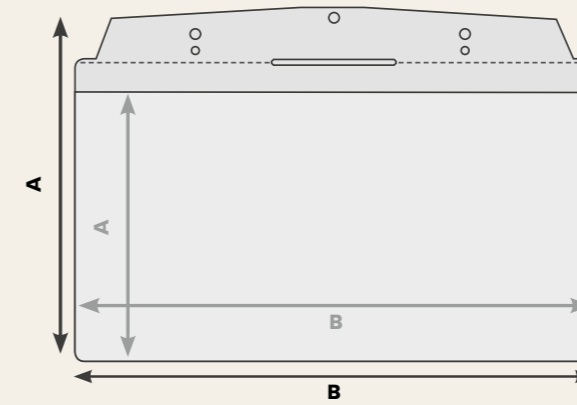

Available formats in mm, outer dimension / inner dimension

All-round bracket (patented)

Order no.	Pack	
KTB3000	10 pcs.	

The patented all-round bracket for quick attachment to our pockets with a slot perforation in the upper section. Designed for pallet cages and/or thick-walled containers up to 4 cm.
Dimensions (W x H): 215 x 125 mm.
The all-round bar **cannot be used** with:
- Pocket design with protective flap
- DIN A7, DIN A4 landscape

Wall bracket for hangers

Order no.	Pack	
WDH1	5 pcs.	

Pockets that are not currently in use can be conveniently „parked" on the wall holder to save space. Suitable for special support bracket MA2000 and all-round bracket KTB3000.
Dimensions (W x H x D): 210 x 25 x 60 mm.
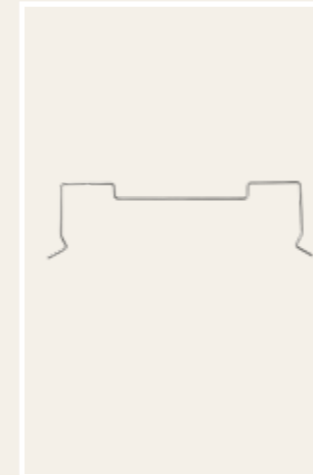

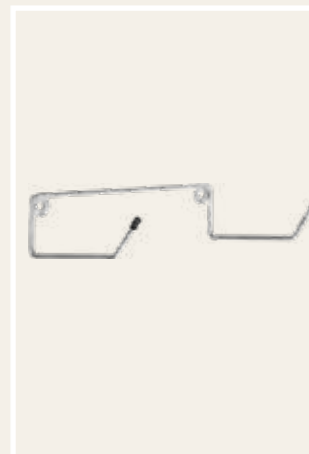

Special retaining bracket

Order no.	Pack	
MA2000	10 pcs.	

Made of black coated spring steel wire with rounded ends. The special retaining bracket is pulled through the two outer suspension holes of the visual pockets.
Due to the spring steel design, it sits firmly between bars or cardboard boxes, on lattice boxes, etc. This bracket can be hung, inserted and attached in between by turning.
Dimensions (WxH): 320 x 100 mm. Particularly suitable for DIN A4 landscape, cannot be used for DIN A6 landscape and DIN A5 portrait.

Mini special retaining bracket

Order no.	Pack	
MA2080	10 pcs.	

The mini special retaining bracket made of spring steel wire was developed for attaching smaller pocket formats (DIN A6 landscape, DIN A5 portrait). Secure hold on cardboard boxes, containers, mesh boxes etc. This bracket can be hung, inserted, and attached in between by turning.
Dimensions (WxH): 230 x 80 mm.
Only suitable for DIN A6 landscape and DIN A5 portrait.
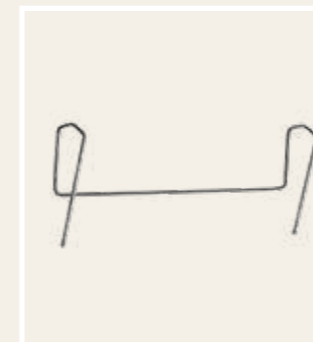

Container bracket

Order no.	Pack	
MA2090	10 pcs.	

Made of black-coated spring steel wire with rounded ends. This flexible attachment is particularly recommended for thick-walled containers **up to approx. 2 cm thick.**
Dimensions (WxHxD): 170 x 65 x 21 mm.
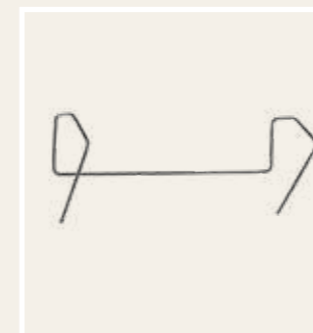

Container bracket

Order no.	Pack	
MA2100	10 pcs.	

Made of black-coated spring steel wire with rounded ends. This flexible attachment is particularly recommended for thick-walled containers **up to approx. 5 cm thick.**
Dimensions (WxHxD): 170 x 65 x 45 mm.

MOUNTING OPTIONS FOR VISUAL POCKETS

U-clamps (patented)

Order no.	Pack	
MA2030	50 pcs.	

For attaching pockets/sleeves to all types of pallet cages. The special bending enables easy removal
Dimensions (WxH): 28 x 55 mm.

U-clamps

Order no.	Pack	
MA2020	50 pcs.	

For piercing cardboard, film and other outer packaging and when using small pocket sizes (DIN A7/DIN A6).
Dimensions (WxH): 15 x 38 mm.

Steel clips

Order no.	Pack	
MA2070	10 pcs.	

For clamping the pockets to plastic crates, bars, wooden slats, cardboard boxes, etc. Quick to change.
Spread width 17 mm, non-slip rubber shoes on the grippers for a gentle grip. Length: 35 mm.

Plastic spike

Order no.	Pack	
MA2060	50 pcs.	

For piercing soft materials such as cardboard, film, plastic bags, textiles, etc. Length: 12 mm.

KAN-Gripper

Order no.	Pack	
KAN-Gripper	100 pcs.	

For hanging on pallet cages, the pocket is clamped in the holder.

KAN-U-Gripper

Order no.	Pack	
KAN-U-Gripper	100 pcs.	

For overhanging, e.g. on pallet cages, with 2 parallel hooks and wide pocket clip.

Plastic tie

Order no.	Pack	
MA2050	50 pcs.	

Plastic ties are highly recommended if the pockets are to be permanently attached or, for example, attached to profiles, cables or the like. The special fastener allows for multiple use.
Length: 320 mm.

Hook-and-loop dot

Order no.	Set	
PFH22	100 pair	

Hook-and-loop dot (Ø 22 mm) with high adhesive force for detachable connections. Easy fixing of a wide variety of materials.
Set = 100 fleece dots and 100 hook dots.

Metal tape, self-adhesive

Order no.	Rolle	
BMS35	5 m	

The self-adhesive metal tape with strong adhesive force is particularly suitable for making non-metallic materials magnetic. Any unevenness on the surface is levelled out by the foam adhesive applied to the back. The white surface offers a particularly neutral appearance. The product can be processed from the roll (35 x 5000 mm) and cut directly to size with scissors.

VST-Gripper

Order no.	Pack	
VST-GRIPPER	50 pcs.	

The round tube label holder makes it easy to flexibly attach visual pockets or label holders to round tubes with a diameter of 28 to 30 mm. The grip points on the inside prevent slipping when fitting or removing the labelling. The interlocked mount provides a secure hold even with vibration.

VISUAL POCKETS SELF-ADHESIVE

With strong foam adhesive strips on the back, all pocket types can be attached to suitable surfaces. Be it metal, wood, plastic, precious metal or glass: the pocket adheres securely even when subjected to strong vibrations or on uneven surfaces.
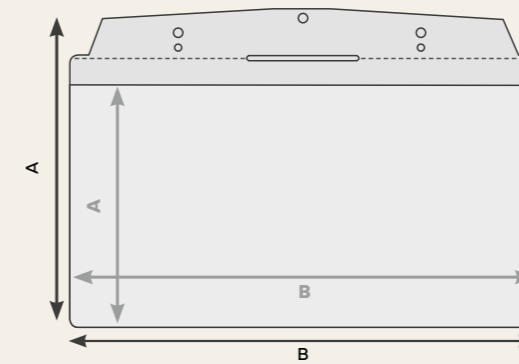

Available formats in mm, outer dimension / inner dimension

INFOGRAPHIC LABEL AND RECEIPT HOLDER

Raised front edge for pulling out while inserting

For hanging on Euroboxes

Bevelled insertion aid

Cover for overhanging
Receipt holder made of transparent rigid PVC, for hanging on Euroboxes, plastic boxes, etc. The viewing window is scanner readable; the bevelled front edge makes it easier to insert and remove receipts.

Label holder
Perfect fit for KLT containers and Euroboxes. The labels are well protected from dirt and moisture thanks to the lateral insert.

Common format sizes

Clip-in profile
With foam adhesive on the back for attaching material cards, article information, label pockets on plastic crates and wooden pallets

Ongoing development

Label cover/receipt holder
Self-adhesive receipt holder made of transparent, UV-resistant rigid PVC with 2 adhesive strips for permanent attachment to containers of all kinds, e.g. plastic crates. The bevelled front edges allow easy insertion and removal of the labels.

Label holder
Simple labelling of plastic crates. The angle makes inserting the labels very easy. Whether on smooth or roughened surfaces, the robust foam adhesive adheres securely to almost all surfaces.
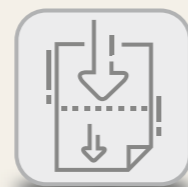

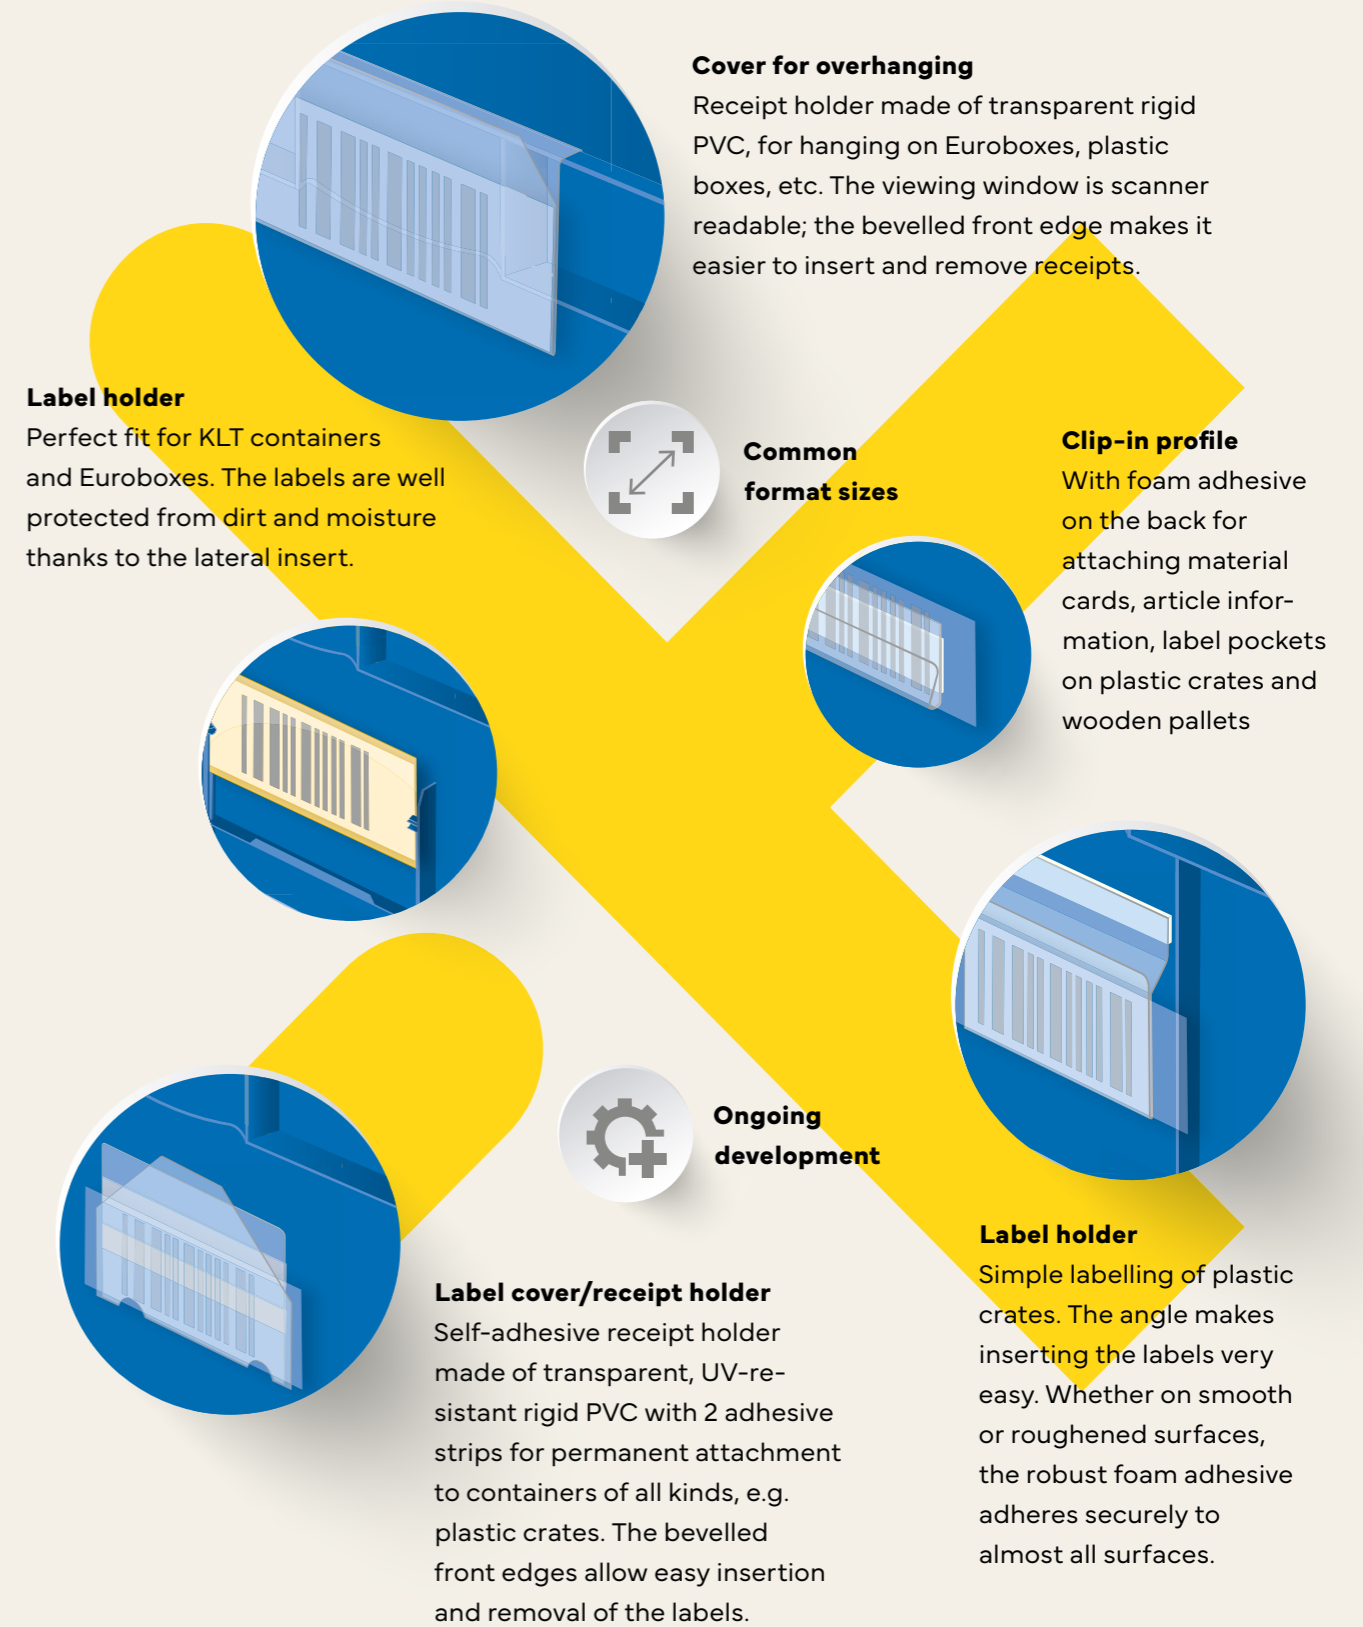

Suitable for all containers

For flexible or permanent labelling

Pre-cut cardboard inserts for customised printing

KANBAN-COVER MAGNETIC/SELF-ADHESIVE

Self-adhesive or magnetic receipt holder made of transparent rigid PVC for attaching to Euroboxes, plastic crates, metal containers, etc.

- Easy insertion and removal of slips due to bevelled front edge
- Scanner-readable and UV-resistant

220 x 80	KAN-COP1/4DIN	10 Pcs.	

KANBAN-COVER MEGA

Secure labelling of loose materials such as bulk goods or C-parts using the KANBAN cover by placing it directly on the container. If there are no label holders on the container, the KANBAN card holder is the right solution due to its own weight. Can be used, for example, as checked/blocked labelling or as a carrier for KANBAN cards and can also be used in all ORGATEX® KANBAN or Heijunka boards.

- Matt material (no reflection)
- Extremely robust
- Scratch resistant
- Suitable for the ORGATEX® system box
- Good readability of receipts/KANBAN cards

KANBAN-Cover MEGA

Format (WxH) (mm)	Order no.	Pack	
215 x 100	KAN-CO1/3DIN	10 Pcs.	

LABEL-COVER SELF-ADHESIVE

With its 2 high-performance adhesive strips on the back, it is particularly suitable for containers with smooth walls. The raised front side makes it easier to insert/remove the receipts.

- Scanner-readable and UV-resistant

Label-Cover, self-adhesive

Format	Order no.	Properties	Pack

DOCUMENT HOLDER KAN-CLIP

Clip-in profile with foam adhesive on the back for attaching material cards, article information and label pockets to plastic crates and wooden pallets. Whether on smooth or roughened plastic surfaces, aluminium, wood-like surfaces, glass and ceramic surfaces, precious or other fine metal surfaces or multicoated metal surfaces, the foam adhesive adheres securely to almost all surfaces.

- Simple labelling of boxes and containers
- Excellent labelling of pallet feet
- Self-adhesive on almost all surfaces

KAN-Clip document holder

Format (WxH) (mm)	Order no.	Pack	
75 x 31	KAN-CLIP75	100 Pcs.	

LABEL HOLDER SELF-ADHESIVE

Clip-in profile with foam adhesive on the back for attaching material cards, article information and label pockets to plastic crates. Made of transparent rigid PVC for insertion.

- Secure hold
- Dust-protected
- Scanner readable
- UV-resistant
- Easy handling
- Easy insertion and removal of receipts

Label holder, self-adhesive

Format (WxHxD) (mm)	Order no.	Pack	
61 x 100 x 14	KAN-COSW100-60	100 Pcs.	

PALLET CLAMP/LABEL HOLDER

Labelling Euro pallets easily
The pallet clamp is robust, flexible and makes it easy to label every block on the pallet. With 3 slide-in compartments for receipts, you can keep an overview from any position. The clamp is fixed to the respective block by utilising the pretension provided by the geometry of the clamp and the bars on the back. Regardless of the viewer's position, the document inserts on both long sides and on the closed short side make the labelling of the pallet visible.

- Even more stable and of higher quality than the previous model (injection moulding process)
- Now placement in the centre and on the corner blocks of the pallet is possible
- Signal colour yellow
- Other colours on request

Pallet clamp/Label holder

LABEL HOLDER INSERTABLE

FABRIC TAPE-DOTS LONGLIFE

Made out of transparent rigid PVC for insertion.

- Secure hold
- Dust-protected
- Scanner readable
- UV-resistant
- Easy handling
- Easy insertion and removal

Unlimited application possibilities!
The LongLife fabric adhesive tape is a PE-coated, dense, fine threaded and waterproof synthetic silk fabric with a highly adhesive, shear-resistant natural rubber adhesive with very good ageing resistance. It is also available in many colours and is perfect for industrial labelling. Can be used both indoors and outdoors.

- Very good ageing resistance
- For indoor and outdoor areas
- Resistance to abrasion, decomposition and moisture
- Firm texture
- Dense, fine-threaded, and waterproof synthetic silk fabric tape

SHELF LABEL LING

Long search times in the warehouse are inconceivable given the demands placed on companies nowadays. A coordinate system as the basis for the clear allocation of goods to storage locations provides a remedy. An elaborate numeric key is derived from the coordinates of a storage location and thus ensures clear spatial identification.

katalog.orgatex.com/ shelf labelling

For this system to work in practice, optimum labelling is required: clearly visible labelling on rows of shelves, shelving compartments and storage levels. At ORGATEX® you will find the right labelling for all areas and purposes: whether magnetic or self-adhesive, coloured, or transparent, for permanent or temporary attachment.

Our self-adhesive Quick-Label inserts are particularly suitable for fixed storage locations and variable items.

Using a foam adhesive, they adhere easily to shelves, pallets, and containers. Our magnetic storage labels are used for metal surfaces. We have designed all versions so that documents can be easily inserted and replaced. Due to the transparent clear profile, error-free scanning of barcodes does not pose a problem.

Tubular shelving systems can also be clearly labelled using our round tube label holders.

INFOGRAPHIC SHELF LABELLING

Shelf row labelling

Shelf labelling

Shelf space labelling

Shelf level labelling

Poster frames (shelf row)
Labelling on the front provides high visibility. Hanging signs (p. 172) can also be used as triangles or squares.

Common format sizes

Label holder (shelf level)
Whether it is permanent or temporary, labelling can be self-adhesive or magnetic.

Common 5S colours

Ongoing development

Transparent window (shelf space)
Labelling the lowest spaces presents a particular challenge, as this is where additional loads are placed by industrial trucks. This is where the transparent window (p. 128) with its excellent adhesive strength is an optimal solution.

Flex sign (shelf field)
Specially developed for high loads. The 90° angle has a great long-distance effect. Due to the 2-component design, the sign simply springs back into its original position after contact with the pallet (storage/retrieval). This way, damage is avoidable.

Clear definition of a storage location

For flexible or perma-nent labelling
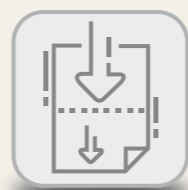

Pre-punched cardboard inlays to ensure pre-cise printing

ROUND TUBE LABEL HOLDER

Due to its ergonomic shape, the label holder forms a single unit with the profile or tube. The sturdy transparent profile is open at the sides and top, making it easy to change the matching cardboard inserts.

The 2-component design provides the clip with both stability and flexibility. Whether round tube or profile tube, specially arranged grip points on the inside provide a secure hold all around.

Format (width) (mm)	Order no.	Gripper per pack	Inlay	Pack	
100	VST-Label-100	100 Pcs.	ET335	50 Pcs.

-	VST-GRIPPER	-	-	50 Pcs.	

LABEL HOLDERS
MAGNETIC/SELF-ADHESIVE

The sturdy transparent profile is open at the sides and top. This means that not only can suitable cardboard inserts be easily inserted and exchanged, but also larger receipts, accompanying documents or additional information are always ready to hand. The sturdy label holders are equipped with a foam adhesive or a full surface magnetic film on the back. The transparent clear profile enables error-free scanning of barcodes.

MAGNETIC LABELS

ORGATEX® magnetic storage labels made of particularly high-quality magnetic foil.

- Guarantee a secure hold on all ferrous surfaces
- Installed and implemented in seconds

This ensures that labelling in the warehouse is always up-to-date, clean and clear. 5 different colours provide additional differentiation at first glance.

FLEX SIGN SELF-ADHESIVE

The flex sign is suitable for shelf, storage and storage space labelling. Made out of a special rigid film, it enables flexible labelling (the sign springs back into its original position when jolted). The sign is attached using 2 flex grippers, which are included as part of the delivery.

Flex sign, self-adhesive

CARDBOARD INSERTS, INLAY (ET)

Clean and easy to design cardboard inserts are the basic requirement for clear shelf/container labelling and can also be used as KANBAN or Heijunka cards.

Due to the all-round micro-perforation, the cardboard inserts can be removed without leaving any residue and without the need for scissors or a cutter knife.

Customised printing is simplified by the free print templates for all formats available at orgatex.com.

The designed sheets can be printed on all commercially available printers. This minimises the amount of handling required to create and design cardboard inserts.

The combination with ORGATEX® protective covers or document holders creates a long-lasting product.

INDIVIDUAL SHELF LABELLING

Plastic labels, reinforced

- Extremely resistant
- Very well suited for slots in the profile
- Self-adhesive
- Abrasion-resistant printing

- Material: Polycarbonate
- Material thickness: 0.7 mm
- Surface: matt
- Adhesive: acrylate
- Area of application: Indoor use
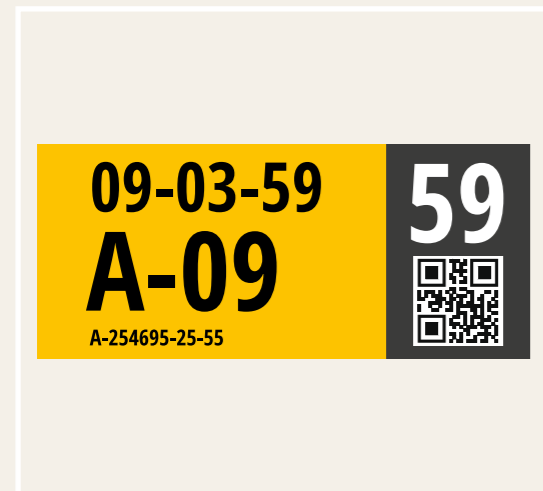

Foil labels

- For smooth, gap-free substrates
- Self-adhesive, resistant, easy to apply
- High tear resistance
- Abrasion-resistant solvent printing

Material: foil Material thickness: 0.2 mm
Surface: matt or glossy
Protective laminate: on request
Adhesive: acrylate
Area of application: interior
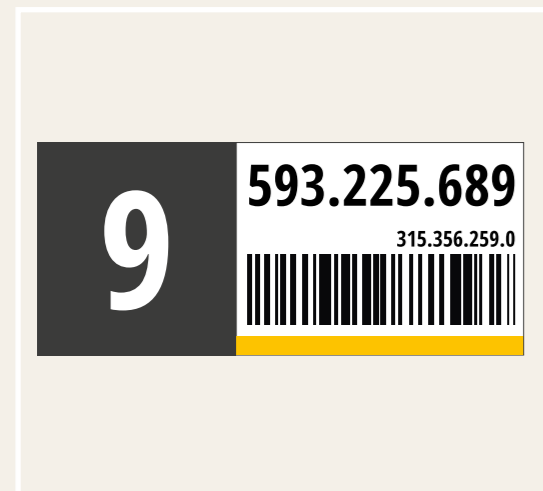

Magnetic labels

- Attachment to magnetic surfaces
- For variable shelf space labelling
- Different magnet variants (e.g. for frozen areas)
- Quick and residue-free replacement
- Flexible use

Material: Magnetic foil
Material thickness: 0.85 mm
Surface: matt
Protective laminate: on request
Area of application: Indoor use

REQUIRED ORDER DETAILS

General information:

1. Specify your desired layout and format

2. For labels with logos or graphics, we require a print-ready template (300 dpi - AI, EPS, TIFF, SVG)

3. We will send you a proof copy for approval

4. The labels will be dispatched as soon as possible after approval

Information on the required Excel spreadsheet:

1. A separate column must be used for each piece of information on your label (plain text, barcodes, etc.)

2. The column names must be distinct (e.g. barcode 1, barcode 2)

3. For each individual label, the use of a separate line is necessary (see fig. below)

4. For arrows (bottom, top, right, left) or symbols, use directional information or plain text (no graphics)

5. Please only use fixed values and not formulae, data sheets, safety instructions, application videos, etc.

FLOOR MAR KING

katalog.orgatex.com/
bodenmarkierung

Whether it is driveways and walkways, danger zones or storage areas – correct labelling is a must. Clear floor markings increase work safety and make it easier to comply with regulations. As the markings on the floor are exposed to particular loads, they must be extremely hardwearing.

ORGATEX® has been setting the standard in the field of self-adhesive floor markings for years: Our long-life floor markings made of torsion-resistant, high-quality plastic distinguish themselves by their extreme resilience. They are „forklift-proof" and can even withstand turning on the marking. They are quick and easy to apply and can be removed again without leaving any residue thanks to our LongLife Remover. Our floor markings are used indoors and adhere to all surfaces such as concrete, stone and metal. They are available in a wide variety of designs: Available in rolls our floor markings are used to designate traffic routes, parking spaces as well as work and safety areas.

With our comprehensive range of labelling signs, you can ensure standardised safety in your company. Our portfolio also includes various symbols as orientation aids or for marking floor windows as well as parking spaces.

INFOGRAPHIC FLOOR MARKING

When fixing the floor marking minimum distance of 30 to 50 mm should be maintained

Labelling of parking spaces

Create your own floor marking in DIN format

LongLife Cold Performance
Self-adhesive floor marking for areas with extremely low ambient temperatures (adhesion temperature to -20 °C)

Common format sizes

LongLife floor marking tape
is made of torsion-resistant, high-quality plastic and has a high abrasion resistance. Easy to apply directly from the roll dispenser.

Common 5S colours, single-coloured and two-coloured

Forklift proof

LongLife symbols
Easy marking of parking and restricted areas. The highly adhesive industrial glue on the back is suitable for all surfaces such as concrete, stone, metal, etc. Different colours, widths and shapes allow for clear allocation of functional areas.

LongLife floor marking signs
Made of PVC and fully bonded. Extremely hard-wearing and wear resistant. Complies with the standards and regulations in accordance with ASR A1.3.

Quick and easy installation. Self-adhesive and torsion resistant.

Various material thickness for all requirements

Colour coding of walkways and parking spaces

Version: Floor marking tape

Other parking spaces
Version: Blank or floor marking tape

Mandatory action signs prescribe mandatory behaviour in the designated areas. The standardised design in accordance with ASR A1.3 indicates hazards that cannot be clearly identified and actively influences the behaviour of employees. Mandatory signs help to significantly increase work safety.

Warning and information signs are used wherever there is danger, e.g. suspended loads, industrial trucks or noise, that has a direct impact on the employees. With appropriate labelling from ORGATEX® you adhere to the legal requirements.

Prohibition signs have the highest weighting in the group of safety signs. Signs in this category prohibit certain types of behaviour and issue clear prohibitions in order to avoid serious accidents.

Longitudinal markings are used to clearly separate different areas, e.g. of driveways and walkways or storage and production areas. In addition to the safety aspect, clearly marked areas also help to increase efficiency and avoid errors caused by mixing up materials and raw materials. For this purpose, markings in different colours, single or multi-coloured, e.g. hatched, are used and assigned to a use.

Symbols are the ideal tool for clearly visualising a wide variety of areas. Different geometries and a variety of colours can be used to mark logistics and production areas. This allows individual areas such as incoming/outgoing goods, empties, blocking or material provision areas to be clearly assigned to their use.

VERSION MARKING EXAMPLE/PROCESSING

A clear allocation of materials to production or logistics processes is essential to ensure quality and effectiveness.

If the identification of semi-finished or finished products, for example, cannot be clearly guaranteed by the colour of the floor marking alone, it can be 100% achieved by using floor labels. Here, barcodes, article numbers or printed images can be used as additional information in combination with ORGATEX® LongLife transparent labels. The special surface structure of the floor signs refracts the light from the ceiling lighting to enable error-free scanning, e.g. of QR or barcodes, and has an anti-slip effect.

Labelling, e.g. for marking parking spaces, can be printed in standard DIN format on normal paper. In combination with the ORGATEX® LongLife transparent sign this creates an excellently protected floor marking system.
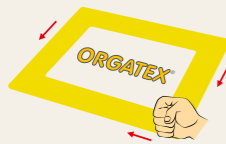

Quickly create your own floor signage: The printout on standard paper is placed behind the specially textured film, which prevents reflections, e.g. from ceiling lights, thereby maintaining scanner readability. All-round adhesive strips protect the printout from external influences such as dust or moisture and form a solid bond with the substrate by simply pressing it down.

Remove dirt, grease and oil from the surface using a cleaner (LongLife Cleaner)

Ideal processing temperature 18 °C to 25 °C

Allow to harden for approx. 12 hours

Do not overlap floor markings!
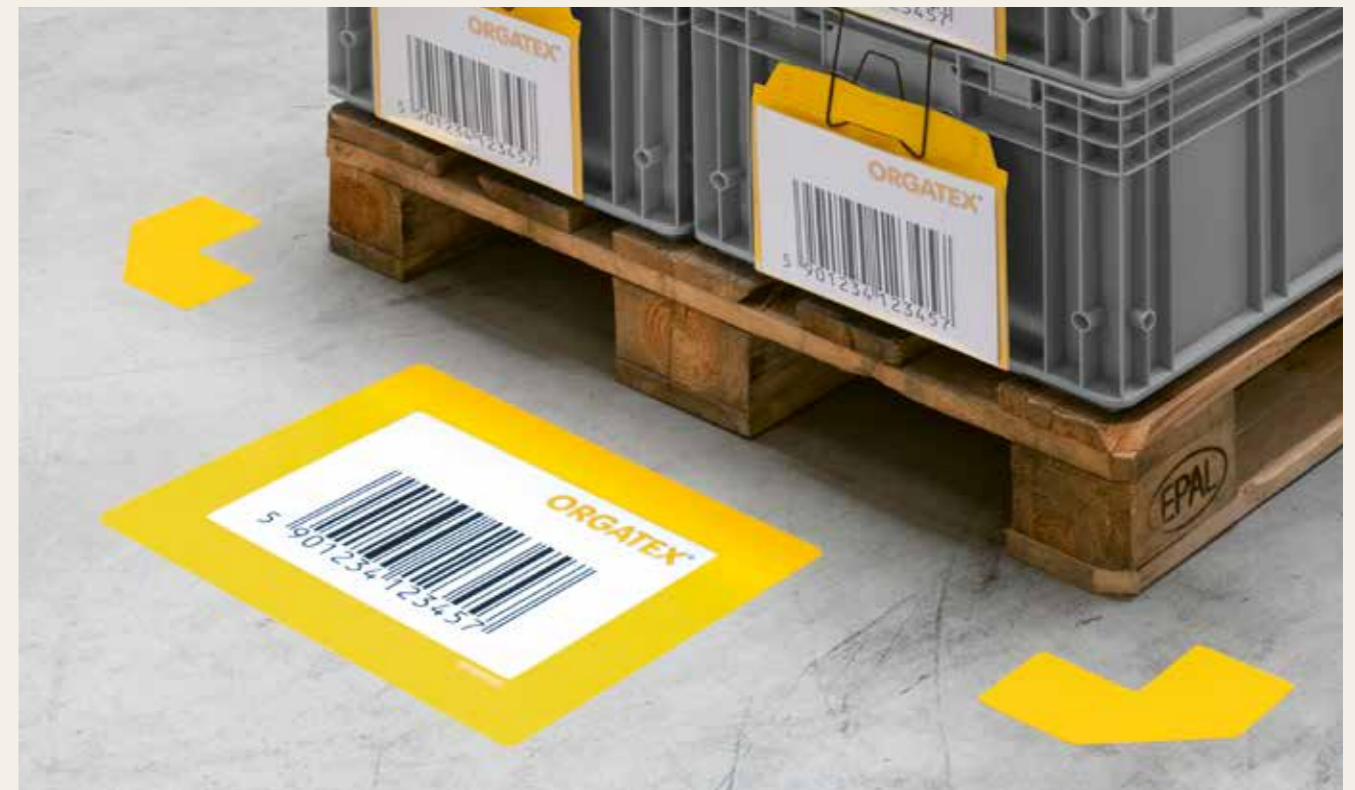

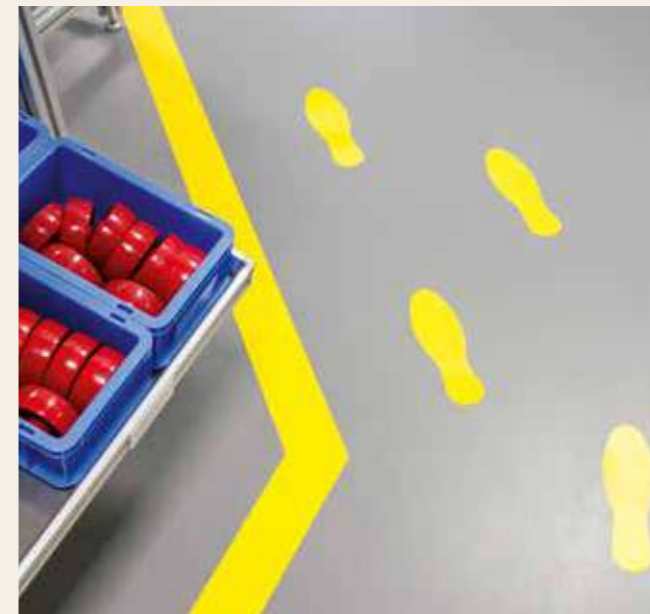

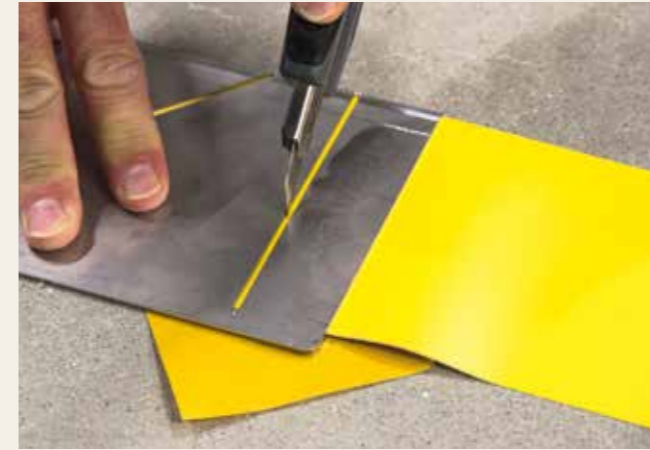

LONGLIFE FLOOR MARKING TAPE PRODUCT RANGE

Find the floor marking you need
Always the right marking – regardless of the floor condition or type of application! You can use our tapes from LongLife with precision and long-term stability against wear and tear: e.g. parking spaces, main and secondary routes or safety areas.

New products, new variety! We have generously expanded our range. New additions are the LongLife products Low Duty (LD), FTS, Grip and Heavy Duty (HD). We are also happy to customise our tape according to your requirements. So you are always guaranteed to find the right solution for your specific needs.

LONGLIFE FLOOR MARKING TAPE LOW DUTY
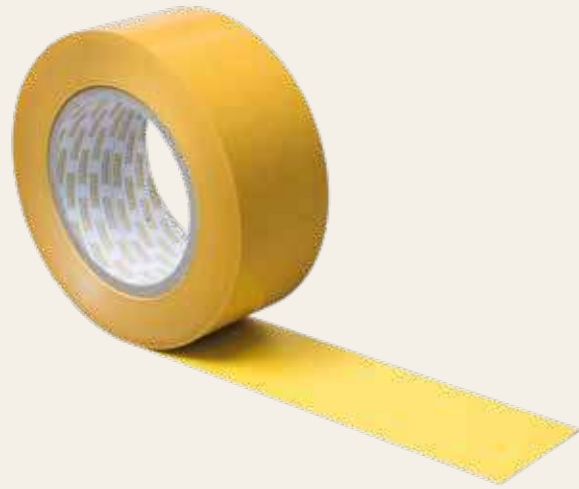

Indicate potential danger zones!
Show your employees the way: with our LongLife LD PVC tape! This has been specially developed to demarcate dangerous zones and warn of unsafe areas. It is intended for temporary use and is perfect for areas where the floor is subject to little strain. The tape is firm and resistant to simple abrasion. It also adapts to a wide variety of materials and surfaces – including concrete, MMA coatings and tiles. The LongLife LD can be used for both indoor and protected outdoor areas. Create clear structures for more safety!

- Suitable for smooth floors
- For indoor and protected outdoor areas
- Resistance to abrasion, decomposition and moisture
- Firm texture
- Adapts to surfaces
- Creates security

LONGLIFE FLOOR MARKING TAPE FTS
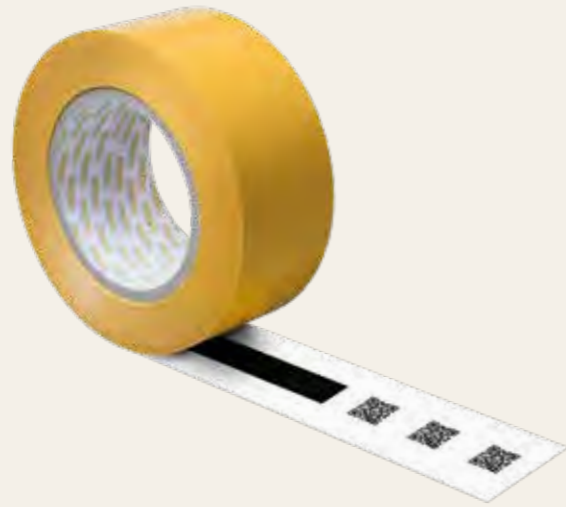

Optical guidance for automated guided vehicles (AGVs)

Always on the right track: With our self-adhesive tape your driverless transport systems are guaranteed to find the right way. Stick a variety of route elements onto smooth indoor floors: lines, curves, forks and even crossings are possible. The surface of the marking tape is particularly resistant to wear and tear, so that the guidance system continues to function perfectly even after a long period of use.
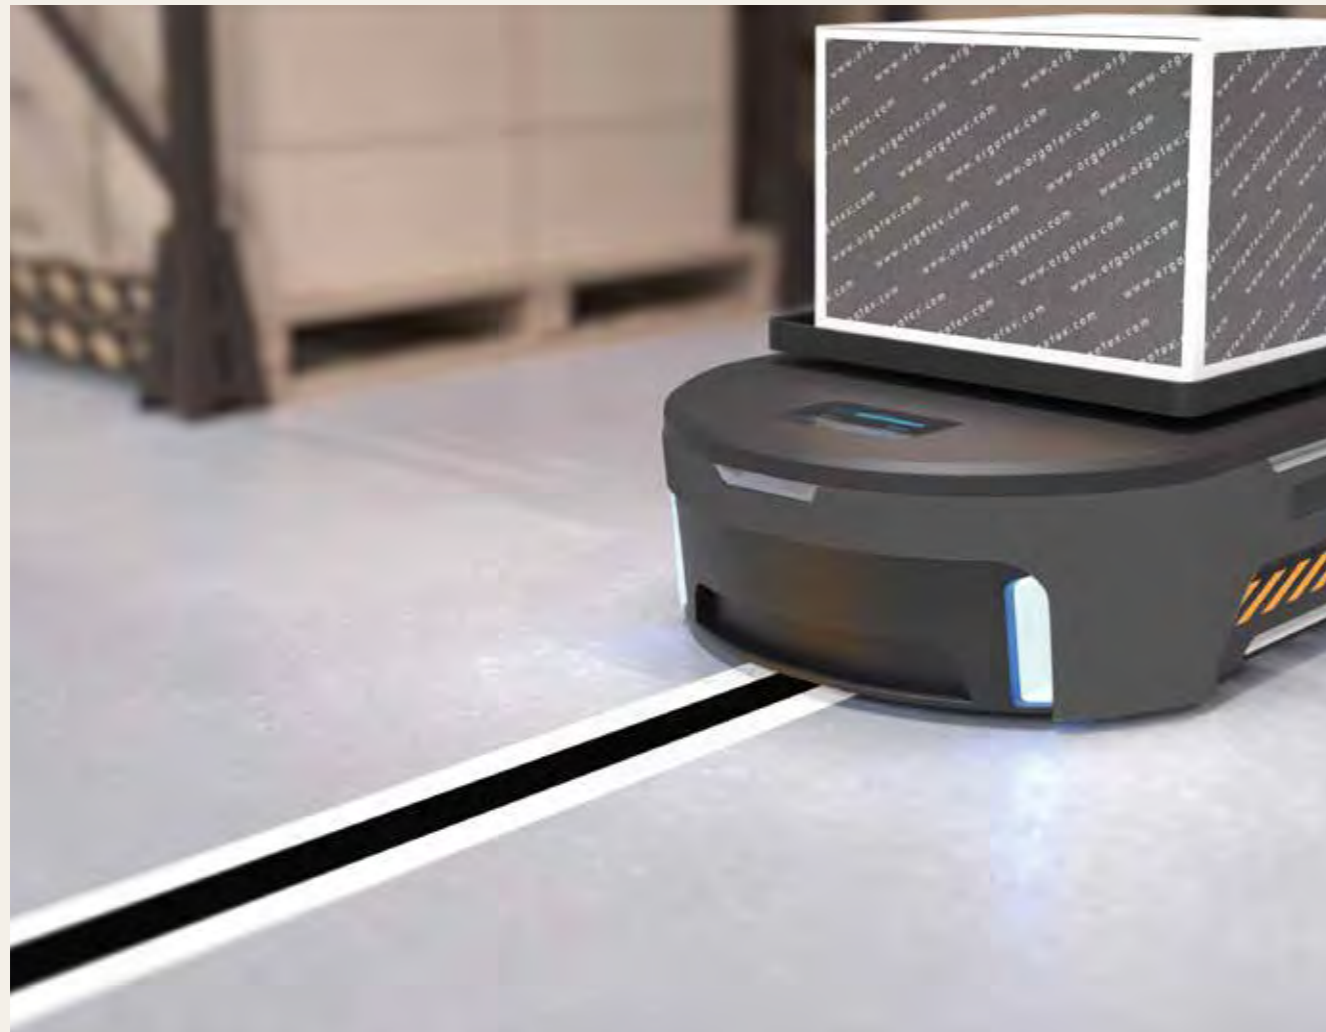

LONGLIFE FLOOR MARKING TAPE FTS

Plan your route using the following elements:

Straight (roll goods) | Curve | Y-switch (left/right) | V-switch | W- Switch | Crossing
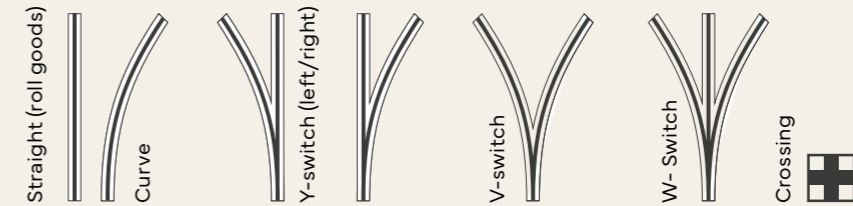

Extra tip: Whether it is special elements, the choice of colours or integrated QR and barcodes – we are also happy to produce the routes individually according to your wishes.

- Glue networks individually
- Little wear and tear with high loads
- Excellent traction
- Special elements possible, e.g. QR codes

We manufacture markings according to your specifications and requirements. Let us know!
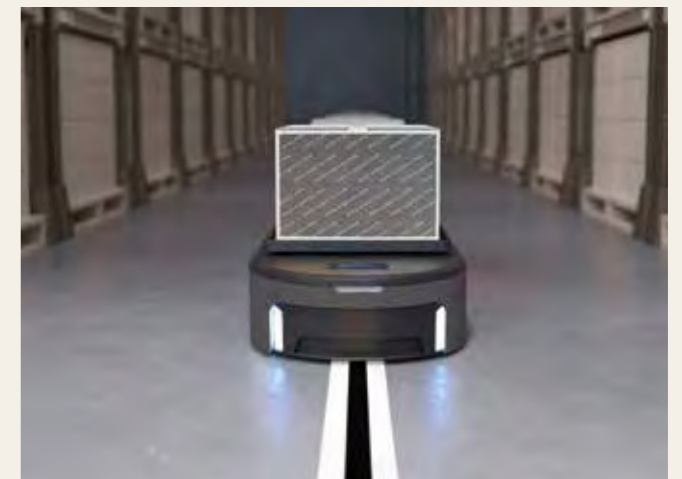

LONGLIFE FLOOR MARKING TAPE GRIP

Durable floor marking

Save yourself the effort of marking floors with real paint! With the LongLife-Grip with anti-slip effect, you can create hard-wearing floor markings easily and quickly. The non-slip and retroreflective surface is suitable for indoor areas and sticks quickly. The extra-strong tape also adheres to surfaces such as concrete, tiles and asphalt. Thanks to its permanent adhesion, it can also be driven over, making it a safe solution for use in your storage area. Mark cleverly and immediately!

- Suitable for smooth and textured floors
- For indoor areas
- Hardwearing and self-adhesive
- Non-slip and retroreflective
- Simple bonding
- Wear resistant
- Suitable for various surfaces
- Immediately accessible

LONGLIFE FLOOR MARKING TAPE HEAVY DUTY

Strong hold for high loads

Long-lasting, even on heavily used surfaces: LongLife HD is our marking tape with a high adhesive strength that can withstand even very heavy loads. Do you want to apply markings where, for example, load carriers or industrial trucks drive across the taped surfaces with heavy weights at high frequency? Then LongLife HD is the right product for you! Extra clever: the milled edge of the tape ensures that even transverse loads, e.g. from forklift trucks, are absorbed particularly well.

- Lasts a long time on heavily used surfaces
- High adhesive strength, low abrasion
- Milled edge against lateral forces

LONGLIFE FLOOR MARKING TAPE OUTDOOR

The best solution for outdoors

LongLife Outdoor is a floor marking tape for outdoor use. Its high material strength and strong synthetic rubber adhesive ensure durability under demanding conditions. The tactile surface offers good grip even when wet. Due to the nature of the adhesive, the tape can be used on both rough and uneven surfaces.

The product is used to mark driveways and footpaths, e.g. in loading areas or outdoor warehouses, as well as for marking potential danger points on loading ramps, such as the edge of the ramp. To increase the adhesive strength, we recommend combining it with LongLife Primer. Indoor applications on uneven surfaces are also possible.

- Non-slip and non-slip surface, even in wet conditions
- Suitable for rough and uneven surfaces
- High adhesive strength, extremely wear-resistant
- For outdoor use in conjunction with the LongLife Primer

eOX-SPOT

**Modern LED tool for a
safe working environment**
Stop dangerous situations using the Light projector for warning signals: The eOX spotlight with integrated power supply unit can not only be fitted with standard safety and warning signals, it can also be used in a variety of ways with customised motifs. Regardless of the nature of the ground, the swivelling projector with an efficiency of 27 or 56 lm/W projects the required sign onto the desired spot. This avoids hazards such as tripping or abrasion.

Revive your marketing activities!
In addition to its function as an indispensable security tool, you can also use the powerful projector (40 or 80 W) for eye-catching marketing. Your company logo, for example, will be a real eye-catcher!

Advantages at a glance:
- Simple assembly
- High-power LED with 40 W | 80 W
- Easily interchangeable motifs
- Versatile use
- Integrated power supply unit for 230 V
- High energy efficiency
- No wear and tear

SET FOR PARKING SPACE MARKING
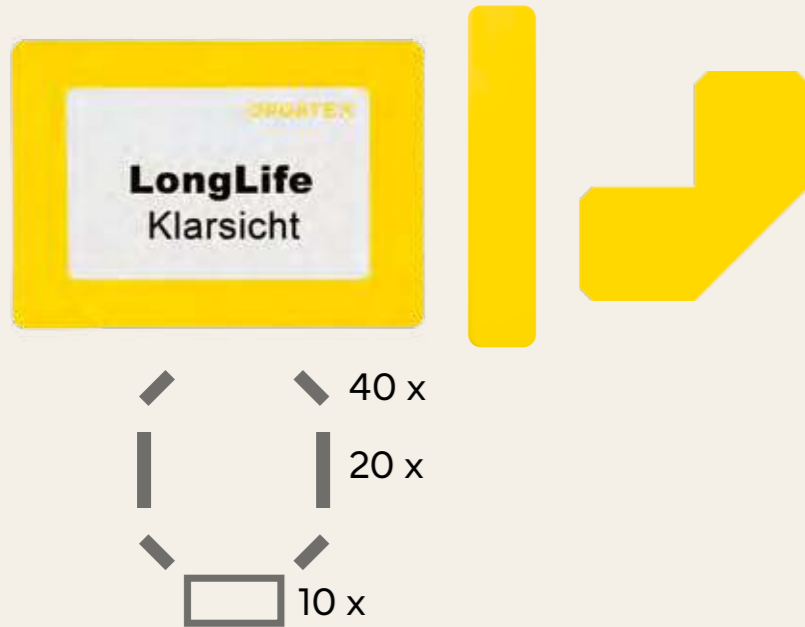

The labelling of storage locations is crucial for structuring the internal flow of goods and warehousing. Avoid long search times and enable your employees to precisely allocate materials to the appropriate storage locations. We have put together the most important components for you in a set, combining our top sellers.

40 x

20 x

10 x

The L–brackets and longitudinal markings in 50 mm width and the transparent windows in A4 format enable clear labelling of the pallet storage space. The set is designed for 10 storage spaces. Transparent fixing points also make it easier to attach the window. The document on the floor does not slip.

- Simplified ordering process
- Fixing points for the slip
- Common 5S colours
- Other widths and DIN formats on request
- With fixing points for easy application

LONGLIFE REMOVER/CLEANER/ PRIMER/EDGE SEALER

LongLife Remover: When removing old floor markings, adhesive residues often remain on the floor. LongLife Remover is ideal for removing this residue.

LongLife Cleaner: Before applying the floor markings, make sure that the floor is free of dust and oil. We recommend our LongLife Cleaner for precleaning the floors.

LongLife Primer: Primer to increase the adhesive strength on critical surfaces. Always necessary in outdoor areas.

LongLife edge sealing: Sealing prevents the penetration of moisture, e.g. in outdoor areas. 140 ml is sufficient for approx. 10 - 15 m.

LongLife Remover/Cleaner/Primer/edge sealing

Designation	Order no.	VE	
LongLife Remover	LG-REMOVER/6	6 x 1 l	
LongLife Cleaner	LG-CLEANER/6	6 x 1 l	
LongLife Primer	LG-PRIMER	1 l	
LongLife edge sealing	LG-VERSIEGELUNG	140 ml	

LONGLIFE TRIMMING SYSTEM

Useful tool for cutting ORGATEX® floor markings to length easily and safely. The cut is made in the folded stainless-steel sheet, no slipping due to the good clamping effect.

- Angle: 90°
- Angle: 45°, on both sides
- Finish: Stainless steel
- Suitable for all widths: 50/75/100 mm

LongLife Trimming system		
Format (WxL)	**Order no.**	
120 x 250 mm	LG-TS100	

LONGLIFE PRESSURE ROLLER

The pressure roller ensures even pressure distribution and is therefore the ideal support when laying markings and signs. The pressing on of anti-slip products and bonding to profiled substrates in particular is simplified.

- Rubber roller
- Roller width: 75 mm
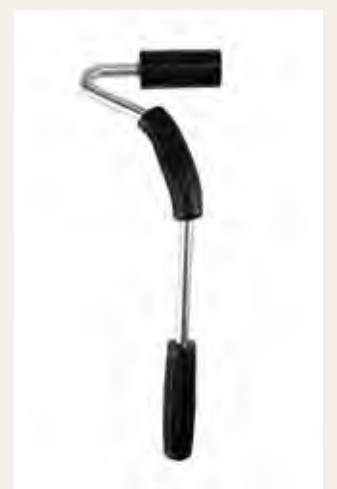

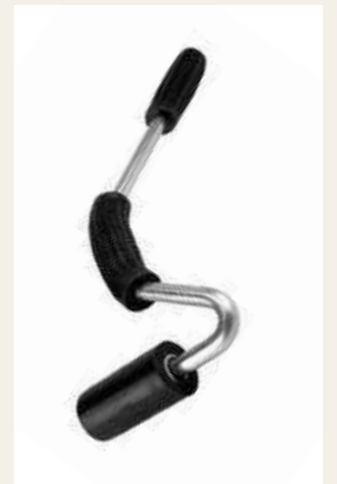

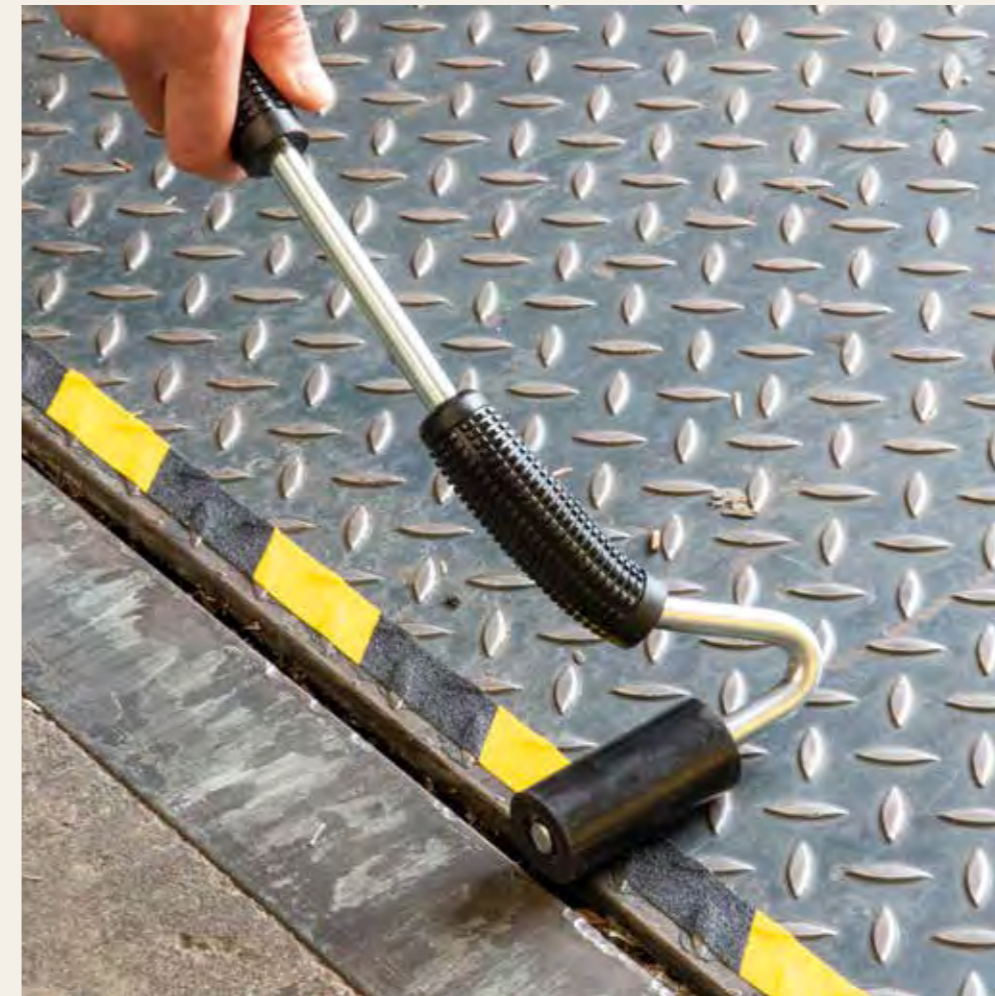

LongLife Pressure roller		
Designation	**Roller width**	**Order no.**
Pressure roller	75 mm	LG-ANDRUCKROLLER

INSER TION SYS TEMS

katalog.orgatex.com/ plug-in systems
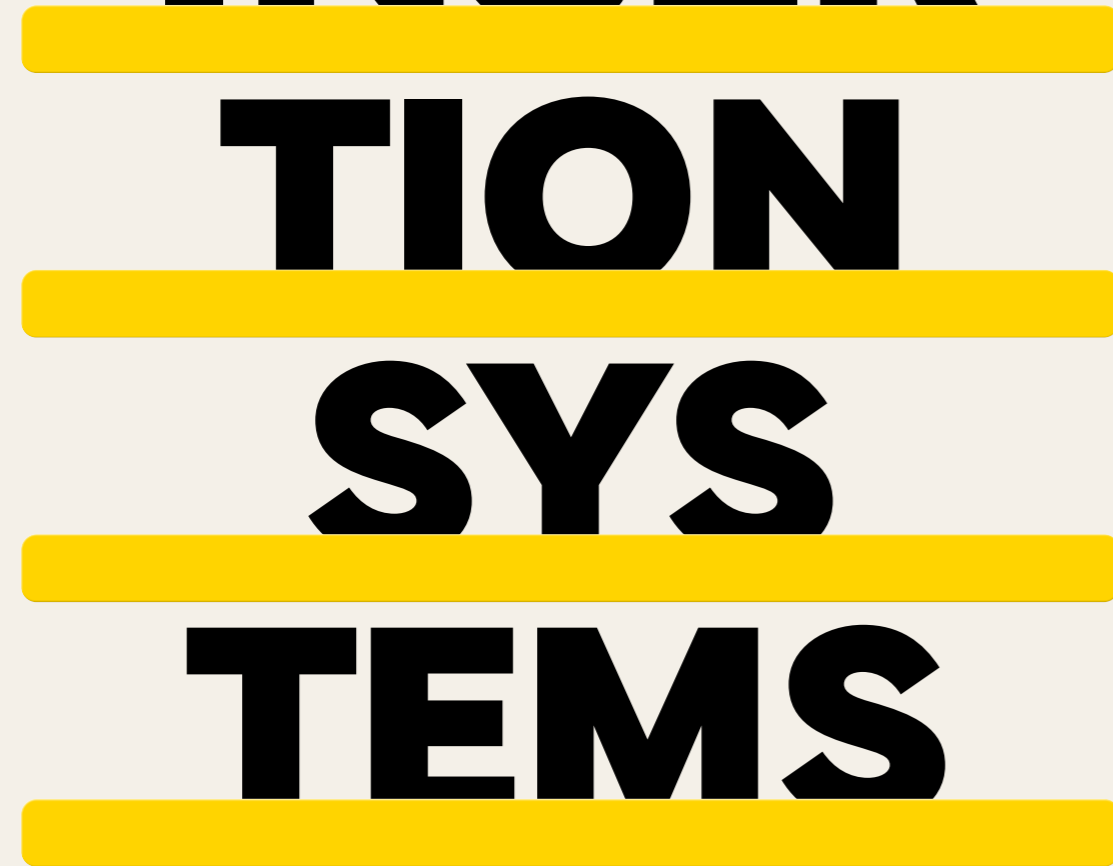

KANBAN is a method for optimising production processes that has become an integral part of modern, lean logistics. It is based on the pull principle, whereby materials are produced or delivered to production according to demand. In practice, this is implemented with the help of KANBAN boards, which work according to the traffic light principle.

KANBAN cards from emptied containers are sorted by part number and inserted into the KANBAN board. If the yellow area is reached, the person responsible can decide whether to restock.

When the red zone is reached, production or replenishment must be carried out immediately. ORGATEX® provides you with all the tools you need for production control via KANBAN. Our portfolio includes all individual elements with a comprehensive range of accessories for your specific requirements as well as KANBAN starter sets in various sizes and designs, which you can use to get started straight away.

Of course, we can also manufacture customised KANBAN or lot-size KANBAN boards for you that are precisely tailored to the needs of your business.

Another method in the context of lean production is Heijunka (Japanese term for „levelling" or „smoothing"). A Heijunka board makes it possible to organise production more evenly and to respond to fluctuations or special features in demand. At ORGATEX® we create these organisation systems individually and tailored to your needs.

INFOGRAPHIC INSERTION SYSTEMS
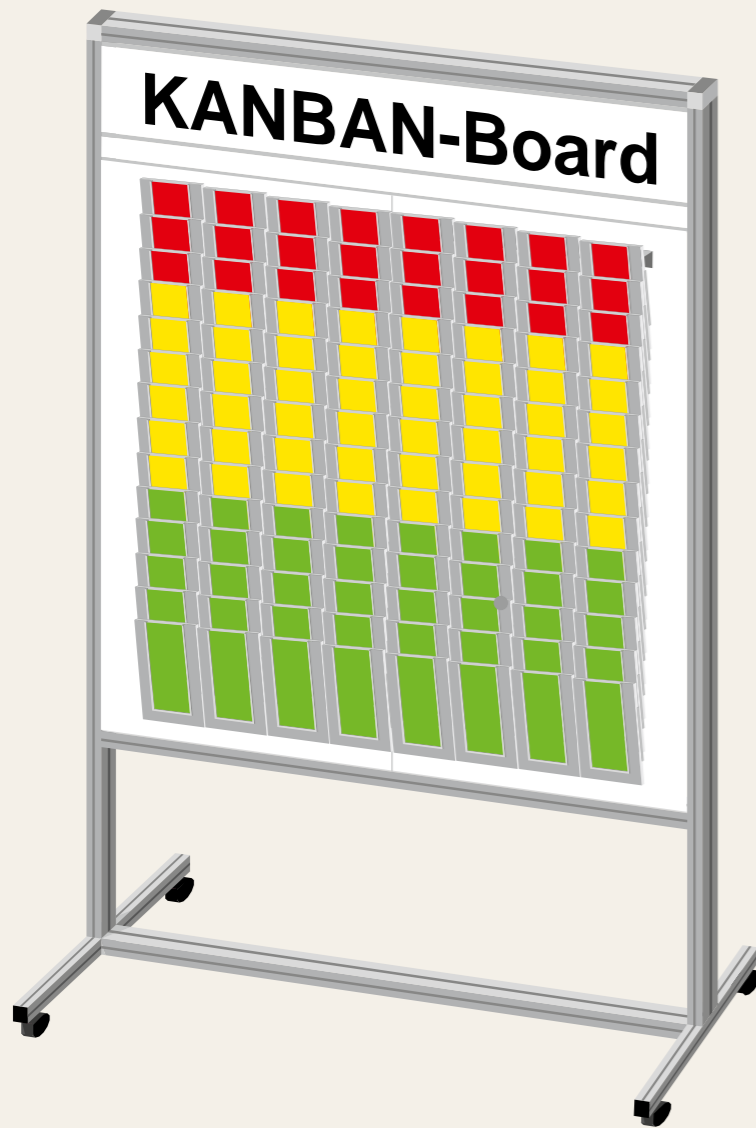

KANBAN-Board

Traffic light KANBAN
board (with system boxes)

Cardplan boards
Consisting of insertion slots arranged in rows.
The insertion slots are designed so that both indivi-
dual documents and small stacks of documents
(up to 2 mm thickness) are securely fixed. The
boards can be combined or extended to any width.

Customised solutions
Creation according to your
individual requirements

**Primus viewing
compartment systems**
Assemble to the required height
and width. Extend or regroup, e.g.
form rows of compartments, hang
individual compartments, etc.
For extensions, simply pull out
the end panel and attach further
extension elements or arrange
them in any desired position.
All elements can be regrouped,
extended or subdivided verti-
cally or horizontally at any time.

Heijunka–Board
Using a Heijunka board, the pro-
duced quantity can be brought
into a sequence or a tine grid and
thus levelled. Each ORGATEX®
Heijunka board is created
according to your individual
specifications. The height, width
and individual elements are
precisely tailored to you and
your production requirements.

LOT-SIZE-KANBAN

HEIJUNKA-BOARD

The lot-size KANBAN board enables controlling materials according to the pull principle. Previously defined quantities are replenished according to type, which leads to a reduction in material stocks and a smoothing of production processes. ORGATEX® control boards are customised and adapted to the customer's requirements.

Fluctuations in demand, for example, lead to ever-increasing order peaks in the processes of the upstream work stages. With the help of the Heijunka board, the customer or internal production orders are produced in a defined (e.g. setup-optimised) sequence and these fluctuations are levelled out and smoothed. This is very often the basis for a stable process.
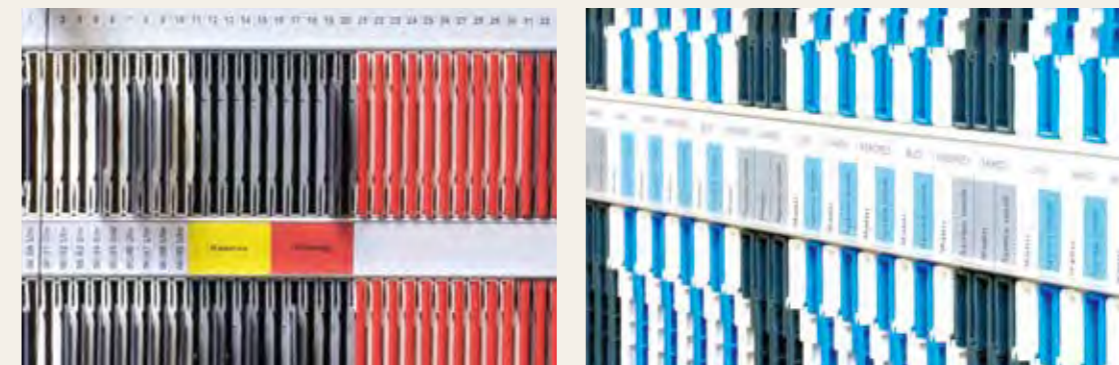

KANBAN-STARTERSET

Our KANBAN starter sets are the result of our many years of experience and represent the most common applications in the industry. They are available in 3 sizes, matched to part numbers and control circuits. You can get started straight away with our starter set. The version with stand on castors is suitable for mobile use, while the wall-mounted version is suitable for stationary use.

CARDPLAN® BOARDS

The base of the Cardplan® Boards is made of sturdy, torsion-free metal. Insertion slots made of light grey, hard-wearing plastic are attached one below the other. The insertion slots are designed so that both individual documents and small stacks of documents (up to a maximum thickness of 2 mm) are securely fixed and can be inserted or removed with a single movement. The frameless panels (except A4 horizontal and A4 vertical) can be combined to any width or extended later. The boards are compatible with our greyboards.

TRANSPARENT PANELS

The transparent panel system is the practical and flexible information carrier for all workstations that require clearly organised information. Price lists, tables, drawings, instructions, illustrations or other information can be inserted into the crystal-clear, transparent display boards in A4 portrait format. Texts can simply be inserted and hung onto the various mounting elements. For example, they can be placed on tables or attached to walls, shelves and tables very simply. The highlight: the elements for wall mounting are now also available in a magnetic version. So information can be quickly and securely attached and removed from all ferrous surfaces without any assembly work.

PRIMUS VISUAL COMPARTMENT SYSTEMS

Whether in the warehouse, workshop, factory or office: Our Primus display compartment systems are suitable for all requirements!

You can create any desired height and width. You can extend or regroup at any tine, e.g. form rows of compartments, hang up individual compartments. For extensions, simply pull out the end panel and attach further extension elements or arrange them in any desired position.

All elements can be regrouped, extended or subdivided vertically or horizontally at any tine. The individual columns can be stabilised at the bottom edge using the additional bracket.

It's that simple:
Attach wall brackets, hang the required number of shelves one below the other, close the last shelf with a front panel – and the row is complete.

And if you want to expand?
Either pull out the front panel and attach additional viewing compartments or place them anywhere in between.

1 Wall mounting
2 Visible compartment element
3 Front panel

HANGING FRAMES & SIGNS

People are visually orientated and take in 80% of all information with their eyes. This makes visualisation tools at the workplace even more important, for example to mark storage and storage locations or to communicate important information in a clearly visible way.

katalog.orgatex.com/ poster frame-schilder

ORGATEX® hanging frames are a versatile visualisation tool. They are lighter than conventional frames and are highly resistant thanks to their robust plastic frame. They can therefore also be used in demanding industrial areas. In addition, the non-reflective PVC protective cover can be read by all commercially available scanners. ORGATEX® hanging frames are available in all standard DIN formats and in 8 different colours. They can be used on both sides and in both horizontal and vertical format. With our extensive range of accessories, the frames can be connected or attached, detached and clipped on.

You can attach them in a variety of ways, including to walls and ceilings, containers, crates and/or pallet cages – depending on your individual requirements. This means you are extremely flexible with our hanging frames, as mounting and changing information is quick and easy. Thanks to the patented locking clip, they offer a secure hold.

In addition to the extensive range of hanging frames, ORGATEX® also offers you a complete set for 5S hanging, which facilitates compliance with the 5S method, as well as aluminium snap frames for the secure mounting of signs in DIN format. .

VISUAL BOARDS

The quick and uncomplicated provision of information and key figures at central points in the company is an important part of a smooth operating process. Visual boards are the ideal tool for this, as they provide a clear overview of important information at all times. Whether for displaying target and actual statuses, quality indicators or machine running times – visual boards can fulfil a wide variety of functions.

katalog.orgatex.com/
visual-boards

Different board versions are available depending on the area of application: Our wall boards are suitable for permanent use and can be easily attached near machines, for example. Our mobile stand-alone boards, which can also be fitted with shelves or file holders, offer maximum flexibility. Rotatable cubes in central locations allow meetings and team discussions to run more smoothly. Due to their shape, they are also easy to use in places where space is limited. Stops are a clear signpost and stopping point for your milk run. Our entire visual board portfolio is also available as a whiteboard version for labelling with board markers. A visual board is as individual as the company in which it is used. We design the boards with your company logo and customise them with lettering according to your specifications. We also print customised whiteboards with matrices or tables for you. And if you are looking for a completely customised solution: Our specialist department will design and produce your customised board for you.

INFOGRAPHIC VISUAL BOARDS

Customised headline design (logo and text)

SHOPFLOOR MANAGEMENT

LEAN FACTORY CORNER

LEAN FACTORY CORNER

LEAN FACTORY CORNER

Available in whiteboard version for easy writing with board markers

Provision of key figures and information at a central point

Cube
Our cubes are manufactured from folded sheet metal. The height is set at 2204 mm, the width varies up to 1050 mm as required. Almost limitless combinations are possible. The upper section can also be ordered as a rotatable version.

Cube   Cube

Inscribable
In whiteboard quality available and can be labelled with a board marker

Media integration
You can integrate all media into our system (aluminium profiles).

Customised specific solutions

Extensive range of accessories

Stand-alone board
Our stand-alone boards have a standard height of 2170 mm. The board widths allow for customised assembly of the stand-alone board in width. Stand-alone boards can be used flexibly in various locations thanks to a roller stand.

Wandboard

Wall board
The panel widths allow the wall board to be customised in width, only the height is fixed (1444 mm). Wall boards are used wherever mounting options are possible on site, e.g. on walls, machine housings and other permanently installed surfaces.

Production with in-house solutions according to your specifications

Provision of key figures and information

Tailored to the needs of your production

INDIVIDUAL

Design, customised sizes and printing: we design visual boards with in-house solutions entirely according to your specifications. In terms of design, you have the option of adapting the design and size of standard products to your requirements or designing a customised board with our specialist department.

PRINTED BOARDS

Structured whiteboards are the basis of every successful shop floor meeting. We offer a diverse selection of whiteboards with different layouts that have been specially developed by experts for your lean management needs. You can either use proven templates or choose customised layouts according to your preferences. Discover the ideal solution for efficiently organising and visualising your shop floor processes. You will also find useful accessories for structuring the boards in the „document holders" and „insertion systems" sections. We use the UV printing process to print on a 0.9 mm thick magnetic sheet, which is characterised by its high quality and scratch resistance. The film can also be used to upgrade existing boards.

INFO BOARD

TOPIC MEMORY

The info board is the central point for regular communication with shop floor employees. Important general information and ongoing projects can be visualised here in a structured manner. However, the overarching and specific key figures that are used to control your operation are of central importance for shop floor management. All employees can thus be actively integrated into your improvement process.

- With magnetic foil, info board layout, scratch resistant and dry-wipeable
- Dimensions (approx.): 1444 mm x 2460 mm x 30 mm (H x W x D)
- Design: Frame made of R-aluminium profiles (30 x 30 mm); 1244 mm x 2400 mm usable area (white edged sheet)

The topic memory makes the change process palpable and tangible for employees. Problems, challenges and other ideas that are relevant to the working environment can be recorded by employees on topic cards and, with the support of managers, can be recognisably implemented. By categorising the topic cards from „Open" to „In progress" to „Completed", employees can see that concerns are being taken seriously and implemented.

- Visual board with magnetic foil, themed memory layout, scratch resistant and dry-wipeable
- Dimensions (approx.): 1444 mm x 1060 mm x 30 mm (H x W x D)
- Design: Frame made of R-aluminium profiles (30 x 30 mm); 1244 mm x 1000 mm usable area (white edged sheet)

PRODUCTION MEETING

The aim of an agile production team is to have an early morning/production phase meeting to make decisions. The events of the last 24 hours and the preview for the next 24 hours are discussed. Key figures over the course of the month as well as daily key figures for the current and previous week provide support. We also recommend the direct allocation and documentation of necessary measures for each system on magnetic strips.

SCRUM-BOARD

Discover the advantages of the agile project management method SCRUM. Organise your work efficiently, improve team collaboration and increase productivity. With our wall board, you always have an overview of your projects and can lead them to success step by step. Experience a new way of working and be inspired by the flexibility and effectiveness that SCRUM offers you.

- With magnetic foil, SCRUM board layout, scratchresistant and dry-wipeable
- Dimensions (approx.): 1444 mm x 2060 mm x 30 mm (H x W x D)
- Design: Frame made of R-aluminium profiles (30 x 30 mm); 1244 mm x 2000 mm usable area (white edged sheet)
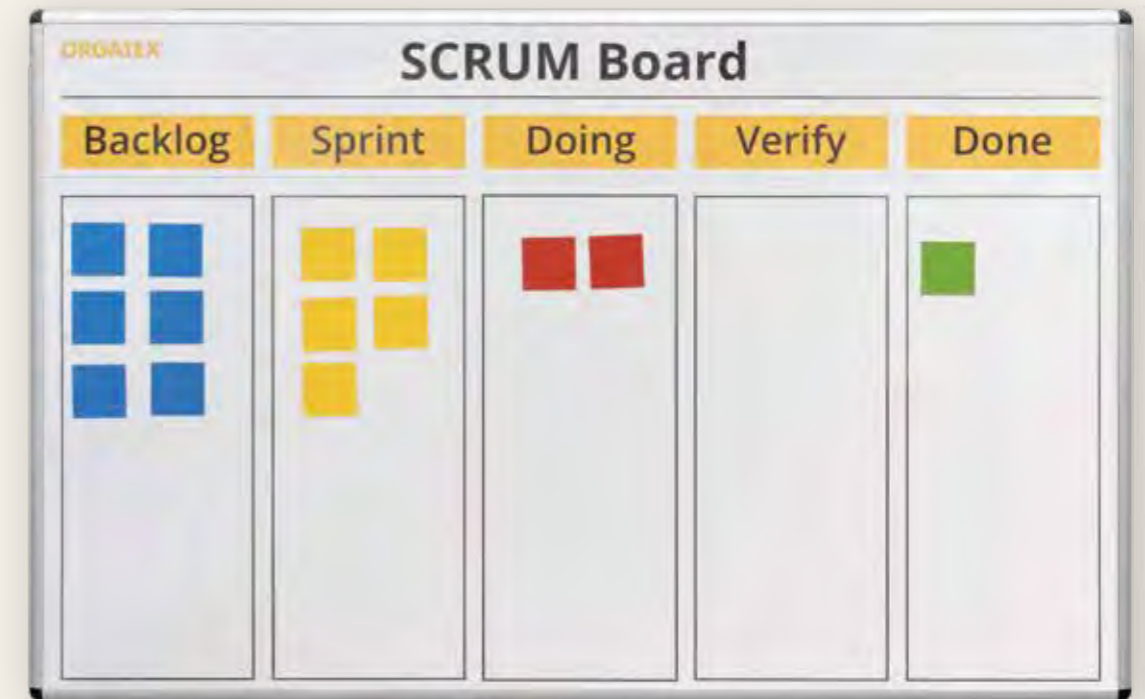

Accessories not included. Please contact our service team.

IMPROVEMENT CIRCLE

Problems should not be solved at the symptom level, but at the root – the core reason. Our improvement circle board is ideal for efficient and structured problem solving. The procedure is based on the familiar and established DMAIC structure and helps employees to develop sustainable solutions.

- With magnetic foil, improvement circle layout, scratch resistant and dry-wipeable
- Dimensions (approx.): 1444 mm x 2060 mm x 30 mm (H x W x D)
- Version: Frame made of R-aluminium profiles (30 x 30 mm); 1244 mm x 2000 mm usable area (white edged sheet)

Accessories not included. Please contact our service team.

MACHINE BOARD

What is the current machine performance? What is preventing us from increasing performance or reducing downtimes? Using the machine board, an instrument is provided on the shop floor for each system that makes system-related key figures transparent and is also a medium for cross-shift communication. What has happened in the current shift? What measures have been introduced or still need to be introduced?

- With magnetic foil, machine board layout, scratch resistant and dry-wipeable
- Dimensions (approx.): 1244 mm x 1260 mm x 30 mm (H x W x D)
- Version: Frame made of R-aluminium profiles (30 x 30 mm); 1244 mm x 1260 mm usable area (white edged sheet)

Accessories not included. Please contact our service team.

WALL BOARD

The wall boards have a standard height of 1444 mm. This height contains:

- Heading   100 mm
- Heading   40 mm
- Whiteboard   1244 mm

- Incl. customised headline
- Whiteboard quality
- Inscribable with a board marker

Customise the width and headings of your wall board according to your individual requirements.
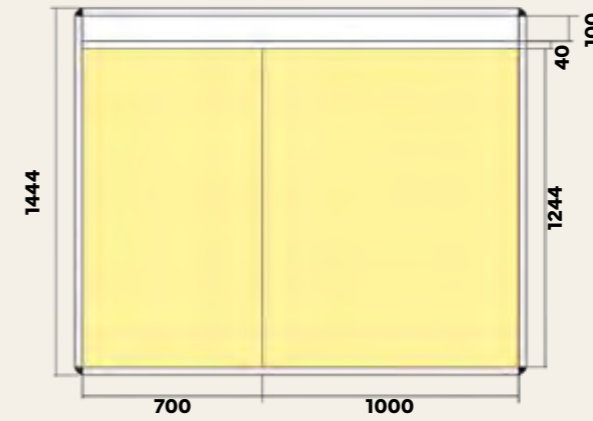

Wall board		
Dimensions (WxH)	**Order no.**	
1060 x 1444 mm	VB-WA-1000-W	
1560 x 1444 mm	VB-WA-1500-W	
1760 x 1444 mm	VB-WA-1700-W	
2060 x 1444 mm	VB-WA-2000-W	

STAND-ALONE BOARD

The stand-alone boards have a standard height of 2140 mm.
This height contains:

- Heading   100 mm
- Heading   40 mm
- Whiteboard   1244 mm

- Incl. customised headline
- Whiteboard quality (double-sided)
- Inscribable with a board marker
- With single-sided shelf (double-sided on request)

Customise the width and headings of your stand-alone board according to your individual requirements.
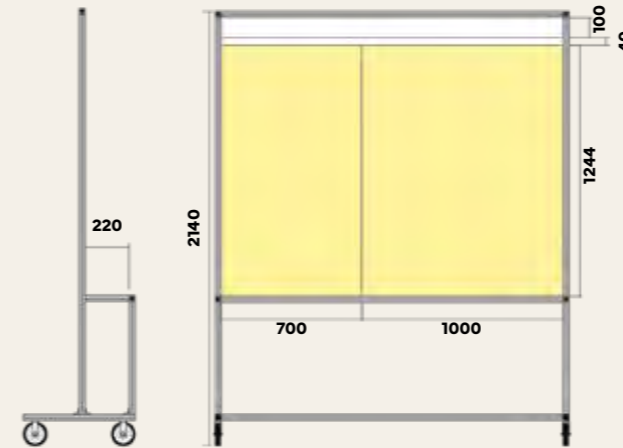

Stand-Alone Board

Neutral	VB-HMS-04	Ø 36 mm	Yellow	10 pcs.	
Smiling	VB-HMS-05	Ø 36 mm	Green	10 pcs.	

Smileys printed on plastic-coated magnets. High adhesive force and a good symbolic effect.
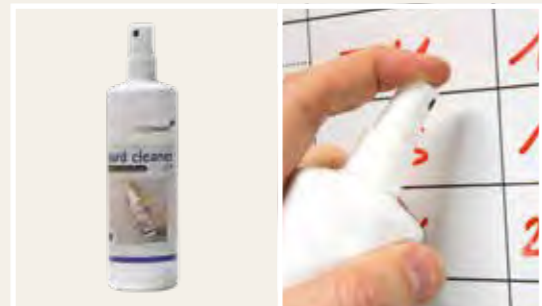

Board Cleaner

Order no.	
VB-WR	

- Cleaning spray for whiteboards
- Quick drying
- For removing dried-on residues
- Without propellant
- Contents of bottle: 250 ml

Board marker

Order no.	Pack	
VB-WS4	4 pcs.	

- Easy to wipe off all whiteboard surfaces
- For whiteboards and flipcharts
- Case with 4 pre-sorted colours: black, red, blue and green
- Neatly refillable

Holder for board marker, magnetic

Order no.	
VB-SH4-MA	

- For all magnetic whiteboards
- Magnetic
- Capacity for up to 4 board markers

Board Assistant, magnetic

Designation	Order no.	Pack	
Board Assistant	VB-BA-MA	1 pc.	
Wiper refill pack	VB-LP	100 pcs.	

- For all magnetic whiteboards
- Magnetic storage box
- Capacity for up to 7 board markers
- Lid serves as a board wiper

File storage

Order no.	
VB-ZB002	

- For attaching to our aluminium profiles (visual boards)
- Suitable for filing folders
- Creates space, folders are immediately to hand

Whiteboard printing

We print customised whiteboards in-house, z. e.g. with a matrix or tables. Protected behind a coating, these are also protected against daily labelling/wiping or board-cleaning liquids.

DOCU MENT HOLDER

katalog.orgatex.com/ dokumentenhalter

Be it work instructions, machine running times, tugger train schedules or maintenance and inspection logs – all documents that are important for operation must be displayed securely and transparently. Depending on the business and area of application, external influences such as dust, high humidity or oily air must be taken into account and the documents must be protected.

At ORGATEX® you will find a wide range of solutions for securely displaying your important documents with minimal effort and replacing them easily. Our document holders adhere to various surfaces, e.g. all smooth surfaces made of metal, glass or plastic. Our Magnetic Windows are available in various formats and colours. They have 3 magnetic and one self-adhesive side and can therefore be fixed permanently. The document windows can be written on so that, for example, machine running times can be noted without removing the document. In combination with our Magnetic Windows Headlines, they provide an overview of the processes. In addition to the magnetic windows, our portfolio also

includes the Multi Windows document holder, which adheres to smooth surfaces and can be used several times.

If several A4 pages are to be displayed in ring binder form, our FLIP-MAG programme with a special neodymium magnet is used. Lastly, the clipboard is an essential part of everyday business life and can also be ideally combined with the Magnetic Windows and placed on boards.

INFOGRAPHIC DOCUMENT HOLDER

3 sides magnetic,
1 side self-adhesive for
permanent fixing. Easy
replacement of documents.

Clear identification
through coloured frame

Inscribable with
non-permanent
felt-tip pens

FLIP-MAG
DIN A4 covers with filing margin and neodymium
magnets. Magnetic ring binder mechanism
with rubberised high-performance magnets
(prevents scratching of surfaces) for using
at e.g. workstations and wall boards.

Version of the document
holders in standar-
dised horizontal and
vertical format .

Common 5S colours

**Ongoing
development**

Multi Windows
Document holder for visual
boards. Adheres even to smooth
surfaces and can be used
several times (repositionable).

Clipboard
With additional rubber coating on the clamp,
provides an optimum hold for all types of documents.
The robust metal clamp has a high clamping
effect. Up to 60 sheets can be clamped.

Adheres to
almost all
surfaces

For flexible
or perma-
nent labelling

Documents are
protected from
dirt and weather
conditions

MAGNETIC WINDOWS

- Coloured document windows
- Simple replacement of documents
- Permanent fixation possible with adhesive strips
- Inscribable (with non-permanent felt-tip pens)
- Simple identification with coloured frames

MAGNETIC-WINDOWS-FRAMES

Document holder for direct labelling of documents, e.g. for recording machine running times or creating maintenance and inspection logs.

- Frame for documents to be labelled directly
- Simple replacement of documents
- Permanent fixation possible with adhesive strips
- Simple identification with coloured frames

ELEC TRO STATIC DIS CHARGE

katalog.orgatex.com/
esd

Do you work with electrostatically sensitive assemblies or components? In this case, we have developed special versions of our popular products that cannot become electrostatically charged. For example, we work with special PVC films that permanently dissipate any charges that arise. This ensures that none of your products are damaged or completely destroyed during your storage processes.

Did you know? This is what ESD means!
Electrostatic charges (electrostatic discharge) can be absorbed and released by the human body. These charges are generated by friction and the subsequent separation of two objects. A particularly strong charge can even cause visible sparks. A discharge that can be felt by humans is approx. 3000 volts, whereas 30 volts is sufficient to destroy an electrostatically sensitive component or an electrostatically sensitive assembly.

INFOGRAPHIC ESD-PRODUCTS

IDP-STAT® rigid PVC film
A specially developed IDP-STAT® PVC film (IDP = Inherently Dissipative Polymer) is used for the production of our articles in 0.25 mm and 0.7 mm thickness. The special PVC film enables permanent discharge capability.

Hanging hole for various mounting options

Common format sizes

LongLife floor marking
ORGATEX® floor marking (floor signs and floor marking tape) is ideal for labelling ESD work areas.

Common 5S colours

Slot perforation for all-round bracket

IDP-STAT® PVC rigid film

Ongoing development

System box ESD/ KANBAN letterbox ESD
Enables KANBAN control even in ESD-sensitive areas. The system boxes and letterboxes are made from a low-charging granulate (Irgastat P 18 FCA)

Dollies
The ESD castors used the Dollies are for which ensures the best performance and protection with high-quality ball bearings and hub caps.

Wide Product range

For working areas with electrostatic discharges

IDP-STAT® PVC-Folie
Meets the requirements of DIN EN 61340-5-1

VISUAL POCKETS ESD FOR ATTACHING

In many cases, there is no suitable surface on containers for labelling. This can be remedied with the hanging visual pocket. It consists of hard-wearing plastic, a reinforced top section and a transparent viewing window for documents. Thanks to our extensive range of accessories, labelling is possible on almost any surface.

- Permanently dissipative
- Made from Inherently Dissipative Polymer (IDP)
- Complies with the requirements of DIN EN 61340-5-1
- Film thickness: 0.25 mm
- Recyclable
- Scanner compatible
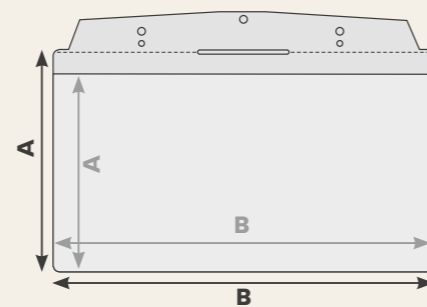

Available formats in mm, outer dimension/inner dimension

FASTENERS FOR VISUAL POCKETS ESD

All-round bracket (patented)

Order no.	Pack	
KTB3000	10 pieces	

The patented all-round bracket for quick insertion into our pockets with slot perforation in the top section. Designed for pallet cages and/or thick-walled containers up to 4 cm. Dimensions (WxH): 215 x 125 mm. The all-round bar **cannot be used** with:
- Pocket design with protective flap
- DIN A7, DIN A4 landscape

Special retaining bracket

Order no.	Pack	
MA2000	10 pieces	

Made of black coated spring steel wire with rounded ends. The special retaining bracket is pulled through the two outer suspension holes of the visual pocket. Thanks to the spring steel design, it sits firmly between rods or cardboard boxes, on wire pallet cages etc. This bracket can be slipped over, inserted and attached in between by turning. Dimensions (WxH): 320 x 100 mm.
Particularly suitable for DIN A4 landscape, cannot be used for DIN A6 landscape and DIN A5 portrait.
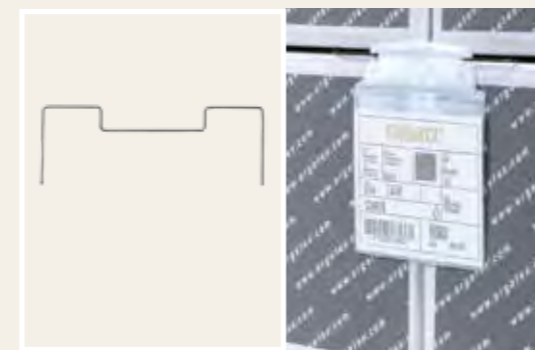

Mini special bracket

Order no.	Pack	
MA2080	10 pieces	

The mini special bracket made of spring steel wire was designed for fastening smaller pocket formats (DIN A6 horizontal, DIN A5 vertical). Secure hold on cardboard boxes, containers, pallet cages etc. This bracket can be slipped over, inserted and attached in between by turning. Dimensions (WxH): 230 x 80 mm.
Only suitable for DIN A6 landscape and DIN A5 portrait.

Container bracket

Order no.	Pack	
MA2090	10 pieces	

Made of black coated spring steel wire with rounded ends. This flexible attachment is particularly recommended for thick-walled containers with a wall thickness of up to 2 cm. Dimensions (WxHxD): 170 x 65 x 21 mm.
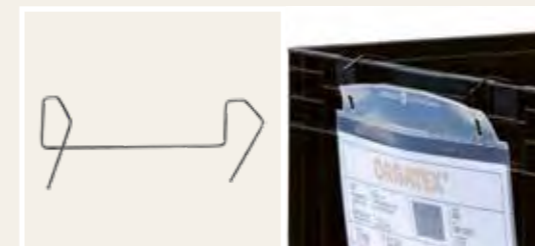

Container bracket

Order no.	Pack	
MA2100	10 pieces	

Made of black coated spring steel wire with rounded ends. This flexible attachment is particularly recommended for thick-walled containers with a wall thickness of up to 5 cm. Dimensions (WxHxD): 170 x 65 x 45 mm.

FIXTURES FOR VISUAL POCKETS ESD

U-clamps (patented)

Order no.	Pack	
MA2030	50 pieces	

For attaching pockets/sleeves to all types of pallet cages. The special bending enables easy removal.
Dimensions (WxH): 28 x 55 mm.

U-clamps

Order no.	Pack	
MA2020	50 pieces	

For piercing cardboard, film and other outer packaging and when using small pocket formats (DIN A7/DIN A6).
Dimensions (WxH): 15 x 38 mm.

Plastic spike

Order no.	Pack	
MA2060	50 pieces	

For piercing soft materials such as cardboard, film, plastic bags, textiles, etc. Length: 12 mm.
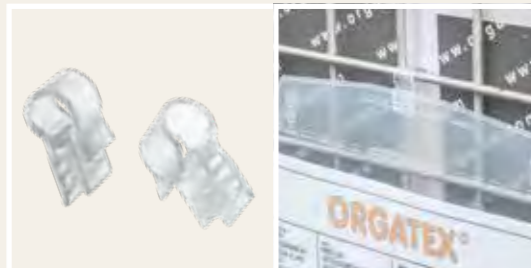

Gripper

Order no.	Pack	
KAN-GRIPPER	100 pieces	

For hanging on pallet cages, the bag clamps in the holder.

U-Gripper

Order no.	Pack	
KAN-U-GRIPPER	100 pieces	

For overhanging, e.g. on pallet cages, with 2 parallel hooks and wide pocket clip.

FIXTURES FOR VISUAL POCKETS ESD

Plastic binder

Order no.	Pack	
MA2050	50 pieces	

Plastic ties are highly recommended if the bags are to be permanently attached or, for example, attached to profiles, cables or similar. The special fastener allows multiple use. Length: 320 mm.

VST-Gripper

Order no.	Pack	
VST-GRIPPER	50 pieces	

The round tube label holder makes it easy to flexibly attach visible pockets or label holders to round tubes with a diameter of 28 - 30 mm. The grip points on the inside prevent slipping when fitting or removing the labelling.
The toothed mount provides a secure hold even in the event of vibration.

For the development of an ESD control programme and the establishment of ESD protection zones (Electrostatic Discharge Protected Area, EPA), it is recommended that the following international standards be used as a guide:

DIN EN 61340-5-1
Electrostatics - Part 5-1: Protection of electronic components against electrostatic phenomena - general requirements
(2008-07)

DIN EN 61340-5-1
Supplement 1
Electrostatics - Part 5-2: Protection of electronic components against electrostatic phenomena - user manual
(2009-09)

DIN EN 61340-5-3
NEW
Electrostatics - Part 5-3: Protection of electronic components against electrostatic phenomena - characteristics and requirements for the classification of packaging used for components sensitive to electrostatic discharge.
(2011-05)

IDP-STAT®-PVC-Film
- Permanently dissipative
- Made from Inherently Dissipative Polymer (IDP)
- Complies with the requirements of DIN EN 61340-5-1
- Colour: transparent
- Film thickness: 0.25 mm and 0.7 mm
- Recyclable

Product qualification according to DIN EN 61340-5-1 (2008-07):

	Test method	Limit values	Typical values
Surface resistance R_S	DIN EN 61340-2-3	$1 \times 10^5 \leq RS < 1 \times 10^{11}\,\Omega$	$10^9 – 10^{10}\,\Omega$
Ambient conditions: 12 ± 3 % relative humidity and 23 ± 2 °C (conditioning > 48 hours)			

VISUAL POCKETS ESD SUPER-MAGNETIC

The high-quality, super-magnetic ESD visual pockets are the ideal solution in the event of strong shocks or vibrations during transport. With 2 super-strong, welded-in neodymium magnets, this pocket has been specially developed for attaching to ferrous surfaces or curved and uneven surfaces. They are made of IDP-STAT® rigid PVC film with a reinforced head section.

- Permanently dissipative
- Made from Inherently Dissipative Polymer (IDP)
- Complies with the requirements of DIN EN 61340-5-1
- Film thickness: 0.25 mm
- Recyclable
- Scanner compatible

KANBAN-COVER ESD FOR OVERHANGING

The high-quality KANBAN cover made of IDP-STAT® rigid PVC film is ideal for labelling different load carriers in the ESD area. It can be used both for standard containers and as a customised solution.

- Permanently dissipative
- Made from Inherently Dissipative Polymer (IDP)
- Complies with the requirements of DIN EN 61340-5-1
- Colour: milky, transparent
- Film thickness: 0.7 mm
- Recyclable

Order no.	Format	Outer dimension (WxHxT) (mm)	Pack
KAN-COW1/4DIN-ESD	1/4 DIN	215 x 80 x 16	10 pieces

KAN-LABEL ESD

The ESD-KANBAN sleeves have been developed to fit KLT containers and Euroboxes perfectly. They are made of IDP-STAT® rigid PVC film and ensure a secure hold, even under load. Their size makes them ideal for use in ORGATEX® KANBAN boards.

- VDA standard 4902
- Permanently dissipative
- Made from Inherently Dissipative Polymer (IDP)
- Complies with the requirements of DIN EN 61340-5-1
- Colour: slightly milky, transparent
- Film thickness: 0.25 mm
- Recyclable
- Scanner compatible
- Closed on 3 sides, side insert

FLIP-MAG ESD

WORK DOCUMENT SLEEVE ESD TYPE PRIMUS

Due to the viewing window on the front and back the specially reinforced IDP-STAT® rigid PVC film can be used on both sides. It is suitable for use in ring binder mechanisms with special neodymium magnets for horizontal and vertical page turning. FLIP-MAG is designed for documents in DIN A4 format vertical or horizontal and ensures secure hold.

- Can be used on both sides
- Especially for use with the ring binder mechanism
- Permanently dissipative
- Made from Inherently Dissipative Polymer (IDP)
- Complies with the requirements of DIN EN 61340-5-1
- Colour: slightly milky, transparent
- Film thickness: 0.25 mm
- Recyclable
- Scanner compatible

Whether order documents or test reports. The ESD work document sleeve protects your documents from soiling.

- Permanently dissipative
- Made from Inherently Dissipative Polymer (IDP)
- Complies with the requirements of DIN EN 61340-5-1
- Colour: slightly milky, transparent
- Film thickness: back 0.7 mm, front 0.25 mm
- Side insert
- With welded-on business card pocket
- Recyclable
- Scanner compatible

FLIP-MAG ESD

Order no.	Format	Dimension inner/outer (W x H) (mm)	Pack	
FLIP-MAG-ESD-20	DIN A4	297 x 210/315 x 255	10 pieces

ATP660-ESD-20	DIN A4	215 x 305/240 x 316	10 pieces	

SYSTEMBOX ESD (LOW-CHARGING)

The ESD system box is used to hold KANBAN cards. The structure can be sloted or in a block, so it can be extended as required.

- Material: ABS
- Low-charging
- Use in ESD-KANBAN boards

ACCESSORIES SYSTEMBOX ESD
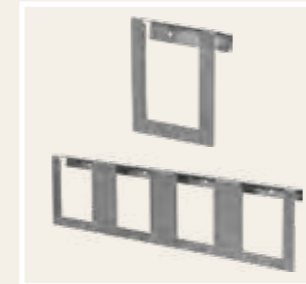

Bracket (stainless steel)

Order no.	Version	Format (WxH) (mm)
SYSB-WH-1	Bracket, single (stainless steel)	111 x 166
SYSB-WH-4	Bracket, 4-way (stainless steel)	486 x 166

- Equipped with holes for wall mounting or attachment to our greyboards
- The system boxes are stacked in columns of 1 or 4 on the wall bracket
- Incl. mounting material

Additional bracket (stainless steel)

Order no.
SYSB-WH-U

- The penultimate system box of a column can be fixed in place using the additional bracket

Adjustable base for system box

Order no.	Pack
SYSB-FH	50 pieces

- Adjustable in 5 mm increments
- System box can be adjusted to individual card size

Insert label, transparent, small

Order no.	Matching cardboard insert	Pack

Order no.	Dimension inner/outer (W x H) (mm)	Pack
SYSB-ESD-06	118 x 190 x 6/122 x 192 x 10	10 pieces

KANBAN LETTERBOX ESD (LOW-CHARGING)

KANBAN letterbox supports the use of KANBAN cards and has a high filling capacity.

- High filling capacity (35 mm)
- Sufficient for up to 40 KANBAN cards
- For KANBAN cards according to VDA standard 4902
- Material: ABS
- Low-charging
- Wall mounting with 2 screws (not included)

FLOOR MARKING SIGN „ESD"

ORGATEX® floor markings (signs) are ideal for labelling ESD work areas. Thanks to the newly developed plastic surface, the floor markings are slip-resistant, extremely hard-wearing, and wear-resistant.

- Made from PVC
- Full-surface self-adhesive backing
- Increases occupational safety
- Simple attachment
- Excellent adhesion
- High slip resistance (non-slip)
- Trafficable
- High warning and information effect

KANBAN letterbox ESD (low-charging)			
Order no.	Outer DImension (WxHxD) (mm)	Pack

LONGLIFE FLOOR MARKING TAPE „ESD"

DOLLIES ESD 600 X 400 MM

ORGATEX® floor markings are ideal for labelling ESD work areas. Due to the newly developed plastic surface, the floor markings are extremely hard-wearing and wear resistant.

- Simple attachment
- Forklift proof and scratch resistant
- High abrasion resistance
- Excellent adhesion
- Reference to ESD areas

The solution along the logistics chain.
From the delivery of goods to dispatch.

- Compatible with Euro-size containers
- Suitable for tugger trains (drawbar depending on model)
- Extremely true to track
- Stackable
- With Easy-Lock system
- Manufactured in accordance with DIN ISO 9001/14001
- Suitable for transport on an adapter pallet

katalog.orgatex.com/ materialtransport

In order to save costs and remain competitive, in-house material supply must be organised as efficiently as possible. Tugger trains are becoming increasingly important due to the growing demand for flexible material supply. Containers of different sizes must be able to be transported at the same time to ensure that materials are available on demand. ORGATEX® offers you the optimum aids for this: floor rollers, shelf wagons, taxi wagons and adapter pallets.

Due to their size and flexibility, ORGATEX® dollies made of galvanised steel can be used in a much more space-saving manner than pallets and can also be replaced more quickly. They are available in various sizes, with different types of castors, both with and without a drawbar and also as pallet dollies – depending on your requirements. Our portfolio is rounded off by the adapter pallet, which has been specially developed for holding, storing and transporting dollies.

Our shelf wagon suitable for tugger trains has a frame with perforations, which makes it possible to allows the shelves to be adjusted or removed as required. Our taxi wagon is particularly useful for longer distances. Thanks to it, no further aids such as forklift trucks or pallet trucks are required for handling between the logistics train and the assembly site.

Discover our solutions and ensure synchronised material supply, reduced traffic, lower inventories and high supply reliability in your company!

INFOGRAPHIC MATERIAL TRANSPORT

Containers of different sizes guarantee that the materials to be transported are provided exactly as required

Rolling logistics with dollies

For transporting and storing dollies

Dollies

Dollies have 2 or 4 swivel castors, are compatible with Euro-sized containers and suitable for tugger trains. They are extremely directionally stable. Suitable for transport on an adapter pallet.

Adapter pallet

For picking up, storing and transporting dollies. Dollies can be stored on the adapter pallet. Forklift trucks can pick up the adapter pallet crosswise or lengthwise from all 4 sides.

Pallet Dollies

Standard normed Euro pallet. Suitable for tugger trains, the drawbar on this dolly is completely retractable – this allows forklift trucks to pick up the pallet floor dolly from 3 sides. Optional lashing straps for securing the load are already installed in the frame.

Extensive range of accessories

Taxi wagon

Transport of up to 3 400 x 600 mm dollies at the same time. Self-locking interlock system for additional safety. Low drive-on height – dollies are protected against unintentional rolling out. Suitable for tugger trains.

Flexible material supply

Transport of containers of various sizes

Supply with tugger train

DOLLIES 400 X 400 MM

Polyamide castors

- The all-roander made from durable plastic
- Suitable for most industrial purposes
- No tilting in monorail stations

Rubber castors

- Recommended for use in tugger trains
- High tracking accuracy
- For low-noise rolling
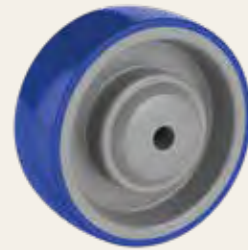

Polyurethane castors

- Convenient transport
- For low-noise rolling
- Harder than rubber rollers

Polyurethane ESD castors

- The all-rounder made from durable plastic
- Suitable for applications in ESD areas
- No tilting in monorail stationsn

Non-marking polyamide ESD castors

- Made from durable plastic
- Suitable for applications in ESD areas
- Leaves no marks on the floor

ESD rubber castors

- Recommended for use in tugger trains
- High tracking accuracy
- For low-noise rolling
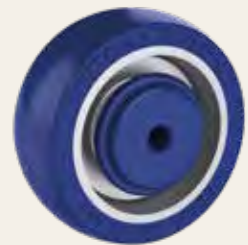

„Clean Wheel" castors

- For use in cleanrooms
- Do not generate abrasion
- No absorption of dirt

- Dimensions: 179 x 405 x 405 mm (H x W x L)
- Own weight: 6 kg
- Maximum load: 160 kg
- Roller diameter: 100 mm
- Material: Steel
- Stackable
- Castors for different applications
- ESD version available
- Manufactured in accordance with DIN ISO 9001/14001
- With locking corners for smooth container bases
- 2 swivel castors/2 fixed castors

DOLLIES 800 X 1200 MM

- Dimensions: 318 x 840 x 1240 mm (H x W x L)
- Own weight: 29 kg
- Maximum load: 1000 kg
- Roller diameter: 200 mm
- External dimensions: 1240 x 840 x 318 mm
- Material: Steel
- Stackable
- Manufactured in accordance with DIN ISO 9001/14001
- Also available with locking corners
  for smooth container bases
- 4 swivel castors (optionally with 2
  swivel castors/2 fixed castors)
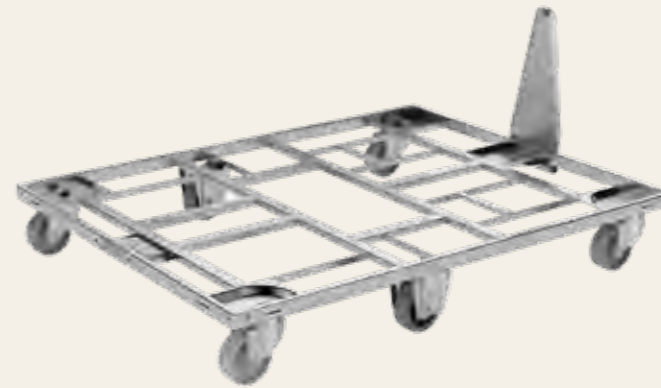

- Dimensions: 502 x 800 x 1212 mm (H x W x L)
- Own weight: 19 kg
- Maximum load: 300 kg
- Roller diameter: 100 mm
- Material: Steel
- Stackable
- Castors for different applications
- ESD version available
- Manufactured in accordance with DIN ISO 9001/14001
- Suitable for transport on an adapter pallet
- Also available with locking corners
  for smooth container bases
- 4 swivel castors/2 fixed castors

ACCESSORIES

Push bar for dollies

Order no.	
MAT-STANGE	

The ergonomically designed push bar is the ideal aid, especially for dollies with a low loading height. It is easy to attach and can be used immediately as a pushing or pulling aid. Can be used for all K.Hartwall Dolly types.

Produced by:
K.HARTWALL
Logistics Efficiency through Innovation

Oil pan for dolly, galvanised, anodised

Order no.	Version	
MAT-BORO-ZB001	for dolly, 400 x 600 mm	
MAT-BORO-ZB002	for dolly, 800 x 600 mm	

Drip-tight and impact-resistant oil pan made of anodised steel.

Oil pan for dolly, plastic

Order no.	Version	
MAT-BORO-ZB004	for dolly, 400 x 600 mm	

Drip-tight oil pan made of deep-drawn plastic.

Drawbar for taxi wagons

Order no.	
MAT-SD	

- Depending on tractor type
- Maximum towing weight: 6 tonnes (drawbar),
  2 tonnes (pivot)
- Sturdy, welded steel construction
- Development under consideration of ergonomic aspects
- Quick and easy foot operation
- High-quality design with gas pressure cylinder
- Suitable for the most common tractor types
- Compatible with all dolly types, shelf wagon and the
  MAT-TAXI002 taxi wagon model

SHELF WAGON 800 X 1200 MM

- Total load capacity: 450 kg
- Levels adjustable at a distance of 50 mm
- Load volume: 4 x KLT 400 x 600 mm per level
- 2 swivel and 2 fixed castors
- 160 mm polyurethane castors
- Standard equipment: 3 shelves and base plate
- With cover, route train capable
- Internal dimensions (L x W x H): 1200 x 800 x 1367 mm
- External dimensions (L x W x H): 1260 x 808 x 1675 mm

- Dimensions: 1810 x 820 x 1220 mm (H x W x L)
- Own weight: 65 kg
- Maximum load: 1000 kg
- Roller diameter: 200 mm
- Material: hard-wearing plastic
- 4 levels
- Levels at a distance of 365 mm
- 2 swivel castors/2 fixed castors with rear brake

ADAPTER PALLET FOR DOLLIES
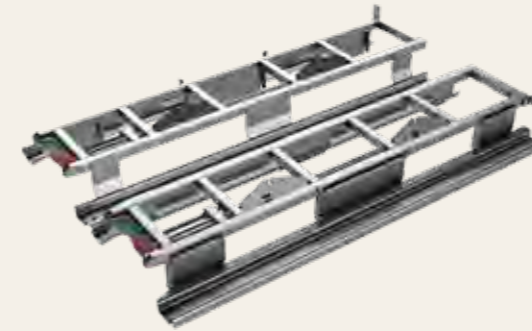

Adapter range for:
- 6 Dollies each 400 x 400 mm
- 4 Dollies each 400 x 600 mm
- 2 Dollies each 800 x 600 mm
- 2 Dollies à 400 x 600 mm
- 1 Dolly à 800 x 600 mmm

- Material: Steel
- Own weight: 39 kg
- Load capacity: 1000 kg
- Galvanised
- Suitable for lorry transport
- Storage in heavy-duty racking possible
- Stackable loaded and unloaded
- Increased stability
- Low weight
- Savings on transport costs

MA TERIAL SUP PLY

**katalog.orgatex.com/
materialbereitstellung**

Given the wide range of variants in today's productions, a reliable supply of materials is essential. Modern production companies rely on station systems, also known as supermarkets. These systems are based on the „first in – first out" principle, FiFo for short, which prevents damage caused by excessive storage and ensures easy traceability in the event of material errors or malfunctions.

Station systems work in a similar way to a flow rack: because fill levels are immediately visible, the goods can be replenished and made available with pinpoint accuracy and the required quantity can be pre-picked. The individual lanes of the station are labelled and ensure that different products are clearly separated, eliminating the risk of mix-ups when picking. The system therefore ensures an optimised material flow with increased efficiency, reduced stock levels and minimised space requirements. ORGATEX® offers you both monorail rail systems with a wide range of options for your individual material supply requirements.

We offer parking bays with the highest possible flexibility as well as systems for permanent installation, each suitable for different roller widths. In addition, our portfolio includes aluminium or plastic parking bays that prevent dollies from rolling away: this allows products to be positioned precisely and, for example, made available at the workplace in a space-saving manner.

Rely on precise rolling material supply as part of modern logistics in your company – we have the right solutions for you.

INFOGRAPHIC MATERIAL SUPPLY

Labelling for clear allocation of rollable units

Provision of materials on dollies

FiFo - „First in - First out" principle

Rail system for roller widths up to 40 mm or 55 mm
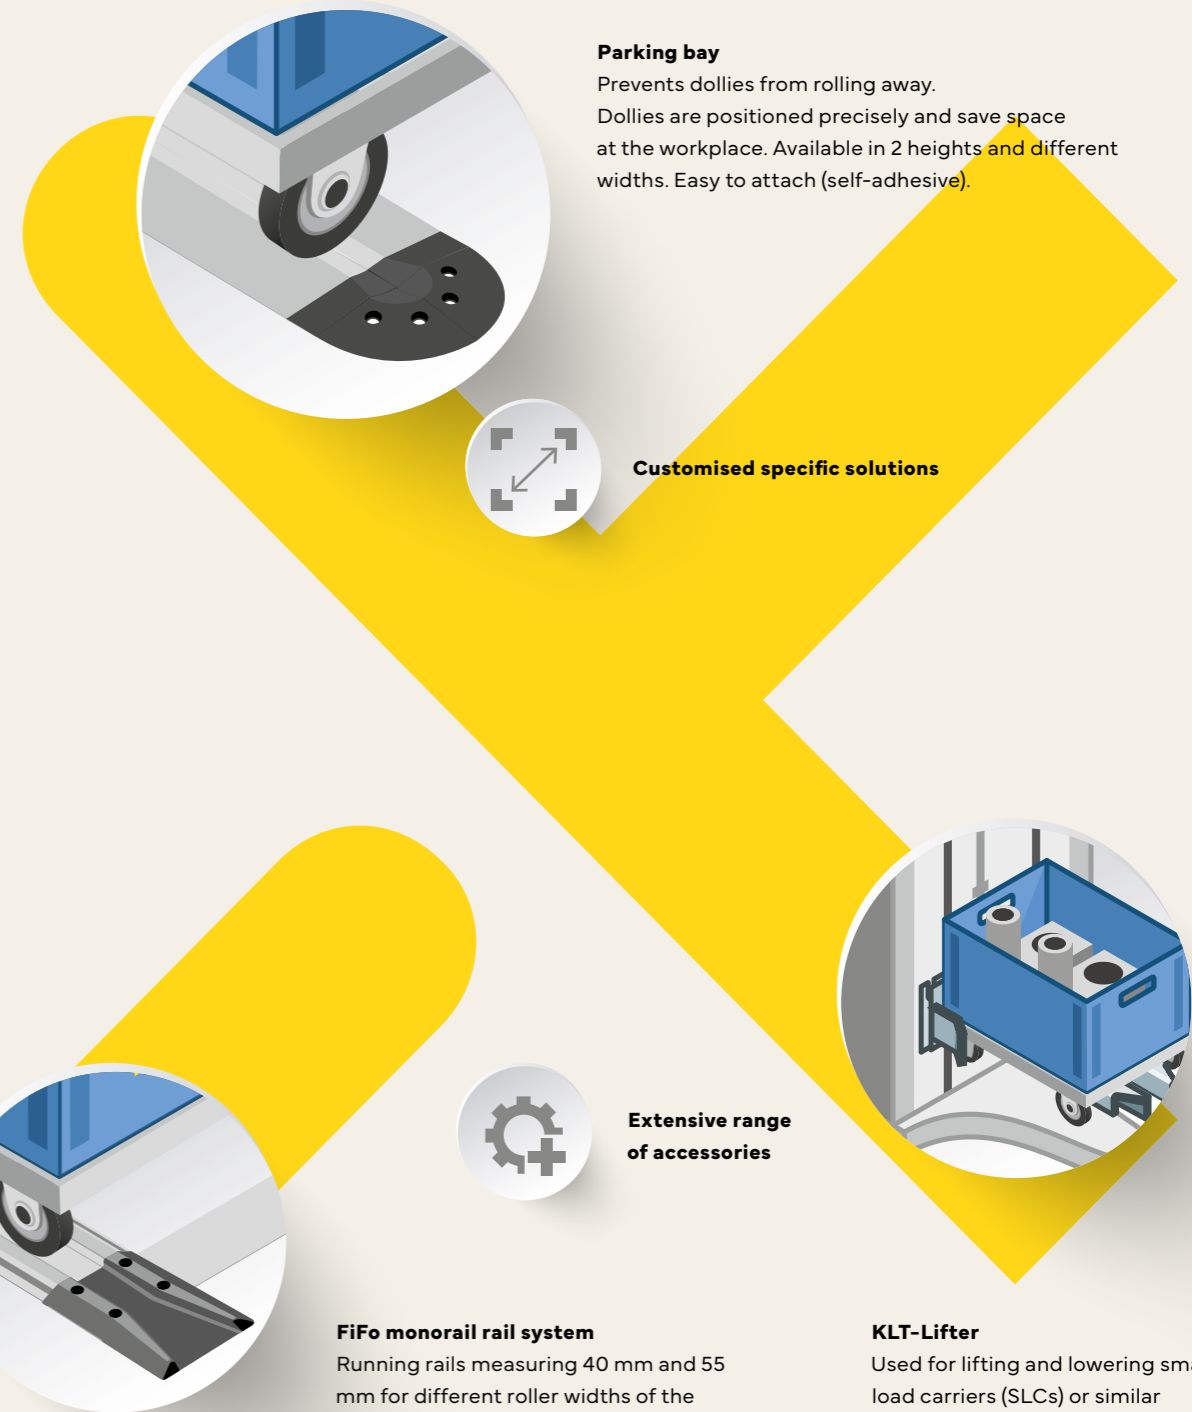

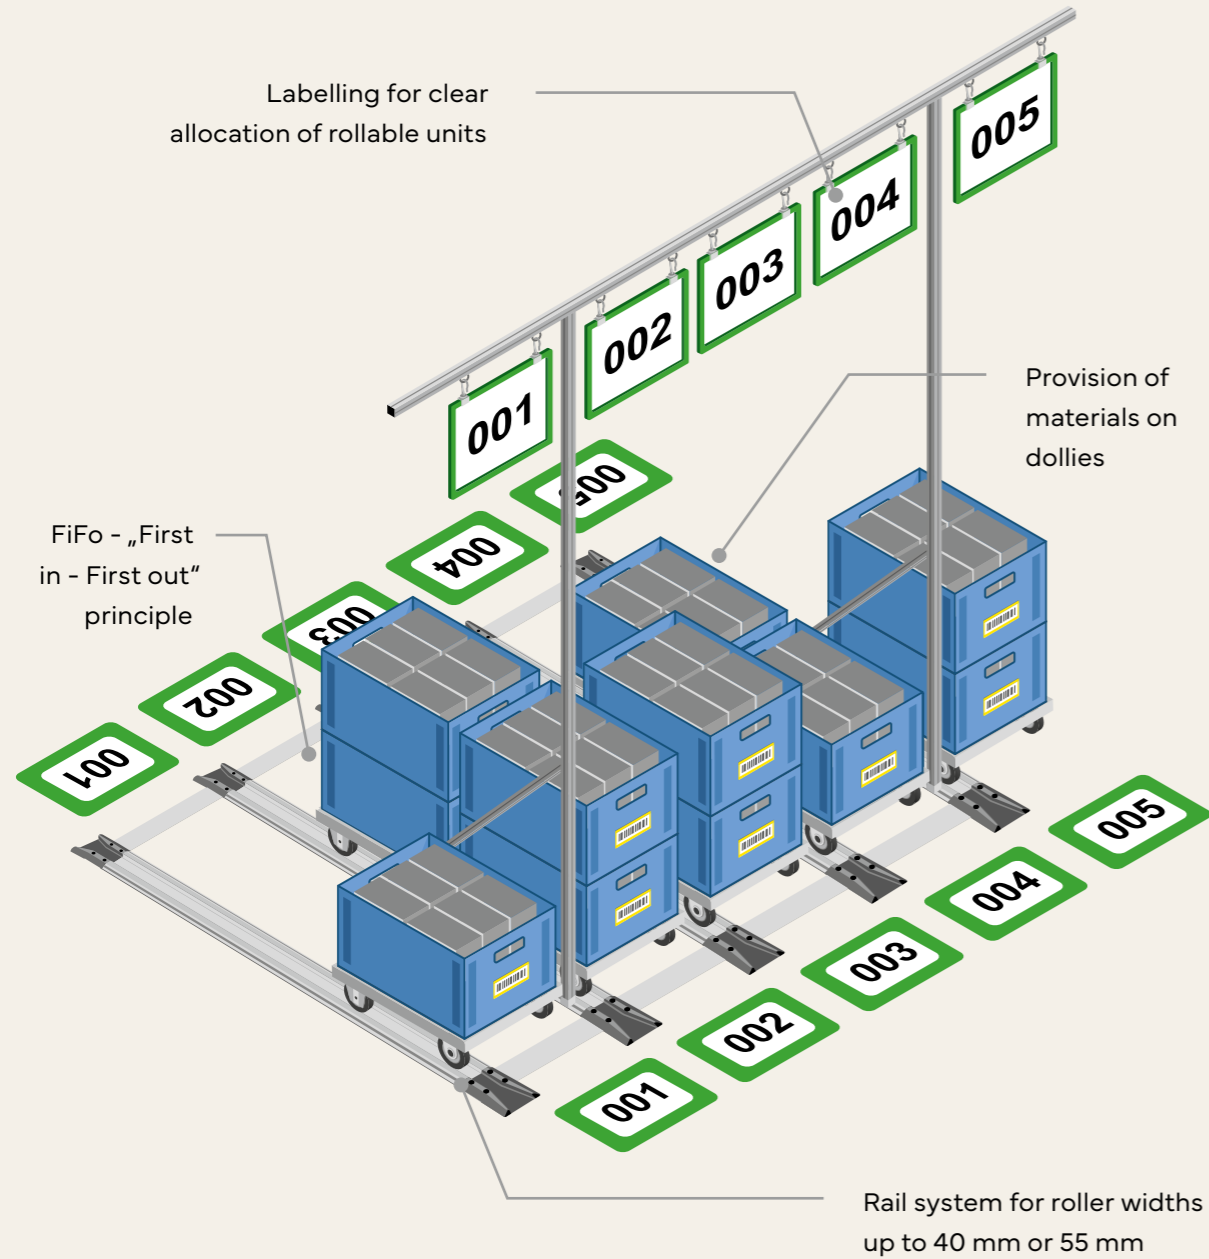

Parking bay
Prevents dollies from rolling away. Dollies are positioned precisely and save space at the workplace. Available in 2 heights and different widths. Easy to attach (self-adhesive).

Customised specific solutions

Extensive range of accessories

FiFo monorail rail system
Running rails measuring 40 mm and 55 mm for different roller widths of the dollies. Flexible lengths and widths mean that the system can be extended as required, even after installation. The standardised labelling of station systems ensures clear allocation of rollable units.

KLT-Lifter
Used for lifting and lowering small load carriers (SLCs) or similar containers to an ergonomic working height.

For different roll widths

Ergonomic workplace

For tidiness and cleanliness

FIFO-MONORAIL 40 MM – 5S
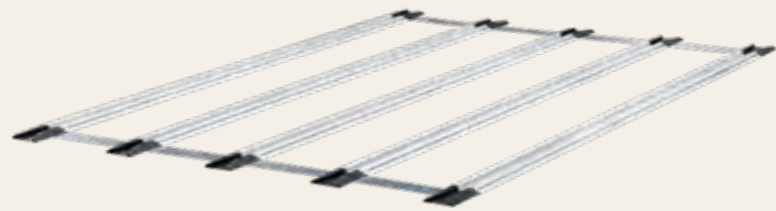

FIFO-MONORAIL 55 MM – 5S

Consists of:
- 5 FiFo monorail tracks
- 10 FiFo monorail end caps
- 20 grub screws
- 8 FiFo monorail connecting plates
- 32 Sleeve nuts

Rail system for roll widths up to 40 mm.
- Clear allocation of the material
- Easy insertion of the dollies
- Quick assembly
- Extendable in length and width

FIFO-MONORAIL INDIVIDUAL

EOX-MONOMOVER

Rail system for customised roller widths. The dollies can be guided on one or both sides at the outer edges. Must be installed in the floor.

- Clear allocation of the material
- Easy insertion of the dollies
- Quick assembly
- Extendable in length and width

More efficiency for your FiFo station:
Recognise goods removal and allow replenishment to advance
The modular design of the feed unit allows any number of dollies to be conveyed simultaneously. This allows the system to grow dynamically with your requirements. The integrated bristle belts transport individual dollies independently from A to B. The length of the track is unlimited and is also compatible with existing IoT ecosystems. Thanks to its compact design, the eOX-Monomover also ensures an automatic and seamless flow of goods. Rely on a secure system with an intelligent core – and save time and money!

- Light barriers at the module ends
- Bristle belt from synthetic leather
- Lift can be integrated
- Unlimited track length

FiFo-Monorail, individual

EOX-STATION

How to configure your FiFo tracks digitally

A FiFo railway station with a digital extension – that is the eOX station! Digitally link up to 120 tracks to a central calculation unit that is connected directly to the station. You can configure the individual tracks as required via the so-called eOX gateway and assign different track groups, for example. Sensors directly on the tracks then automatically recognise when dollies are pushed into a track or pulled out of a track. Practical: The sensor technology corresponds to the signalling lights above the station. Red or green? The colour tells your employees which status the lane is currently in! This means you always know whether dollies can already be removed or should remain in the station.

- Classic FiFo station, digitally enhanced
- Up to 120 tracks can be linked together
- Sensors register dollies when retracting and extending
- High level of safety: system operates with 24 V DC
  (direct current)

eOX-Station		
Order no.	**Designation**	
EOX-STATION	Digital railway station	

FIFO-MONORAIL LABELLING 5S
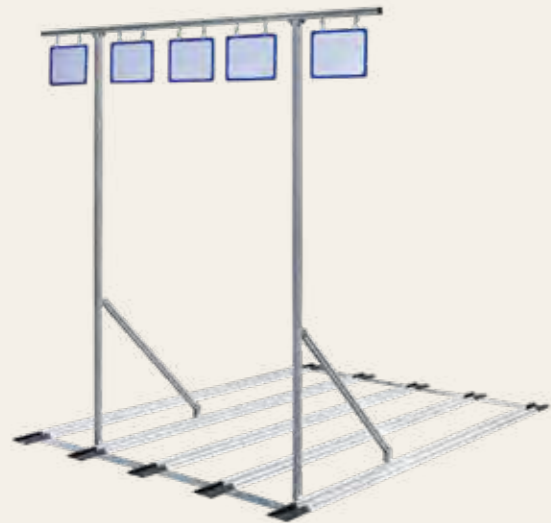

Standardised labelling for station systems ensures clear allocation of rollable units. Incorrect loading can be ruled out and loading and unloading is significantly simplified.

FiFo-Monorail, Labelling 5S

Order no.	+ colour code	Designation	Pack	
MONO-SB5S		Labelling, track width 400 mm incl. fastening material	1 piece	
MONO-SB5SVB8		Labelling, track width 800 mm incl. fastening material	1 piece	
PKR-A4-100-	01 02 03 04 05 06 08 88	Hanging sign, DIN A4 (optionally available)	5 pieces

ACCESSORIES FIFO-MONORAIL 40 MM

FiFo-Monorail end caps, 40 mm

Order no.	Pack	
MONO-EK	10 pcs.	

The V-shaped base element allows easy loading and unloading of dollies.
The integrated mounting plates enable connection to the 40 mm monorail track system.

FiFo-Monorail end caps HD, 40 mm

Order no.		
MONO-EK-HD-40		

The V-shaped, **extremely robust** base element allows easy loading and unloading of dollies.
The integrated mounting plates enable connection to the 40 mm monorail track system.

Incl. mounting material.

FiFo-Monorail end caps, 40 mm splayed

Order no.		
MONO-EKGS-V2		

The splayed retraction element is used on the loading side and makes it easier to fill the monorail station, especially with large/convoluted load carriers. With integrated collision protection, suitable for a roll width of up to 40 mm.

Incl. 2 screw connectors with 8 grub screws.

FiFo-Monorail tracks, 40 mm

Order no.	Version	Pack	
MONO-BP-1200	40 x 1200 mm	5 pcs.	
MONO-BP-1800	40 x 1800 mm	5 pcs.	
MONO-BP-2400	40 x 2400 mm	5 pcs.	

Rail system for single-sided guidance of dollies with a roller width of up to 40 mm. The 8 mm grooves on both sides are used for additional mounting of signage and enable integration into existing workstation systems, for example. Aluminium profile with anodised surface.

Price fluctuates greatly.
Please contact us for the current price.

ACCESSORIES FIFO-MONORAIL 55 MM

FiFo-Monorail end caps, 55 mm

Order no.	Pack
MONO-BP-55-EK	10 pcs.

The V-shaped base element allows easy loading and unloading of dollies. The integrated mounting plates enable connection to the 55 mm monorail rail system.

FiFo-Monorail end caps HD, 55 mm

Order no.	
MONO-EK-HD-55	

The V-shaped, extremely robust base element allows easy loading and unloading of dollies. The integrated mounting plates enable connection to the 55 mm monorail track system.

Incl. mounting material.

FiFo-Monorail end caps, 55 mm, splayed

Order no.	
MONO-BP-55-EKGS-V2	

The spread infeed element is used on the loading side and makes it easier to fill the monorail station, especially with large/cluttered load carriers. With integrated collision protection, suitable for a roll width of up to 55 mm.

Incl. 2 screw connectors with 8 grub screws.

FiFo-Monorail rails, 55 mm

Order no.	Version	Pack
MONO-BP-55-1200	55 x 1200 mm	5 pcs.
MONO-BP-55-1800	55 x 1800 mm	5 pcs.
MONO-BP-55-2400	55 x 2400 mm	5 pcs.

Rail system for single-sided guidance of dollies with a roller width of up to 55 mm. The 8 mm grooves on both sides are used for additional mounting of signage and enable integration into existing workstation systems, for example. Aluminium profile with anodised surface.

Price fluctuates greatly.
Please contact us for the current price.

FiFo-Monorail collision protection

Order no.	Pack
MONO-EK-AS	1 set

A solid steel bracket protects the end cap from impact. Complete set incl. fixing material.
1 set = collision protection left and right, incl. 2 hammer nuts and 2 half-round bolts.

FiFo-Monorail angle

Order no.	Pack
MONO-HB	2 pcs.

Mounting bracket for stabilising/screwing long monorail tracks.
Complete set incl. fixing anchor.

FiFo-Monorail connecting element

Order no.	Pack
MONO-SV-100	10 pcs.

Screw connector for easy extension of monorail tracks in the 8 mm groove system.
Incl. 40 grub screws.

FiFo-Monorail slot cover, 2000 mm

Order no.	+ colour code		Pack
MONO-NA-2000-	04 06 88		10 pcs.

Groove covers prevent soiling of the side grooves. Precisely fitting, easy to retrofit, available in 3 colours and suitable for cleanrooms.
Length: 2000 mm.
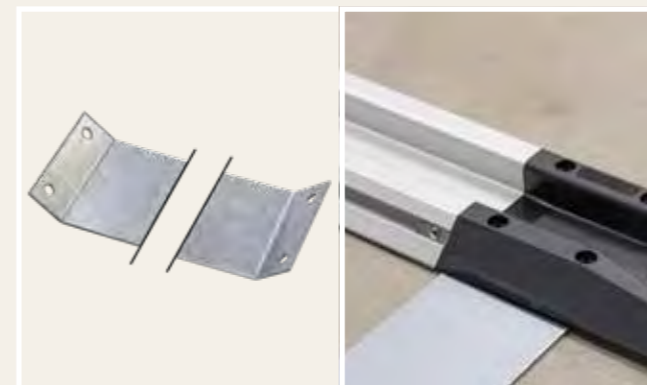

FiFo-Monorail 40 mm connecting plates

Order no.	Version	Pack
MONO-VB-2	400-mm-plate for 40-mm-track	2 pcs.
MONO-VB-800	800-mm plate for 40-mm-track	2 pcs.

Connecting plate for coupling individual monorail tracks next to each other. Assembly takes place in the end cap. The modular system means that it does not need to be screwed into the floor. Suitable for monorail, 40 mm. Complete set incl. mounting material.

Price fluctuates greatly.
Please contact us for the current price.

PRODUKT UPDATE — JETZT MIT NEUEN VERBINDERN — NOW WITH NEW CONNECTORS

ACCESSORIES FIFO-MONORAIL 40 MM AND 55 MM
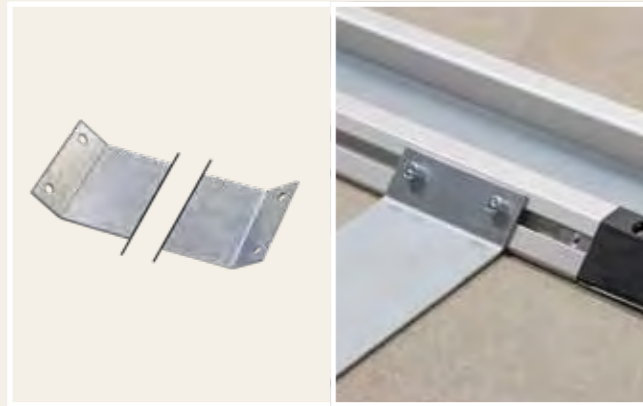

FiFo-Monorail-55 mm-connecting plates

Order no.	Version	Pack
MONO-VB-W45D	400-mm-sheet for 55-mm-track	2 pcs.
MONO-VB-800-W45D	800-mm-sheet for 55-mm-track	2 pcs.

The angled connecting plate on both sides enables the installation of tracks of different lengths.
Installation takes place in the monorail track. Suitable for monorail, 40 mm and 55 mm.

Complete set incl. mounting material.

FiFo-Monorail brake

Order no.	
MONO-BBR-200	

The brush brake prevents dollies from rolling out automatically, e.g. into driveways/walkways or production areas.

Complete set incl. mounting material.
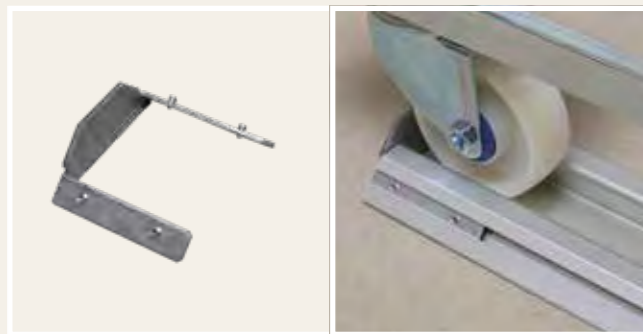

LiFo-Monorail stop

Order no.	Version
MONO-STOP	40 mm
MONO-STOP-55	55 mm

The monorail stop prevents the dollies from rolling out. Is generally used with the LiFo principle (last in - first out).

Incl. 4 grub screws.

Monorail-Backstop

Order no.	
MONO-RLS	

The monorail backstop ensures that the dollies can no longer run back off the rails.

Incl. 2 half-round bolts M6x12, 2 hammer nuts M6.

Price fluctuates greatly.
Please contact us for the current price.

FIFO-STATION SYSTEM FOR ALL CASTOR WIDTHS

Due to its flexibility, the system can be used for almost all roller-guided material carriers.

- Suitable for all roller diameters and track widths
- Simple assembly
- Rail colour with signal effect

By integrating an aluminium profile into the guide rail, individual applications can be created, e.g. enclosures or information provision, can be easily realised. The height of the permitted number of containers on the staging lanes can be restricted by installing gates.
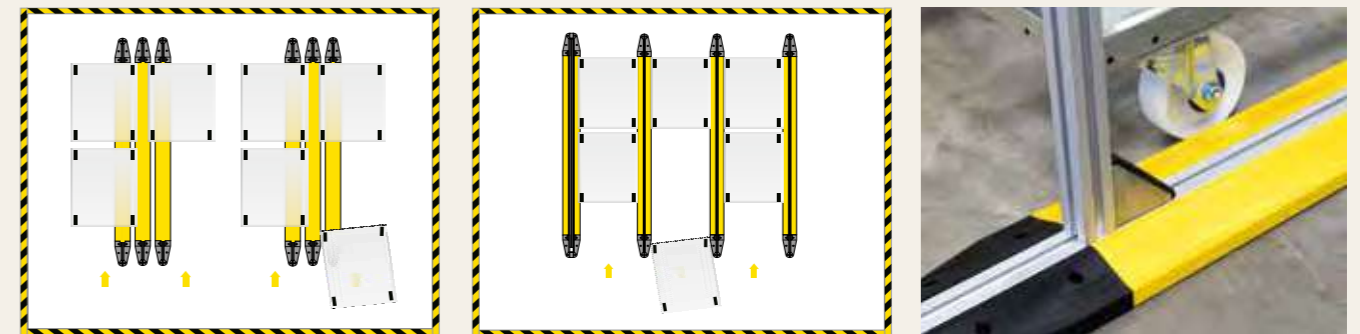

FIFO-STATION SYSTEM

End cap, left and right, self-adhesive

Order no.	Version	Length (mm)	Pack	
FIFO-EK-2L	End cap, left	225	1 pc.	
FIFO-EK-2R	End cap, right	225	1 pc.	
FIFO-SCHR-K	Screw set for caps and connectors		20 pcs.	

- Drive-in aid for dollies
- With 3 holes for mounting
- Self-adhesive

End cap, double, self-adhesive

Order no.	Execution	Length x width (mm)	Pack

PARKING BAY PLASTIC
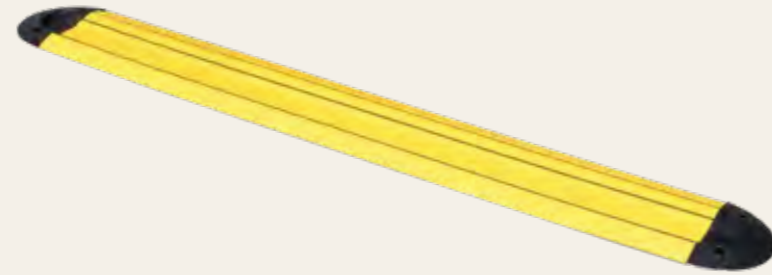

Rollable units should be provided safely and organised in production and logistics. The newly developed KU parking bay is a simple aid for positioning dollies, for example, to save space and prevent them from rolling away on their own without brakes.

- Maximum load: 150 kg
- Can be used simultaneously for different roller diameters
- Can be used immediately due to strong industrial adhesive
- Visual warning effect due to signal colour
- Easy to shorten

WORKPLACE SYSTEMS

In today's business world, where precision and efficiency are crucial to a company's success, the optimal design of assembly workstations is of great importance. As time and resources are valuable, we have put together a selection of workstations that not only meet the highest standards of quality and functionality but can also be integrated into your production environment with minimal planning effort.

We offer 2 different profile types, depending on the requirements of your working environment. In addition, we offer a variety of widths and depths to ensure you can choose the right size for your needs. Whether you prefer a static workstation version or need the flexibility of a height-adjustable version, we have the right solution for every requirement.

Another advantage of our assembly workstations is their seamless integration into the rest of the ORGATEX® product portfolio in the area of visual management. By using proven 5S standards, you can equip your workstations in such a way that you not only optimise the production process, but also increase order, cleanliness and efficiency in the workplace.

Advantages
- Fast availability and low planning effort
- Robust and durable product
- Long-term investment security thanks to the modular design of the system
- Expandable with a comprehensive portfolio of intelligent accessories
- Integration of OEE sensors
- Integration of conveyor belts, lifting devices and individual components possible

Facts about workplace design

Working height depends on body size
Working height and body size are directly related to each other

Sitting correctly
Adjustment of work equipment to ensure an upright and natural posture

Standing correctly
Variable adjustable workstation to avoid tension and ensure an upright posture.

Reaching and parts provision
All materials/tools must be easily accessible and within a range of motion

Viewing area and illumination
Unnecessary head and eye movements should be avoided. Optimal lighting conditions support you while working.

WORKPLACE SYSTEMS STATIC

- Work surface height: 750 mm
- Total height of the workstation: 2200 mm
- Depth of the cantilever: 520 mm
- Foot type: Articulated feet
- Table top: melanin resin coated - light grey
- Suspension: C-profile rail, trolley
- Light: LED system light, 39.5 W
- Socket outlet: Multiple socket outlet
- 4 x Schuko socket outlet
- 1 x USB

SAFETY

**katalog.orgatex.com/
sicherheit**

It doesn't take a lot of bad luck for an industrial accident to turn into a cascade of further disasters. Production comes to a standstill, ordered goods cannot be delivered, customers become angry, insist on contract fulfilment or, in the worst case, terminate the cooperation. It's just as well that you can achieve a lot for the well-being of your employees and the safety of your company with a few simple measures. And of course we offer them.

Safety is about the same thing as efficient work processes: awareness. Your employees must always be aware of possible risks, even in the hustle and bustle of everyday work life and despite focussing on their tasks. It is also about visual management and you are in good hands with us.

We have greatly expanded our range in this key area. From high-strength, durable anti-slip tape that prevents tripping accidents to safety signs that are clearly visible from afar – we offer a wide range of safety products.

You can easily find effective solutions to minimise the risk of accidents and injuries in the workplace.

We have channelled all our experience with a range of different companies from the most diverse industries in order to offer you a wide range of solutions that not only cover practically all hazard areas but have also proven themselves in day-to-day operations. And if you are missing something – just contact us. We will find a solution.

ANTI-SLIP-PRODUCTS

On the following pages, you will find the right anti-slip solutions to help prevent accidents and falls at the workplace and in other areas. Tripping, falling and slipping are among the most common causes of accidents in companies. Floors should therefore be slip-resistant. This is specified in ASR A1.5. Anti-slip tapes are categorised into 5 R classes, with R9 being the lowest and R13 the highest slip resistance.

Our anti-slip tapes have been carefully developed to make slippery surfaces more slip-resistant and ensure the safety of your employees and customers. Whether it is for high frequencies, rough surfaces or clean rooms, you will find the right products here. They are characterised by reliability, durability and simple use. Create a non-slip environment with our anti-slip tapes and help to reduce accidents and promote the safety of everyone involved.

ANTI-SLIP-TAPE UNIVERSALGRIP

UniversalGrip is the perfect solution for anyone looking for effective slip protection. With a wide range of colour options, it adapts effortlessly to any environment and can therefore be used to mark hazardous areas. Thanks to its high slip class R13, the tape offers reliable grip on various surfaces and significantly minimises the risk of tripping.

Developed for medium to heavy-duty use, this anti-slip tape is ideal for high-traffic areas such as stairs, ramps, walkways and production areas. Its hard-wearing nature ensures long-lasting performance, even in demanding conditions.

- Slip resistance R13
- For medium to high loads
- Great variety of colours
- Customised widths possible
- Suitable for smooth indoor floors

ANTI-SLIP-TAPE PROGRIP

ProGrip is our anti-slip tape for high-traffic areas that require reliable anti-slip protection. With its robust and coarse surface structure, the tape provides exceptional grip, even under demanding conditions. Whether in heavily frequented production areas, warehouses or public areas – this tape effortlessly masters high levels of strain and stays in place and it extremely resistant to soiling and wear.

Thanks to its slip class R13, our anti-slip tape significantly minimises the risk of falling and ensures the safety of your employees and visitors.

- Slip resistance R13
- Ideal for high footfall and a high degree of soiling
- Suitable for smooth indoor floors

ANTI-SLIP-TAPE FLEXGRIP

The FlexGrip is the perfect solution for use on uneven and rough surfaces. Due to its adaptable aluminium layer, it adheres perfectly to textured surfaces such as chequer plates and stairs without losing its adhesive strength. With an R13 slip class coating, the tape offers reliable slip resistance that remains intact even under demanding conditions.

Whether in industrial plants, warehouses, on construction sites or in other harsh environments – our anti-slip tape offers an effective safety solution that is easy to use and provides long-term protection against accidents.

- Slip resistance R13
- Especially for uneven surfaces
- Excellent adaptation to chequer plate
- Suitable for indoor use

ANTI-SLIP-TAPE NANOGRIP

NanoGrip was developed specifically for use in cleanrooms and fulfils the highest standards of cleanliness and safety. With its non-abrasive layer, it also offers excellent slip resistance (slip class R10). Due to its extra-thin yet tear-resistant nature, it enables seamless integration into the cleanroom environment.

The anti-slip tape is extremely easy to clean, which maintains the cleanliness and hygienic standard of the cleanroom. With this anti-slip tape, you can create a safe working environment and significantly reduce the risk of falls and accidents in your cleanroom.

- For hygiene, food and cleanroom areas
- Easy to clean, extra thin and tear-resistant
- Slip resistance R10
- Wide range of colours and individually printable
- Suitable for smooth indoor floors

LONGLIFE FLOOR MARKING TAPE GRIP

Durable floor marking
Save yourself the effort of marking floors with real paint! With the LongLife-Grip with anti-slip effect, you can create hard-wearing floor markings easily and quickly. The non-slip and retroreflective surface is suitable for indoor and outdoor areas. The extra-strong floor marking tape also adheres to surfaces such as concrete, tiles and asphalt.
Due to its permanent adhesion, it can also be driven on, making it a safe solution for use in your storage area. Mark cleverly and immediately!

- Suitable for smooth and textured floors
- For indoor and outdoor areas
- Hardwearing and self-adhesive
- Non-slip and retroreflective
- Can be used outdoors with LongLife Primer
- Wear resistant
- Suitable for various surfaces
- Immediately accessible

STAIR NOSING-PROFILES

Our stair nosing profiles increase visibility and consequently also safety at the edges of steps. Thanks to anti-slip coverings with an R13 anti-slip coating, slip resistance is also increased. There are 3 versions available depending on the load and requirements. In production, where things are often hectic, the safety of employees is of the utmost importance. Our stair nosing profiles with anti-slip coating provide a secure grip on stairs and ensure that slippery surfaces no longer pose a risk.

We offer a wide range of stair nosing profiles that have been specially developed for different frequencies. Whether you have light use in offices or heavy use on factory floors, we have the right profile for your requirements.

Another advantage of our stair nosing profiles is that they are available in different coloured anti-slip coatings. These not only contribute to improved visibility and orientation, but also offer the option of colour-matching the profiles to the surroundings or marking certain areas.

The installation of our stair nosing profiles is simple and straightforward. They adhere securely to the steps and offer a long-lasting solution for your safety needs.

Protect your employees from potential accidents and ensure a safe working environment in your production and on stairs.

LUMINESCENT MARKING

Guide your employees safely to emergency exits and escape routes, even in the dark. Our tapes and cut-to-size sheets are characterised by a hard-wearing and durable material. The products have an extra high luminance of 200/25 mcd/m² in accordance with DIN 67510 (class C). In addition, imprints such as arrows or signposts provide clear guidance through dark environments. The integrated version combines a coloured signal effect in the light and luminescent effects in the dark.

- Luminosity class C
- Luminance 200/25 mcd/m²
- Hardwearing
- For indoor arease

SAFETY AND INFORMATION SIGNS

Safety and information signs – clear messages for a safe environment.

Our signs have luminance class C with a luminance of 200/25 mcd/m², ensuring that they are clearly visible even in poor lighting conditions.

We offer various formats to ensure you find the right safety and information sign for your requirements. Whether it's small signs for offices or large safety signs for industrial facilities, we have the right solutions for you.

Our signs are available with a variety of symbols that enable clear and universal communication. From warnings and fire safety symbols to safety regulations, our signs support an effective safety culture in your organisation.

We also offer you the option of customised printing. Personalise your signs with specific instructions or other relevant information to create tailor-made solutions for your business.

Tür bitte freihalten!

NORMS AND STANDARDS

In Germany, company safety standards are based on ISO 7010 and ASR A1.3, which has replaced the main parts of the older regulation for safety and health at work (BGV A8 - Accident Prevention). The BGV itself has been invalid since 2012 and only applies in certain areas. This change was due to increasing international cooperation between companies. In order to comply with global standards, Germany and other European countries have adopted the international safety symbols in accordance with ISO 7010.

The use of the current safety labelling in accordance with ASR A1.3 and ASR A2.3 complies with the legally binding Workplace Ordinance (ArbStättV). If a company chooses an alternative solution, a risk assessment must first be carried out by the company. This ensures that employees receive at least the same level of health and safety protection.

	ISO 7010

- International standard defined by the European Committee
- Adoption of the international standard in Europe and in Germany (DIN EN ISO 7010)
- Standardised definition of safety labelling, also beyond the borders of single European states.

	ASR A1.3

- Technical rule for work-places (safety and health protection labelling)
- Replacement of the old regulation according to BGV A8
- Adoption of the standards set out in DIN EN ISO 7010 defined safety markings
- With this regulation, employers fulfil their obligation to label workplaces safely.

	BGV A8

- Employer's Liability Insurance Association regulation for safety and health at work
- Regulation of health protection and safety labelling in the workplace
- Currently only valid in some areas
- The main contents are now covered by ASR A1.3
- Security labelling according to BGV A8 only possible in conjun-ction with a risk assessment

THE MEANING AND COLOURS OF THE SAFETY SIGNS

ASR A1.3 specifies the requirements for safety and health protection labelling in workplaces. According to Section 3a of the Workplace Ordinance in conjunction with Section 1.3 of the appendix, safety and health protection labels must be used if the risks to safety and health cannot otherwise be avoided or cannot be suffi-ciently minimized. The ASR A1.3 also specifies the design of escape and rescue plans in accordance with Section 4 Paragraph 4 of the Workplace Ordinance. DIN 4844-1 also specifies the detection distances and colour requirements. The RAL colours are determined by DIN 5381 "identifying colours". There is also ISO 3864 "Graphic symbols – safety colours and safety symbols", which records pictograms, colours and their design.

Type	Format	Safety colour	Contrasting colour	Colour of pictograph	Meaning according to ASR A1.3	Information	Example
Fire equipment sign		RAL 3001 Signal red	RAL 9003 Signal white	RAL 9003 Signal white	Fire alarm and fire extinguishing equipment	Equipment and location	
Emergency sign		RAL 6032 Signal green	RAL 9003 Signal white	RAL 9003 Signal white	Help, rescue, safety	Doors, notices, paths, rooms	
Mandatory sign		RAL 5005 Signal blue	RAL 9003 Signal white	RAL 9003 Signal white	Mandate	Special behaviour or activity	
Prohibition sign		RAL 3001 Signal red	RAL 9003 Signal white	RAL 9004 Signal black	Prohibition, danger	Dangerous behaviour, danger	
Warning sign		RAL 1003 Signal yellow	RAL 9004 Signal black	RAL 9004 Signal black	Warning of risks or danger	Caution, danger, inspection	

Viewing distance of safety signs

Diameter (mm)	max. viewing distance (m)

100	4
200	8
300	12
400	16
600	24

Side length (mm)	max. viewing distance (m)
50	1
100	3
200	6
300	9
400	12
600	19

Size (B x H) (mm)	Max. viewing distance (m)
100 x 100	10
150 x 150, 300 x 150	15
200 x 200, 400 x 200	20
300 x 300, 600 x 300	30

Rescue and fire safety signs must be made of lumine-scent material if there is insufficient safety lighting. According to ASR A1.3 point 3.17, a photoluminescent safety sign is a safety sign that is energised by light and remains illuminated after the general lighting has failed without any further energy supply. Luminescent signs are subject to DIN 67510, which specifies the minimum luminance of the material. The luminance specifies the level of illuminance that the safety sign reflects after the light source has been removed and is given in milli-candela per square metre (mcd/m2). The minimum values are determined after 2, 10, 30 and 60 minutes after the end of the excitation period in the standard.

Depending on these values, the classification into classes A to C in accordance with DIN 67510-1, with class C representing the highest value takes place. Luminescent safety signs must at least fulfil the requi-rements of DIN 67510-1, Class C. As this is merely a guideline, the symbols with reduced luminance (old standard) can continue to be used. In this case, however, a risk assessment must be carried out to ensure that the requirements are met. It is advisable to switch to luminance class C labelling in order to comply with the ASR without any problems and to act with legal certainty in terms of the presumption of conformity.

Luminosity class	Field of application	Luminance 10 min/60 min	ORGATEX®-Product
A	Very well-lit rooms with permanent lighting and/or daylight, e.g. offices with windows	23/3 mcd/m²	
B	Rooms with bright continuous lighting during operating hours: Hazardous areas can be easily recognised in these work areas.	50/7 mcd/m²	
C	Rooms with subdued or only intermittent lighting. All buildings/rooms subject to ASR A3.4/3: Hospitals, airports, large department stores, hotels, power stations, event venues, factories and warehouses, corridors.	140/20 mcd/m²	200/25 mcd/m²
D	For areas with unfavourable lighting situations and special safety requirements. Special solutions in accordance with ASR for ships, tunnels, etc. For internal claims of the client.	260/35 mcd/m²	

EMERGENCY SIGNS

Guide your employees safely to emergency exits and escape routes. Our signs are characterised by a hard-wearing and durable material. The products have an extra high luminance of 200/25 mcd/m² in accordance with DIN 67510 (class C). Customised products can be produced according to your wishes. Angled and flag signs ensure the necessary visibility even in elongated rooms.

LONGLIFE FLOOR MARKING 600 MM
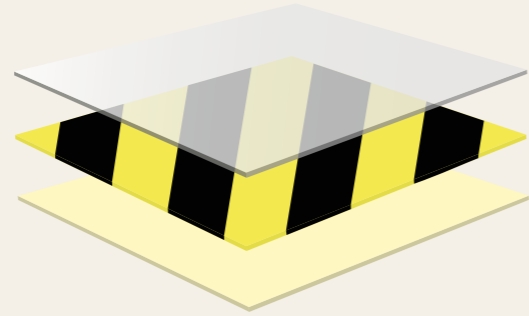

Warning and mandatory signs comply with the following standards and regulations in accordance with ASR A1.3.

- Made from PVC
- Full-surface adhesive backing
- Increasing occupational safety
- Simple attachment
- Excellent adhesion
- High level of step security
- Trafficable
- High warning and information effect
- **Further symbols on request**

3-layer structure (back-printed):
Multi-coloured LongLife floor markings consist of a transparent film that is backprinted on the reverse side and coated with a special adhesive. This means that the coloured printed image is located between the film and the adhesive and is protected from wear and tear.

LONGLIFE CROSSWALK
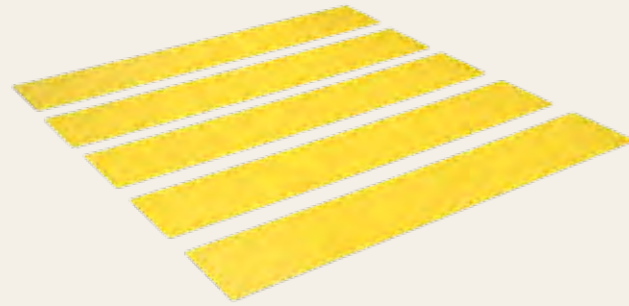

Our high-quality, self-adhesive zebra crossing has been specially developed for industrial use. With its outstanding quality and exceptional durability, it offers a reliable solution for safe pedestrian crossings in demanding environments. Trust in a product that meets the highest standards and significantly improves safety in your work environment.

- High warning and information effect
- High durability
- Suitable for smooth, gap-free floors indoors
- Flexible design due to individual strips

WARNING MARKINGS

Make it easier for your employees to find their way around the workplace and prevent contact with areas of danger. ASR A1.3 requires clear and permanent markings to be used to identify obstacles and danger areas. The markings should be either yellow and black or red and white and selected according to the size of the obstacles or danger points.

Applications for yellow and black markings are places where there is a risk of collision, entrapment, falling, slipping, tripping or falling loads.

Red and white markings, on the other hand, are recommended for temporary or movable obstacles and danger areas, such as crane hooks, construction pits, ladders, etc.

What does the directional indication „left" or „right" actually mean? Markings that point to the left or right are used to guide the observer past the obstacle or hazard on the left or right.
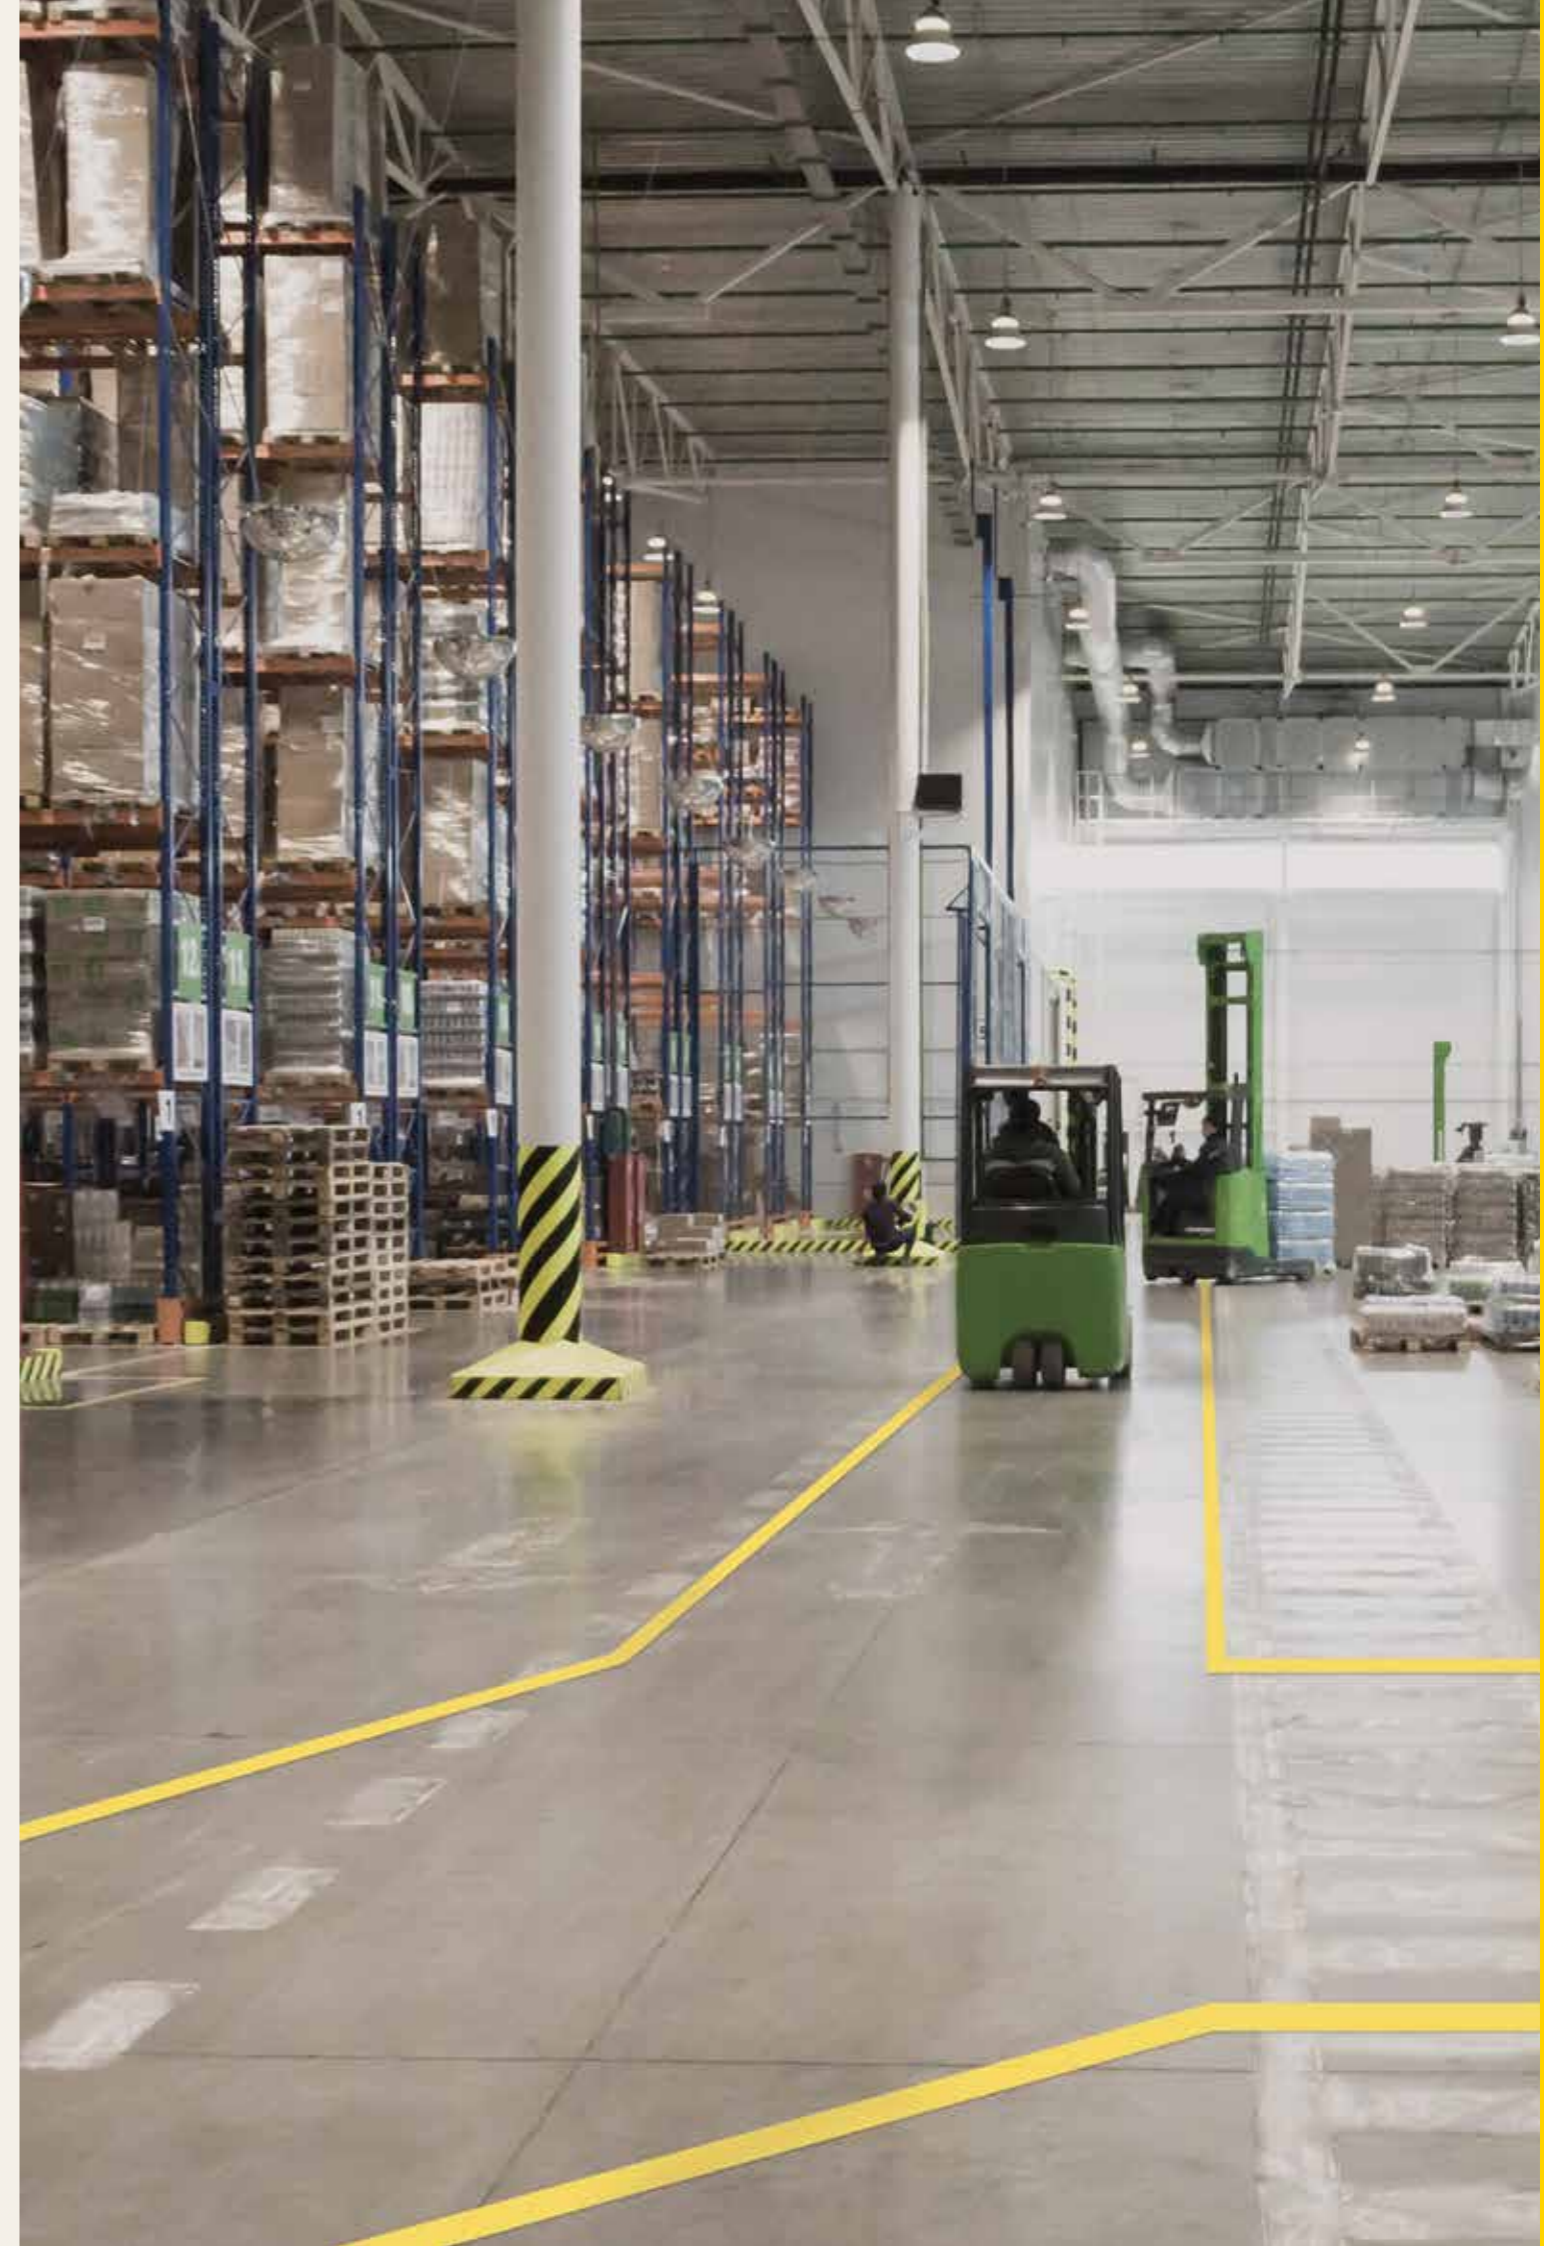

LONGLIFE FABRIC TAPE
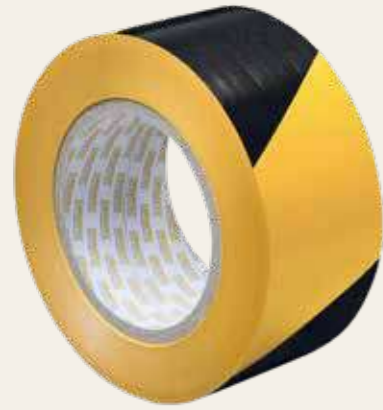

Unlimited application possibilities! The LongLife fabric tape is a PE-coated, dense, fine-threaded and waterproof synthetic silk fabric with a highly adhesive, shear-resistant natural rubber adhesive with very good durability. It is ideal for connecting, fastening, bundling, repairing and sealing. It is also available in a wide range of colours and is perfect for industrial identification and as a quick, eye-catching way of marking danger spots. It can be used both indoors and outdoors.

- Very good durability
- For indoor and outdoor areas
- Resistance to abrasion, decomposition and moisture
- Firm texture
- Dense, fine-threaded and water-proof synthetic silk fabric tape

DIGITAL INTRA LOGIS TICS

**katalog.orgatex.com/
digitale-intralogistik**

Of course, you already know that digitisation is the key to an efficient shop floor. But did you also know that digitisation is quick and easy with ORGATEX®? Without cables, without complicated IT infrastructure, but with lots of powerful features for greater efficiency? Introducing: eOX.

Get started immediately due to mobile communication
Having to set up a complex and costly IT infrastructure with gateways, routers and separate networks before you can digitise – we don't find that efficient, we think it's unnecessary. That's why our eOX solutions work with secure and affordable narrowband mobile technology. For you, this means that you can attach components such as the eOX button or the eOX label anywhere and then automatically transfer data to your smart ecosystem at the touch of a button.

360° digital, all-round efficiency
Whether it is digital and dynamic labelling of goods and materials or automated processes at the touch of a button, Constant process clarity for everyone due to

real-time data or smart outgoing goods – with eOX, you can digitalise processes in your intralogistics from start to finish and are therefore simply more efficient.

Simple control, triple security: the eOX cloud
The eOX cloud is your digital control centre that you can use to set up your eOX devices, plan automated processes and always keep track of your process data. We have taken care to make operation so simple and intuitive that you can set up almost everything without having to consult your IT department. And thanks to SSL/TLS encryption, your data is excellently protected.

eOX-MOBILE SHOPFLOOR BOARD

Discover the numerous advantages of our digital shop floor management tools. With the eOX boards, you can digitally map all your key figures, protocols and CIP measures while you carry out your production or departmental reviews.
They accelerate your information flows and make changes transparent. The eOX boards can be customised according to your templates. On request, we can offer you variants for every specific application: production meeting board, OEE board, machine board, topic memory.

Real-time data where it is needed
The Mobile Shopfloor Board offers a whiteboard surface, a touchscreen monitor and an independent power supply. It can therefore be used flexibly and on the move at any time. With the Mobile Shopfloor Board, your shift meetings can take place directly on site. The key figures and information are therefore always where the problems were observed. The Gemba principle means that every employee can understand, analyse, and resolve the causes of problems. This increases motivation in your company exponentially! The Mobile Shopfloor Board is available with or without a battery.

DIGITAL SHOPFLOOR MANAGEMENT WITH THE NEW APEXBOARD

apexboard
Powered by ORGATEX

Available from February 2024 for just €149 per month.
PRE-ORDER NOW!
Please contact us:
+49 2173 1064-0 | apexboard.io

YOUR BENEFITS WITH A DIGITAL SHOPFLOOR SOLUTION:

- Trustworthy, traceable data for operational key figures
- Simple control and tracking of measures and the development of standards
- Centralised data maintenance, data storage and data archiving through to automated transfer from upstream systems
- Clear presentation due to customisable dashboards
- Automated deviation calculation for a faster response
- Efficient communication in a centralised system that is comprehensible for all parties involved
- Simplified integration of employees and managers through clear task and target assignments
- Seamless integration of external digital systems for extended communication support

Peakboard and ORGATEX® create an unbeatable synergy for transparent processes, easier communication and more efficient collaboration on the shop floor. Using the Apexboard, you can digitise your shopfloor management easily and cost-effectively. The new product consists of an IPC hardware and user-friendly application from Peakboard and the Mobile Shopfloor Board from ORGATEX®. The best thing about it: Apexboard is ready for immediate use and easily customisable to the needs of control communication in a production plant.

Functions of Apexboard:

Provide key figures in aggregated and detailed standard reports according to SQCDP for a quick overview in regular meetings	Create individual key figures and process transaction data manually or automatically*	Create problem-related measures, edit, track and structure to establish new standards
Assign measures to individual persons and management levels. If required, external notification channels such as email, MS Teams or Slack can be integrated*.	Adaptation of the structure and menu to departmental used for structured communication.	Historization of key figures in the Peakboard Hub online. If required, the data can later be analysed with tools such as Microsoft Power BI, Tableau**

Display layout	Customisable
Radio technology	Narrowband IoT
Protocol	MQTT-SN
Button	Freely assignable functions
Information source	eOX-Cloud or ERP-System
Data retrieval	Button press, time interval or system trigger

Digital labelling made easy
The eOX label is the perfect solution for efficient and environmentally friendly labelling in intralogistics and production. Due to our innovative and reusable digital label, you not only save time, but also valuable resources. By using the eOX-Label, there is no need to create and replace paper labels, instead you have the option of displaying all information digitally and in real time on the modern e-ink display.

Digital intralogistics not only saves time in production, but also protects the environment. Our e-labels connect via the NB-IoT mobile network using the MQTT-SN protocol and are therefore independent of any other infrastructure. The e-ink displays combine the advantages of analogue media, such as scanability and readability from all angles, with those of digital media, such as fast content exchange and reduced effort with minimal energy consumption.

With the eOX label, you can optimise your intralogistics and production processes. It is the perfect solution to save time and resources while offering an environmentally friendly alternative to paper labels. Invest in the eOX-Label to get a professional and flexible labelling solution that is tailored to your individual needs.
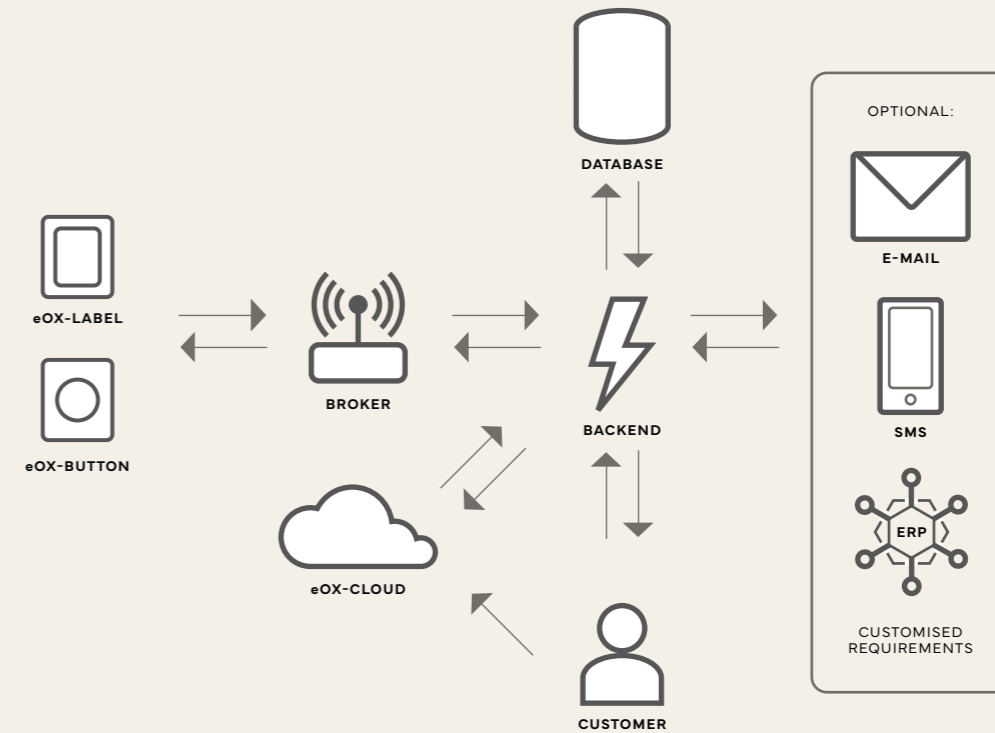

1. Broker
The broker is used for secure and encrypted communication with the eOX label via MQTT-SN

2. Backend
The messages are analysed in the backend and forwarded to the correct recipient.

3. Database
The status of the label and the configuration are stored in the database. These are updated with every interaction.

4. eOX-Cloud
The interface is an API that is made available to the customer. The customer can use commands to operate the eOX label. This allows the status and metadata of the label to be called up and updated directly. Each customer can customise their labels and view usage data via the configuration website.

5. Optionale Module
Depending on the application, optional modules can be added, such as automated e-mail dispatch.

eOX-BUTTON

MORE EFFICIENCY.
AT THE TOUCH OF A BUTTON.

The eOX button is the easy way to digitally automate your operating, logistics or production processes. Due to its narrowband wireless technology and battery operation, you can install the eOX button anywhere in just a few simple steps. And with the help of the intuitive operation in the eOX cloud, even non-IT experts can create complex automations. For these applications, for example:

Finished part notification at the touch of a button
With the eOX button, it only takes the push of a button for a finished product to be picked up by the AGV or forklift truck driver. At the same time, you keep the data in your ERP or WMS system always up to date with an automatic finished part notification.

NB-IoT

UART

E-Paper-Display

Automated material procurement
Always the right amount of raw material in the warehouse – the eOX button makes this easy and automatic. If material is running out, your warehouse staff simply send an automatic procurement order to the purchasing department at the touch of a button. At the same time, the stocks in your WMS or ERP system are updated. This allows you to shorten replenishment times, reduce staff retention and make reliable procurement decisions.

Faster error messages
With the eOX button, you can reduce production interruptions through automated error messages. One press of a button is all it takes to inform relevant parties, such as a foreman, about machine faults and request help at the same time. The message can also be sent to your OEE or MES system and visualised on Andon boards, for example.

Simple parts request
If your product consists of several components, the eOX button reliably helps you to avoid expensive downtimes. As with material procurement, production employees simply request the required parts at the touch of a button as soon as a minimum quantity is not reached.

TECHNICAL DATA eOX-BUTTON

Item number	eOX-Button
Supply Voltage	2,5 V – 12 V
Processor	ARM Cortex M3
Device dimensions (L x W x H)	72 x 53 x 26 mm
Display size	1,54 Inch, 200 x 200 Pixels
HMI-Refresh-Rate	Partial: 0.3 s, full: 2 s
Antenna (internal)	NB-IoT B8/B20
Weight incl. battery	81 g
Battery	2 x AA
Radio	NB-IoT
Programming	UART
Storage	NB-IoT
SIM	Nano-SIM (4FF)
HMI	E-Paper-Display

Example

Product component falls below minimum quantity.

Employee presses the eOX button.

An industrial truck receives the message and delivers the component.

The eOX button automatically sends a delivery order to the relevant departments.
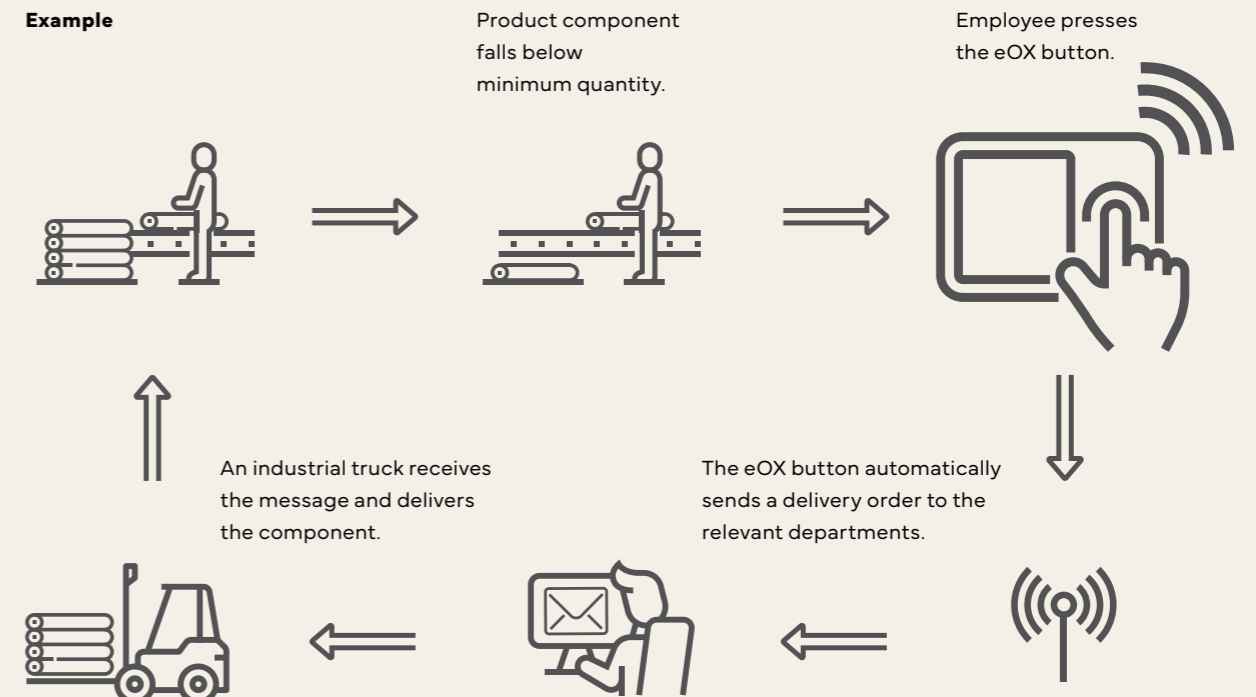

eOX-ENERGY-CONTROL

Saving energy intelligently

With eOX-Energy-Control, you have full control over your energy consumption and can therefore make effective savings.

The smart socket allows you to individually control the consumption of your electronic devices and easily identify or switch off consumers that are not required. Thanks to the web-based user interface, all connected eOX Energy Control devices can be controlled together or separately.

In addition to the option of individual control, eOX-Energy-Control also offers the option of analysing the operating status of individual systems. Changes in power consumption signal operating faults even before they lead to a standstill. This allows you to better plan upcoming maintenance and carry it out before the machine breaks down.

eOX-Energy-Control offers you a professional solution for increasing your energy efficiency and optimising your work processes.

TECHNICAL DATA eOX-ENERGY-CONTROL

Item number	eOX-Energy-Control
Measuring interval	1 s (configurable)
Transmission interval	1 min (configurable)
Input/output voltage	230 V AC ± 10 %
Frequency	50 Hz
Max. supported power	12 A / 2760 W
Plug / consumption in operation	Schuko (2W)
Operating temperature	–10 °C to +45 °C
Radio	NB-IoT
Protocol	TCP / IP und SSL
Programming	ST-Link
Troubleshooting	UART
Controller (processor)	ARM Cortex M4
SIM	NANO-SIM (4FF)
Antenna (internal)	NB-IoT, Band 20
Max. High-frequency power transmission	21 dBm
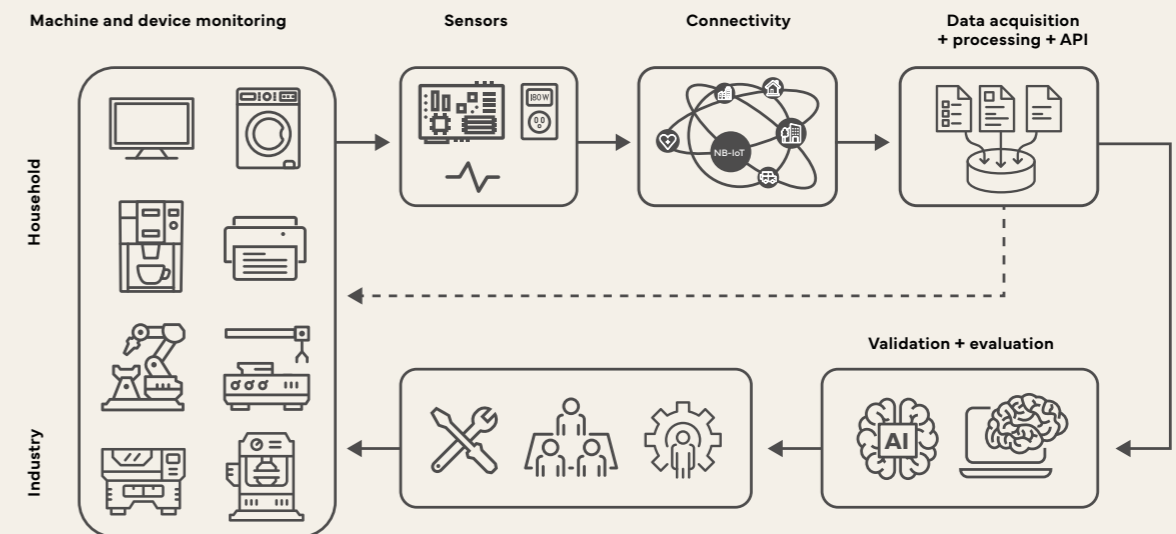

eOX-SPOT

Modern LED tool for a safe working environment
Stop dangerous situations with the light projector for warning signals: The eOX spotlight with integrated power supply unit can not only be fitted with standard safety and warning signal LEDs, it can also be used in a variety of ways with customised motifs. Regardless of the nature of the ground, the swivelling projector with an efficiency of 27 or 56 lm/W projects the required sign onto the desired spot. This avoids hazards such as tripping or abrasion.

Renew your marketing activities!
In addition to its function as an indispensable security tool, you can also use the powerful projector (40 or 80 W) for eye-catching marketing. Your company logo, for example, will be a real eye-catcher!

Advantages at a glance:
- Simple assembly
- High-power LED with 40 W / 80 W
- Easily interchangeable motifs
- Versatile use
- Integrated power supply unit for 230 V
- High energy efficiency
- No wear and tear

TECHNICAL DATA eOX-SPOT

Item number	eOX-Spot-40 │ eOX-Spot-80
Housing material	Steel/aluminium, powder-coated
Weight	1,97 kg │ 3,5 kg
IEC socket	On the back of the device
Application area	Dry indoor areas
Ambient temperature	–30 ºC to +35 ºC
Cooling	Active cooling/fan
Noise level	20 dB(A) │ 29 dB(A)
Light source	40-W- │ 80-W-High-Power-LED
Average LED service life	35.000 hours
Colour temperature	6300 – 6700 K
Luminous flux of the projector	1.150 lm │ 4.730 lm
Eficiency	27 lm/W │ 56 lm/W
Motif size/image size	37,5 mm / 20 mm │ 50 mm / 40 mm
Input voltage	220 – 240 V AC, 50/60 Hz
Power consumption	42 W │ 84 W
Protection class/ Enclosure protection class	I/IP20
Photobiological safety	RG-2 (acc. to ICE62471-5:2015, EN62471-5:2015)

Motif
Interchangeable

IEC socket
Power consumption 42 W / 84 W

Lens

eOX-STATION

How to configure your FiFo tracks digitally

The eOX station is the digital extension to our classic FiFo station. Connect up to 120 lanes with an efficient pick-by-light system.

Missing withdrawals are minimised, internal and external subsequent delivery processes are automatically triggered according to the KANBAN principle and the digital interface enables direct access to all goods movements.

- Classic FiFo station, digitally enhanced
- Up to 120 tracks can be linked together
- Sensors register floor rollers when retracting and extending
- High level of safety: system operates with 24 V DC (direct current)

TECHNICAL DATA eOX-STATION

Item number	eOX-Station
Supply voltage	24 V (direct current)
Sensors	Magnetic Hall Sensors
Maximum number of tracks	120
Recognisable transport container	Dollies (more on request)
Housing material	PA12 (additively manufactured)
Necessary infrastructure	Schuko socket
Internal data transfer protocol	MODBUS RTU
Response time	< 1 s
Optional cloud connection	Via LTE
Retrievability of the data	REST API

eOX-MONOMOVER
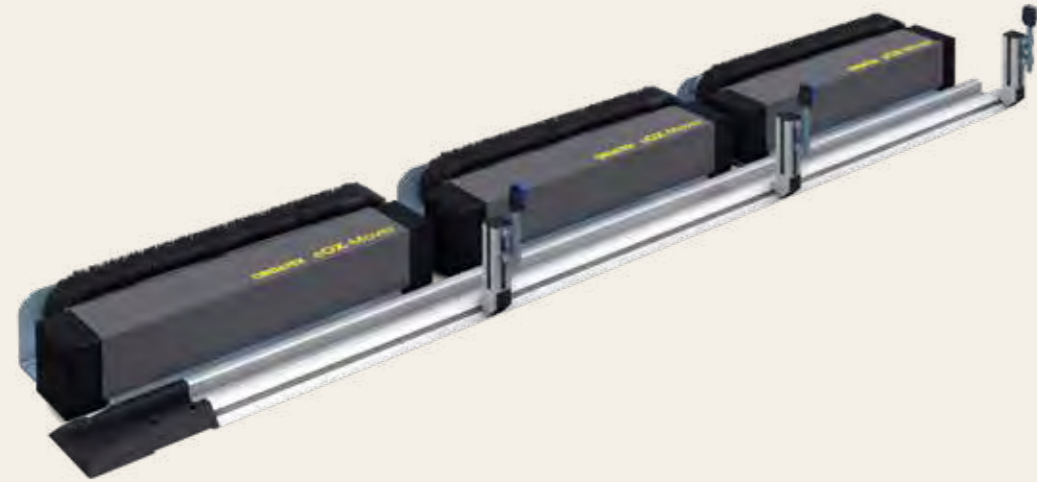

More eficiency for your FiFo station:

The eOX monomover is a further automation system for FiFo railway stations. The feed unit becomes the centrepiece of modern intralogistics: the eOX-Monomover transports dollies (total load up to 180 kg) independently from A to B via bristle belts. In this way, FiFo stations can be upgraded, and production processes optimised. Light barriers at the end of each unit automatically control the transport from one module to the next.

- Light barriers at the module ends
- Synthetic leather belt brush strap
- Unlimited track length

TECHNICAL DATA EOX-MONOMOVER

Item number	eOX-Monomover
Size per unit (L x W x H)	535 x 210 x 140 mm
Size of switch cabinet	Depends on power and size of unit
Feed speed	3 m/min
Power data	50 W/24 V DC (direct current) / 2 A
Input voltage	220 – 240 V AC, 50/60 Hz
Max. Total load	Up to 180 kg
Structural requirements	Level, clean hall floor with at least 20 N/mm2 compressive strength (concrete strength class C20/25 to C50/60; non-cracked)
Other	Distance to moving parts must be ≥ 120 mm. Compatible with ORGATEX® FiFo monorail tracks.
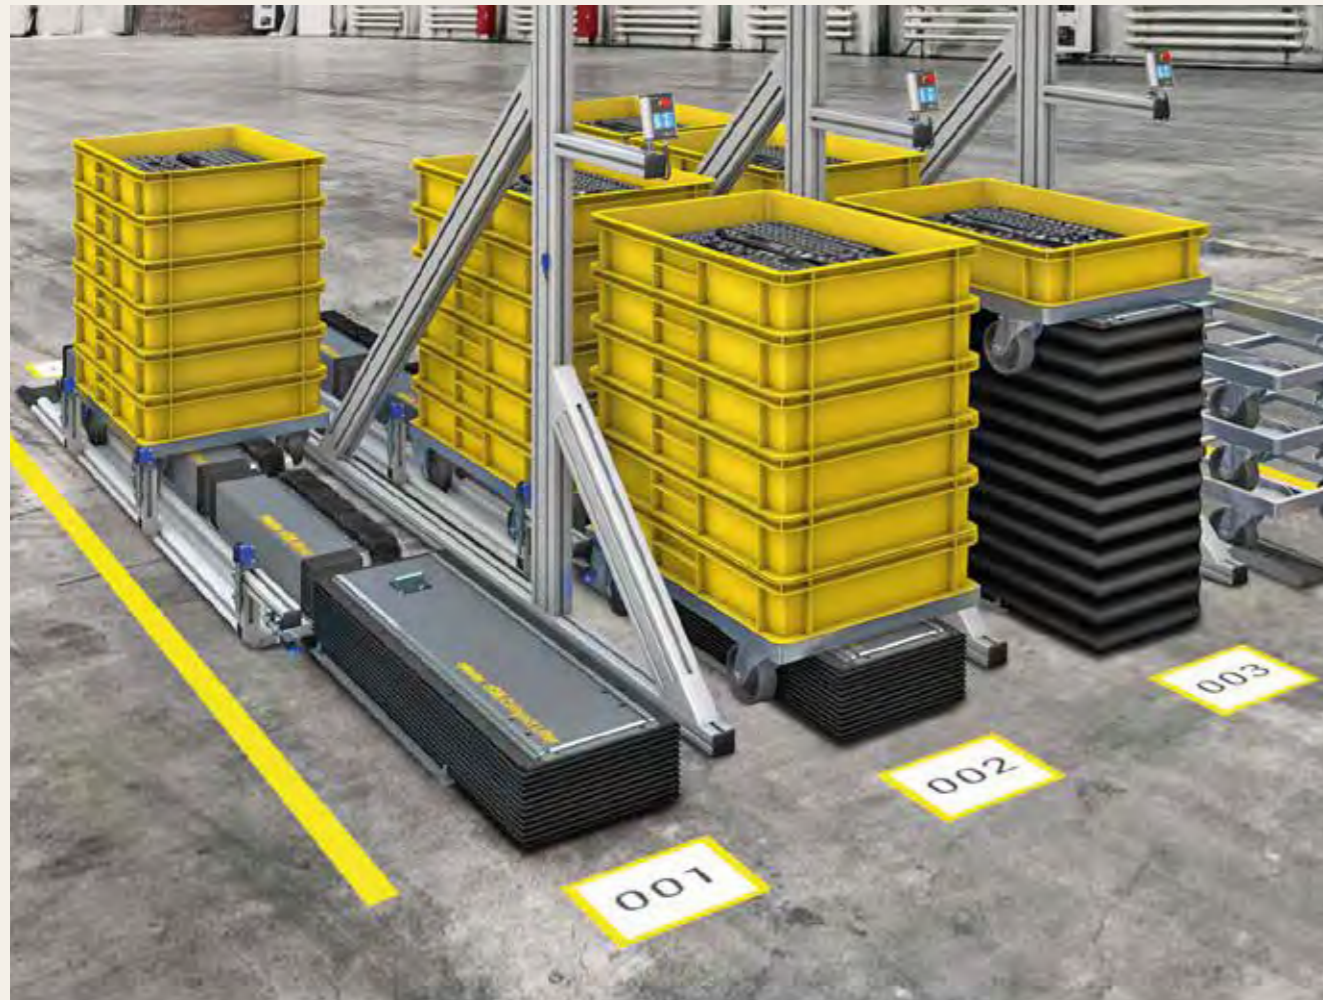

OUR RANGE OF SERVICES

We want every company to be a lean business. That's why we not only offer over 3,000 products for more efficiency, but also support you with valuable services ranging from bonding services to lean seminars to help you find your own individual way.

A lean business needs two things: a suitable and functioning infrastructure for lean processes and in-depth knowledge of effective methods. We are happy to support you with both of these with our combined experience of over 50 years.

With our bonding service, lean corner service and FiFo station service, we ensure that your lean infrastructure is perfectly assembled and ready to use in a short space of time. You also save your resources because your employees are not tied up with bonding work.

And in our lean seminars and ORGATEX® roadshows, our experienced speakers will give you in-depth insights into lean methods and bring you up to date with the latest developments in lean management.

Our services:

- **Bonding service** → S. 364
- **On-site assembly of FiFo stations** → S. 366
- **Lean-Corner-service** → S. 368
- **Lean-Seminars** → S. 370
- **Roadshows** → S. 371

BONDING SERVICE

There are walkways, danger zones, storage areas and much more in every shop floor and production hall. Precise marking makes work easier, minimises human error and contributes significantly to compliance with regulations. Our product line sets the standard for these markings.

The quality of the bonding and the materials used play a decisive role in the durability and visibility of the marking. This is where our specialised on-site bonding service comes in. We consult you individually, create a customised marking plan and guarantee optimum adhesion thanks to our specialist knowledge. Depending on the nature of the surface, strains and industry conditions, our experts will identify potential danger spots, define routes and install the optimum marking system.

The materials used by ORGATEX® are of the highest quality. They are forklift-proof, have high abrasion resistance, are characterised by excellent adhesive strength and have been specially developed for block storage or other heavy-duty areas. Our professionals know the ideal processing temperature and their experience guarantees perfect bonding. In addition, we are familiar with the relevant legal regulations and normative specifications, such as the accident prevention regulations in accordance with BGV A8, the Workplace Ordinance (ArbStättV) § 3 (1) and the M11 leaflet for internal traffic routes from the trade association and implement these.

Our service not only offers visual advantages, but also makes day-to-day work easier due to clear structures and guidelines. The number of accidents is reduced, responsibilities and work areas are visualised, and processing times are shortened. Professional hall labelling has a positive effect on your employees. An organised, structured environment not only increases work efficiency, but also t h e general well-being and satisfaction of your team.

We are committed to providing you with the best possible service and pride ourselves on our high standard of installation and service. Let's work together to make your working environment safer, more efficient and clearer and advance your operational excellence.

Individual
Consulting

Customised
Marking plans

Optimal
Bonding

In modern intralogistics, floor markings ensure safety and efficient processes. Specific shapes as well as colour and reflective properties indicate potential danger points, draw attention and structure to the material flow.

Floor markings play a central role, particularly in modern manufacturing and operating strategies such as the 5S system, the Andon system, and the classic Toyota Production System (TPS). It standardises work areas, marks walkways and ensures that everything is in its place.

This not only increases productivity and ensures reliable processes, but also maximises efficiency.

We are constantly developing our labelling materials to meet the various industry requirements. From hard-wearing floor windows and heavy-duty tapes or labelling modules for indoor and outdoor use to applications such as cold stores with ambient temperatures of up to -20 °C, ORGATEX® offers the right solution for every situation.

**Save time and nerves.
You can rely on
fast assembly and our
On-site-bonding service.**

ON-SITE ASSEMBLY OF FIFO STATIONS

Longstanding
Expertise

Precise assembly
without drilling

On-site
Consulting

The increasing complexity of intralogistics, the growing diversity of production and the trend towards „instant delivery" require robust and modern solutions. A FiFo station or supermarket makes fill levels visible and enables clear material allocation during filling or removal. This allows the required production quantity to be pre-picked and the goods to be replenished with pinpoint accuracy. A FiFo station system combines the advantages of visual warehouse management with the operability of a parking system.

Our experienced teams assemble your FiFo station on site and ensure customised integration into your production environment. Thanks to our in-depth expertise and experience in various industries, we guarantee precise installation and fast completion. The ORGATEX® monorail rail system, for example, has a modular design and can be installed without drilling. We customise the length and width to your individual requirements. The end caps serve as collision protection and the flat sides and coloured covers provide additional protection against accidents at work caused by tripping.

Because every detail is important for perfect function, our experts will accompany you from planning to installation.

As instructions must be immediately visible and intuitively positioned on a busy shop floor, we recommend labelling directly on the system. The combination of floor labelling and labelling of the enclosures makes it easier for the commission agent to allocate items immediately and prevents misplacement. In this way, a rail system becomes a holistic solution that increases the efficiency of your operation.

In over 50 years of planning, manufacturing and assembling intralogistics systems, we have had the unique opportunity to familiarise ourselves with a wide range of industries. We value dialogue at eye level and cooperation based on partnership. We know that things have to happen quickly and yet no detail should be forgotten. We know the guidelines for working in cleanrooms, the high safety standards in the food industry and the priority of occupational safety. Our aim is to understand and fulfil the requirements and needs of our customers. Our team of experts is ready to turn your individual challenges into efficient solutions.

From the very first consultation, our focus is on improving the operational process organisation. It must be agile, suitable for everyday use and intuitive so that you are well positioned for the future.

With our team of experts operating throughout Germany, we can advise you on site and support you with an efficient, holistic solution based on your day-to-day operations for ideal material provision.

For questions or a non-binding offer, please contact our service team will be happy to help you at any time.

LEAN CORNER SERVICE

Properly planned and installed, lean corners produce amazing results.

Versatile
Solutions

Customised
Planning

Process
optimisation

The Lean Corner is the starting point for a daily scrum or morning meeting, a central location for the presentation of key figures and the basis for effective team communication. This makes it an essential part of a modern, lean production environment and has a major impact on the efficiency of the shop floor, the daily lives of employees and successful operations.

The composition of a Lean Corner is based on the requirements of your shop floor and your daily work. Numerous options and different designs make it an effective visual management tool. Whether wall-mounted, digital or analogue, mobile, magnetic or stationary: a Lean Corner is a customised solution that structures your shop floor and fits seamlessly into your working environment.

Our service includes the planning and installation of your customised Lean Corner.

We rely on state-of-the-art technology that not only enables the integration of digital data, but also fulfils the requirements of Industry 4.0. A special aspect of our Lean Corners is the integration of modern IoT devices and data analysis tools. This enables real-time monitoring and provides an innovative platform for optimising workflows.

Our Lean Corners are particularly characterised by the integration of CIP boards, which stand for „Continuous Improvement Process". This is a central management method that uses the expertise and experience of employees to continuously optimise work processes. This principle ties in seamlessly with the Muda concept, which aims to identify and reduce any kind of waste – be it physical resources, time, energy or unutilised potential. The focus here is on sustainability. In view of global challenges and limited resources, it is essential to act in a sustainable, responsible and future-orientated manner.

Our Lean Corners are particularly versatile thanks to their modular design. From inscribable surfaces to magnetic walls that allow the attachment of accessories such as KPI indicators and magnetic frames, we offer a wide range of customisable options.

The in-house installation of Lean Corners in a company goes beyond the mere physical creation of a new workspace. It is the first step towards a transparent, efficient and productive working environment. When we look to the future, we see an even more connected and digitalised working world. Our Lean Corners are constantly evolving to meet these requirements and to accompany you on your journey into this future.

Take the first step towards your Lean Corner.

LEAN SEMINARS

ROADSHOWS

Benefit from the concentrated lean knowledge of our experienced speakers.

Learn how to optimise processes in both theory and practice.

Are you interested in the next seminar dates?

For further details on our seminars, please contact us by phone or online.

+49 2173 1064-0

To the contact form

We are happy to pass on our knowledge of efficiency and lean methods, which we have gathered over more than 50 years. In intensive lean seminars, our experts impart extensive knowledge on lean management, shop floor optimisation and more. You will gain valuable insights and learn proven methods for greater efficiency in your company.

Our specialised intensive workshops:

- Lean management / shop floor management
- Intensive workshop OEE/TPM
- Intensive workshop 5S/equipment
- Intensive workshop on material flow/workplace design
- Intensive workshop lean in administration

Would you like to deepen your expertise with our roadshow?

For further details on our Lean Factory seminars, please contact us by phone or online.

+49 2173 1064-0

lean-factory.com

Since 2004, the Lean Factory Group has been offering technical solutions for process optimisation and maximum competitiveness. The focus is on theory and practice – our concept includes the 3 building blocks of hardware, software and expertise. Do you want to reduce costs and realise maximum efficiency?

Our team knows the latest trends and updates, which we share with you during the roadshows. How can employees recognise waste and find a solution to the weak spot(s) themselves? Our workshops provide effective know-how to eliminate unnecessary steps in the company and improve workplace organisation.

INDEX

General Terms and Conditions

Our services are aimed exclusively at tradespeople, retailers, industry and institutions.

Prices

Price details: All prices are quoted in euros. Unless otherwise agreed, invoicing shall be based on the prices valid on the day of delivery. The prices are net prices, excluding packaging and excluding VAT, from Langenfeld. Price deviations: We make an effort to provide accurate and up-to-date price information. However, price variations may occur and we reserve the right to adjust prices at our discretion and without prior notice.

Errors in prices: Despite our best efforts, errors may occur in our pricing information, whether due to technical errors, typographical errors or other unintentional causes. In the event of an obvious pricing error, we reserve the right to cancel or amend your order, to reflect the correct price. We will notify you immediately in such a case and give you the opportunity to confirm or cancel your order.

Delivery/shipping/packaging

Delivery shall be at the risk of the customer. Dispatch shall be carried out by the means we deem most suitable and in the packaging we deem most suitable. Special requests shall be charged to the purchaser.

Delivery times

Specified delivery times are non-binding. Delayed delivery does not entitle the customer to cancel the order or to assert claims for damages.

Complaints

Any obvious defects must be reported in writing immediately, at the latest within 8 days of receipt of the goods, by sending in the delivery note. In the event of justified complaints, we are only obliged, at the buyer's discretion, to either grant a price reduction, exchange the goods or take them back and refund the purchase price.

Defects in a part of the delivery cannot lead to a complaint about the entire delivery. The customer can only demand a reduction, but not cancellation or compensation.

In the case of all self-adhesive products, our technical instructions for use do not release you from the obligation to carefully test our products on original materials before they are released for use, due to the wide range of possible applications.

Return of goods

To avoid unnecessary costs, our consent must be obtained before returning goods. Without this consent, we reserve the right to refuse acceptance.

Generally excluded from return or exchange are: all customised products, printed matter, all magnetic items (e.g. magnetic signs, magnetic storage labels, magnetic foils, tapes and pockets).

Customised products/special prints

In the production of special prints, we cannot accept any responsibility for errors that the client has overlooked or is responsible for in the proof. Any correction costs incurred shall be charged to the client. In the case of printed matter and customised products, the prescribed quantity is generally supplied.

The client is obliged to recognise an excess or short delivery of the ordered quantity of 10%. The delivered quantity is invoiced. We reserve the right to deviations in raw material properties, paper quality, colouring, and other material properties within the customary limits.

Equipment/trademarks/copyrights

The modification of the design, packaging, blister packaging etc. of our goods and the use of our trademark – in whatever form – is only permitted with our express consent.

ORGATEX GmbH retains the copyright and the right of reproduction in any process and for any purpose of sketches, drafts, originals, films, packaging inserts and the like. Reprinting, imitation or duplication of ORGATEX GmbH products is not permitted without our consent. Likewise, the reprinting, reproduction, and transfer of ORGATEX GmbH catalogue content to e-commerce platforms, even in extracts, is not permitted. We reserve the right to take legal action in the event of infringement.

Printing plates, matrices, lithographs, copy templates and the like remain the property of ORGATEX GmbH, even if they are invoiced separately.

Minimum order value

Very small orders are uneconomical for both our customers and us and represent a significant cost factor. Nevertheless, we have refrained from setting a minimum order value – but must charge a shipping/packaging fee of 9.00 euros in any case.

Terms of payment

Our invoices are payable within 30 days of the invoice date without deduction. We grant a 2% discount for payment within 10 days. The contractual partner (reseller) of ORGATEX GmbH undertakes to present ORGATEX GmbH's reservation of title to its customers who do not immediately pay the purchase price in full in cash. The delivered goods remain our property until full payment has been made. The presentation of bills of exchange does not constitute payment.

Place of jurisdiction

The place of fulfilment and jurisdiction for both contracting parties is Langenfeld.
